TABLE OF CONTENTS

| | |
|--|------------|
| Introduction..... | ix |
| Highlights..... | x |
| Section 1 - Data Communications..... | 1 |
| .01 IRS Front-End Processing Subsystem (FEPS) | 3 |
| 1. File Transfer Protocols Character Code & File Compression.... | 3 |
| 2. Trading Partner/Transmitter Interface (TPI)..... | 3 |
| 3. Transmitter Profile DataBase (TPDB)..... | 3 |
| 4. Asynchronous Communications Transmitter Interface..... | 4 |
| 5. Examples..... | 4 |
| 6. Suspended Transmitter..... | 4 |
| 7. Virus Detection Procedures..... | 4 |
| 8. Logon Validation Specifications..... | 5 |
| a. Transmission Inactivity | 5 |
| b. Changing File Transfer Protocol Indicator (FTP) | 5 |
| c. Changing File Compression | 5 |
| 9. IMF Trading Partner (1040 and ETD) Session Example | 5 |
| a. Successful Login - No Password Change Required | 6 |
| b. Successful Login Password Change Required | 6 |
| c. Unsuccessful Logon | 8 |
| d. EMS Unavailable | 8 |
| e. EMS Main Menu Processing | 9 |
| 10. Changing Settings..... | 12 |
| a. Changing the Transmission Protocol | 12 |
| b. Changing the Compression Method | 15 |
| 11. Receiving Acknowledgements..... | 18 |
| a. Suspended Transmitter Message | 20 |
| 12. Sending Files..... | 21 |
| a. Starting the Send Process | 21 |
| b. Sending as Transmitter | 22 |
| 13. Request Transmission Status Report..... | 24 |
| 14. Changing Password..... | 26 |
| 15. Executing the State Return Menu..... | 29 |
| a. State Return Menu Unavailable | 30 |
| b. State Return Menu | 31 |
| c. Resetting a State File | 32 |
| d. Requesting a State Files to Download Report | 35 |
| e. Receiving State Return Files | 37 |
| 16. Resetting Acknowledgment File(s) | 39 |
| 17. Logging Off the System..... | 43 |
| 18. Trading Partner Sessions Examples..... | 44 |
| Appendix A - GTX and Acknowledgment File Name Formats | 46 |
| Appendix B - XML Error Acknowledgement Format | 50 |
| Appendix C - EMS Communications and Encryption | 56 |
| Appendix D - Examples of Transmission Status Reports | 66 |
| Appendix E - Guidelines for Trading Partners Using EMS | 78 |
| Appendix F - Example Script to Pick Up Acks & Send a File | 82 |
| Appendix G - EMS Password Rules | 88 |
| Appendix H - EMS Password Screen Shot | 92 |
| Appendix I - Communication Error Messages | 106 |
| Appendix J - Acronym List | 114 |

TABLE OF CONTENTS continued

| | |
|---|-----|
| Section 2 - Transmission File Format..... | 118 |
| .01 General Description..... | 118 |
| .02 Fixed and Variable Length Options..... | 121 |
| 1. Fixed Length Option (Fixed Format)..... | 121 |
| 2. Variable Length Option (Variable Format)..... | 122 |
| 3. Examples of Fixed and Variable Formats..... | 124 |
| Section 3 - Acknowledgement File Format..... | 126 |
| .01 Acknowledgement File Components..... | 126 |
| .02 Acknowledgement File Record Layouts..... | 130 |
| 1. ACK Key Record..... | 130 |
| 2. ACK Error Record..... | 132 |
| 3. ACK Error Record (STCGL/LTCGL)..... | 133 |
| 4. ACK Recap Record..... | 134 |
| .03 Examples of ACK Records..... | 136 |
| .04 How to Batch and Match Returns with Acknowledgement Files..... | 137 |
| 1. File Names..... | 137 |
| 2. Assignment of File Name by FEPS..... | 138 |
| 3. Receiving, Locating, Storing and Matching ACK Files..... | 139 |
| Section 4 - Types of Records..... | 142 |
| .01 Transmitter Records..... | 142 |
| 1. TRANA and TRANB Records..... | 142 |
| 2. RECAP Record..... | 142 |
| .02 Tax Return Records..... | 142 |
| 1. Tax Form Record..... | 142 |
| 2. Schedule and Form Records..... | 142 |
| 3. FEC Record | 143 |
| 4. Authentication Record..... | 143 |
| 5. Statement Records..... | 143 |
| 6. STCGL/LTCGL Records..... | 144 |
| 7. Preparer Note, Election Explanation and Regulatory Explanation Records..... | 144 |
| 8. State Records..... | 145 |
| 9. Summary Record..... | 145 |
| Section 5 - Types of Characters..... | 146 |
| .01 Allowable Characters..... | 146 |
| 1. Alpha..... | 146 |
| 2. Numeric..... | 146 |
| 3. Alphanumeric..... | 148 |
| .02 Special Cases for Special Characters..... | 149 |

INTRODUCTION

This publication outlines the communications procedures, transmission formats, character sets, validation criteria, and error reject conditions for individual income tax returns filed electronically via telephone lines to participating Internal Revenue Service Centers. Also covered are the formats for statement records, examples of types of records, and explanations of the Acknowledgement files transmitted to electronic filers.

The File Specifications (Part I) must be used in conjunction with the Record Layouts (Part II) and the corresponding version of the Handbook for Electronic Return Originators of Individual Income Tax Returns, Publication 1345. Software developers and transmitters should use both publications and must transmit test returns from the IRS developed Test Package for Electronic Filers of Individual Income Tax Returns, Publication 1436, which is revised yearly. Tax preparers who use a transmission service will need only Publication 1345.

Publication 1346, and Publication 1436 are mailed automatically to applicants as appropriate, based on their intended participation. Other IRS *e-file* publications, including Publication 1345, Handbook for Authorized IRS e-file Providers of Individual Income Tax Returns, are available on the IRS web site, www.irs.gov. A list of IRS *e-file* publications is in Publication 3112, IRS e-file Application and Participation. You may also call 1-800-829-3676 for additional copies of publications.

This publication and its updates are also available on the Digital Daily website at www.irs.gov. In addition, they are available on the Electronic Filing System Bulletin Board System. The Electronic Filing Bulletin Board System (EFSBBS) operates seven days a week. The system is unavailable at 4:00 a.m. Eastern Time for about 30-60 minutes for maintenance. This system provides general Electronic Filing Program information as well as specific information concerning changes to this and other publications.

Filers using an asynchronous modem (14.4 Kbps or less) and communication software can access the bulletin board by dialing:

859-292-0137

The communication software should have the following protocol:
Full Duplex, No Parity, 8 Data Bits, and 1 Stop Bit.

Intentional Blank Page

HIGHLIGHTS FOR TAX YEAR 2007

New Form(s)/Schedule(s)

Four (4) additional forms will be accepted for Electronic Filing for Tax Year 2007:

Form 1040-SS (PR) - U.S. Self-Employment Tax Return Additional Child Tax Credit
Form 8909 - Energy Efficient Appliance Credit
Form 8917 - Tuition and Fees Deduction
Form 8919 - Uncollected Social Security and Medicare Tax on Wages

New Record attached to 1040-SS (PR): 499-R/W-2PR

Form 1040 Write-Ins

Line 15b - "HFD" for qualified HSA funding distributions from an Individual Retirement Account (IRA).

Line 16b - "PSO" for distributions from retirement plans to pay insurance premiums for retired public safety officers.

Line 36 - "WBF" deduction for whistleblower fees.

Line 44 - "FITPP" for additional tax on the recapture of a charitable deduction of a fractional interest in tangible personal property.

Electronic Management System (EMS)

Beginning processing year 2008, MeF and 1065 Proprietary returns will no longer be accepted through EMS.

New EMS Login Banner - THIS U.S. GOVERNMENT SYSTEM IS FOR AUTHORIZED USE ONLY!
Use of this system constitutes consent to monitoring, interception, recording, reading, copying or capturing by authorized personnel of all activities. There is no right to privacy in this system. Unauthorized use of this system is prohibited and subject to criminal and civil penalties.

TRADING PARTNER RESET ACKNOWLEDGMENT OPTION - Transmitters can re-hang/reset all types of Acknowledgements files by choosing Menu option 8 from the EMS main menu.

The **State Retrieval Subsystem** will be consolidated into EMS. The following messages will be disabled.

"State Return Menu is currently unavailable. Additional information may be available on irs.gov and quickalerts."

"State Return Menu is busy. Wait at least 10 minutes, then retry."

NEW ENCRYPTION OPTIONS - There will be three options for SSL 3.0/TLS 1.0:

- 1) AES 128-bit (Treasury recommends #1)
- 2) TDES 168-bit (may affect performance)
- 3) SSL 128-bit (RC4) - current, but will phase out in 2009/2010

Federal/State Returns

Indiana, Louisiana, and South Carolina have elected to mandate individual e-filing for Practitioners filing 100 or more returns.

An ITIN/SSN mis-match indicator will be passed to the states. Field 0016 of the Generic Record will be populated with "M". The Generic Record will increase to 2754 bytes.

HIGHLIGHTS FOR TAX YEAR 2007 continued

Form 1040-SS (PR)

Form 1040-SS, U.S. Self-Employment Tax Return (Including the Additional Child Tax Credit for Bona Fide Residents of Puerto Rico)

[Form 1040-PR, Planilla para la Declaracion de la Contribucion Federal sobre el Trabajo por Cuenta Propia (Incluyendo el Credito Tributario Adicional por Hijos para Residentes Bona fide de Puerto Rico)]

The Form 1040-SS and Form 1040-PR are English- and Spanish-language versions of the same form requiring only one Record Layout format in COBOL. Both the English and Spanish versions of the paper documents are available for use by the filing public in Puerto Rico. In this initial year we will be electronically accepting an abbreviated Page 1 and the first three lines of Page 2, to process refund-only claims for Additional Child Tax Credit from bona fide residents of Puerto Rico. The requirements for e-file reflect the instructions for the paper submission of the form to claim Additional Child Tax Credit, exclusively.

While there are two language variations for the forms, the single electronic record must always be transmitted as TYPE "1040SS." Any attempt to portray the submission as "1040PR" will cause it to be rejected.

To accommodate those Spanish-speaking filers who in the future would wish to possibly obtain a copy of a prior-year Form 1040-SS (PR) return, an option is installed at Sequence 0009 in the Record Layout labeled "1040-SS (PR) Literal." The selection of the possible "SS" or "PR" values would determine whether an English- or Spanish-language facsimile would subsequently be returned to them for their request at such future date. Any vendor may therefore distribute a software product presented to the client in Spanish to include the option for this preference.

Concurrently, the designations for the relationships of the Qualifying Children are also provided in the list in the associated Field Description of the programming for either English or Spanish entries.

Another essential cautionary note is that the terms "nino" for "son," and "nina" for "daughter," are spelled in Spanish with a tilde ("~") over the second "n" in either word. However, any electronic submission must never contain the tilde ("~") over the second "n" that exists in the correctly spelled Spanish representation of these terms, because of the potential for unpredictable results to the transmission.

499R-2/W-2PR RECORD

The entry for the amount of withheld Social Security and Medicare taxes on Page 2, Part II, Line 2 of the paper Form 1040-SS (PR) includes the instruction to attach copies of Forms 499R-2/W-2PR, the single-form WITHHOLDING STATEMENT from Hacienda, the Treasury Department of the Commonwealth of Puerto Rico. An electronic 499R-2/W-2PR RECORD is therefore provided to e-file Form 1040-SS (PR), for compliance with this requirement.

All amounts of withheld Social Security and Medicare taxes on all 499R-2/W-2PR RECORDS and possible Forms W-2 present must reconcile to the total amount of withheld Social Security and Medicare taxes on Page 2, Part II, Line 2 of the Form 1040-SS (PR).

HIGHLIGHTS FOR TAX YEAR 2007 continued

Form 8453, U.S. Individual Income Tax Transmittal for an IRS e-file Return

Beginning with the 2008 filing season, tax practitioners can e-file individual income tax returns only if the returns are signed electronically using either the Self-Select or the Practitioner PIN method. Electronic Return Originators will no longer use Form 8453 as a signature document, but will continue to use a newly designed Form 8453, U.S. Individual Income Tax Transmittal for an IRS e-file Return, to transmit supporting documents that are required to be submitted to the IRS. See Attachment 6 for additional information.

Tax Year 2007 Forms 8453 will be processed by the Andover and Austin Submission Processing Centers. Andover will process forms for returns transmitted to Andover and Kansas City. Austin will process forms for returns transmitted to Austin, Fresno and Philadelphia.

Note: Requirements for Tax Year 2007 Form 8453-OL, U.S. Individual Income Tax Declaration for an IRS e-file Online Return, have not changed.

Authentication Record Change

Due to the elimination of the "signature" Form 8453, the PIN Type Code (SEQ 0008) "blank" has been removed and PIN Type Code (SEQ 0008) "F" (Form 8453-OL Required) has been added to the Authentication Record.

New Paper Document Indicator 12

Beginning Tax Year 2007, Paper Document Indicator 12 (SEQ 0182) has been added to the Summary Record to indicate that Worksheets 1 through 4 from Pub. 517, Social Security and Other Information For Members of the Clergy and Religious Workers, will be submitted with Form 8453 or Form 8453-OL.

Jurat/Disclosure Codes

The Jurat/Disclosure Codes are updated to include Form 1040-PR/SS, U.S. Self-Employment Tax Return (Including the Additional Child Tax Credit for Bona Fide Residents of Puerto Rico)

HIGHLIGHTS FOR TAX YEAR 2007 continued

Self-Select PIN - Prior Year PIN

Beginning in Filing Season 2007, when using the Self-Select PIN signature method, taxpayers were able to use their prior year PIN for authentication. The prior year PIN DOES NOT increase the number of shared secrets that must be submitted to IRS. Taxpayers may use either their Original Prior Year Adjusted Gross Income or Prior Year PIN, for authentication. Software may be designed to allow an entry in both of these fields. Taxpayers may choose to include both the original Prior Year AGI and Prior Year PIN; if either of these shared secrets matches, the return will continue processing.

NOTE: The Date of Birth shared secret requirement is NOT impacted by this change.

Both Online taxpayers as well as taxpayers who use an Authorized e-file Provider to file their tax returns are eligible to use this option.

Tax preparation software should be capable of providing the taxpayer with a copy of the PIN used in their current tax return so that it will be available for them to use as their shared secret the next year. As a suggestion, the PIN can be pre-printed on the signature line (SEQ 1321/1324) of the tax return to avoid additional paper generation.

New Electronic Signature Requirement for Tax Practitioners

Beginning with the 2008 filing season, Tax Practitioners can e-file individual income tax returns only if the returns are signed electronically using either the Self-Select or the Practitioner PIN method:

- *Paperless signature by taxpayer via Self-Select PIN or*
- *Electronic signature by authorization to an Electronic Return Originator via Form 8879 retained by the ERO*

Nearly 90 percent of tax professionals already use PINs to sign returns electronically, and it's time to take this step toward truly paperless filing.

Tax Practitioners will no longer use Form 8453 as a signature document, but will continue to use a newly designed Form 8453 to transmit supporting documents that are required to be submitted to the IRS.

Intentional Blank Page

Editorial Changes

All changes made for Tax Year **2007** are noted by a single vertical bar (|) in the right margin. Deletions of **entire lines** are noted by a hyphen followed by a single vertical bar (-|).

An attempt was made to include as many changes as possible before publication. Any changes made after publication will be posted to the Electronic Filing Bulletin Board System.

Part II of Publication 1346 contains the Electronic Returns Record Layouts for Individual Income Tax Returns.

Part III of Publication 1346 contains Electronic Transmitted Documents (ETD) File Specifications and Record Layouts.

Comments and Suggestions

Please send any comments or suggestions regarding Sections 1-4 and Section 12 of Part 1 to:

SECTION 1 - DATA COMMUNICATION

Electronic Filers will transmit over the Public Switched Telephone Network or through the internet to the Front End Processing System (FEPS), also known as Electronic Management System (EMS) located at the Enterprise Computing Center (ECC) at Memphis, Tennessee and Martinsburg, West Virginia.

HISTORICAL NOTE: In 1996, IRS began phasing in a UNIX-based Front End Processing Subsystem (FEPS), also known as the Electronic Management System (EMS), at the Enterprise Computing Center (ECC) at Memphis (formerly known as Tennessee Computing Center (TCC)) to eventually replace all of the IBM Series/1 Data Communications Subsystem (DCS). In processing year 1997, the Tennessee Computing Center (TCC) replaced the Series/1 DCS with the new FEPS.

In 1997, the Austin Service Center (AUSC) also began phasing in the FEPS and in 1999 phased out the IBM Series/1. Beginning with PATS 1999, the IBM Series/1 mini-computers were retired from Andover (ANSC), Cincinnati (CSC), and Ogden Service Centers (OSC). Instead of installing the new FEPS in these centers all sites began using the FEPS in the ECC at Martinsburg, WV and Memphis, TN.

The following transmission rules apply:

Processing for 1040 e-file in 2008 Tax Year 2007

JANUARY 2008 - OCTOBER 2008 Return Transmissions

| If Fed/State or State only return and the State return included is for the following state; OR If Online Federal return only and the taxpayer's address on their Federal return is in the following state: | Return Processing Center Site Designator and URL | Error Resolution System Correspondence | e-Help Desk 1-866-255-0654 Send Form(s) 8453/8453-OL to: |

efileB is used for Test returns that are processed at ECC-MEM
efileC is used for Production returns that are processed at ECC-MEM

September 20, 2007

SECTION 1 - DATA COMMUNICATION

After pre-processing on the FEPS, the returns will be routed to their appropriate UNISYS machines at the ECC located at Martinsburg. All inquiries regarding transmission, rejects, problems, and PATS should be directed to ANSPC, or AUSPC as appropriate, by calling the toll-free e-Help Desk number at 1-866-255-0654. All inquiries regarding PATS should be directed to ANSPC and AUSPC as appropriate, by calling the toll-free e-Help Desk number.

NOTE: Transmitters who elect to use high-speed lines or expect to handle a large volume of electronic returns may request to lease their own dedicated line(s) at either the ECC located at Martinsburg. They must arrange to lease and install the lines and purchase modems or routers at both ends. See Appendix C - Digital Service Information.

NOTE: Transmitters who wish to file through their Internet Service Provider (ISP) must acquire e-file software that incorporates Secure Socket Layer (SSL) with a telnet/s protocol and the interface to the IRS gateway to the FEPS. See Appendix C - Internet Service information.

NOTE: The FEPS uses a menu driven interface. The IRS systems are designed to handle large volume transmissions. The practice of transmitting many small batches saturates the indices and degrades the systems. It is recommended that Internet transmitters should file no more than 500 returns per transmission in case the session terminates prior to completion. If fewer than 500 returns are to be transmitted, it is recommended these returns be filed not more than once per drain. (See processing schedule on www.irs.gov)

Dedicated, leased line transmitters may file up to 10,000 returns per transmission (Return Sequence Numbers 0000-9999); **if fewer** than 10,000 returns, the IRS recommends filing once per drain. Peak filing occurs around the "drain" times, which are posted on the Electronic Filing Bulletin Board System and the e-file professional page at www.irs.gov.

(859) 292-0137 - **not** a toll-free call)

To assist transmitters in scripting automated logins and transmissions, see Appendix F.

NOTE: Please note that additional text has been added throughout which incorporates information retrieved from the Trading Partners Users Manual.

-|

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS)

1. FILE TRANSFER PROTOCOLS CHARACTER CODE AND FILE COMPRESSION

a. File Transfer Protocols

- (1) FTP (with special permission - see note above)
- (2) XMODEM-1K
- (3) YMODEM-Batch
- (4) ZMODEM

Transmitters may use any telecommunications software that is compatible with the above file transfer protocols.

b. Character Codes

American Standard Code for Information Interchange (ASCII)

c. File Compression

COMPRESS

GZIP (Freeware available from www.gzip.org)

NOTE: IRS does not support WINZIP or PKZIP.

2. TRADING PARTNER/TRANSMITTER INTERFACE (TPI)

The Trading Partner/Transmitter Interface (TPI) of the Front-End Processing Subsystem (FEPS) has two components: the Operating System Interface (OSI) and the Electronic Filing Systems Interface (EFSI). The OSI and EFSI prompts and messages are in upper/lower case. **The delete key (if the TP's terminal emulation software sends X'7F') or simultaneously entering the Control ("Ctrl") and Backspace keys** may be used to correct a mistake while entering the login identification and password, (OSI interface). After successful login, the transmitter can use the Backspace key (also generated by simultaneously entering the Control ("Ctrl") and "h" keys), (EFSI interface). All responses may be in upper or lower case EXCEPT the **login identification and password**, which are case-sensitive and must be entered with the exact case as it appears in the letter with your password and in the Transmitters Profile DataBase (TPDB).

All responses are echoed back except the password. On default prompts, the cursor will be to the right of the **colon and blank** (": ").

3. TRANSMITTER PROFILE DATABASE (TPDB)

The Transmitter Profile DataBase (TPDB) keeps track of the sequence number for the ETIN to date. The sequence number is in the Acknowledgement Reference File Name on the FEPS. The Acknowledgement Reference File Name is composed of MMDDnnnn. The 4-digit sequence number represents the number of the transmissions to date for that ETIN. The Acknowledgement Reference File Name as well as ETIN, Julian Day and 2-digit sequence number for the Julian Day, and FEPS-assigned Global Transaction Key (GTX Key) are linked to your Acknowledgement files and can be searched by the e-Help Desk Staff Assistors to research the status of a transmission.

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS)

4. ASYNCHRONOUS COMMUNICATIONS TRANSMITTER INTERFACE

After dialing the assigned telephone number to the FEPS, the transmitter must first enter the carriage return <cr> character, which typically can be generated by simultaneously entering the Control ("Ctrl") and "m" keys. This alerts the Operating System to transmit an ASCII login prompt.

NOTE: Turn off call waiting (*70) before logging onto the FEPS to avoid aborted sessions. **(Check with your phone company to verify use of *70 to disable call waiting).**

5. EXAMPLES

In the examples below, **boldface** text indicates information sent by the transmitter. The system will echo transmitter input and send a carriage return "<cr>", followed by line feed "<lf>" after receipt of a "<cr>" from the transmitter.

6. SUSPENDED TRANSMITTER

A suspended transmitter will be allowed to log into EMS to continue to receive Acknowledgements, but will not be allowed to transmit. See Section 1-Data Communication .01.11.a.

7. VIRUS DETECTION PROCEDURES FOR E-FILED TRANSMISSIONS FOR TRADING PARTNERS

- a. The Front-End Processing System (FEPS) will scan every transmission.
- b. If a virus is detected, FEPS will quarantine the file and immediately put a transmission Suspend Indicator on the Trading Partner (TP)'s profile.
- c. While online, the TP (transmitter) will see "SUSPENDED", but will be permitted to pick up Acknowledgement Files.
- d. The FEPS will create a Communications Error Message in a Communications Error Acknowledgement File, which will be in XML format, with the message VIRUS DETECTED and the name of the virus.
- e. The next time the TP logs in, the TP will receive this ACK file, but will not be able to transmit. The TP can continue to pick up all ACK Files.
- f. TP must remove infected data and call the appropriate e-Help Desk (e-HD) at 1-866-225-0654 (toll free) when ready to re-transmit.
- g. The e-HD will remove the Suspend Indicator so that the TP can re-transmit the file and begin transmitting new files.
- h. If another virus is detected, everything above will happen again.

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS)

8. LOGON VALIDATION SPECIFICATIONS

a. Transmission Inactivity

Any period of inactivity for 60 seconds will cause the line to be disconnected. It is assumed that the line is bad or that there are problems in transmission, so the line is disconnected to prevent the transmitter from being charged by the long-distance carrier for an inactive open line.

b. Changing File Transfer Protocol Indicator (FTP)

The File Transfer Protocol indicated by the Trading Partner is shown by menu item number 3 in brackets. If the Trading Partner has not specified a protocol, Z-modem is assigned as a default protocol. A Trading Partner can choose menu Item 3 to change protocol.

c. Changing File Compression

The FEPS assigns by default no compression on the file transfer. If the Trading Partner wants to use UNIX compression or GZIP compression, this can be selected from menu Item 4. See Exhibit 4-11.

9. IMF TRADING PARTNER (1040 and ETD) SESSION EXAMPLE

The following discussion describes how a Trading Partner (TP) who files Forms 1040 and ETDs will interact with the FEPS. The figures are formatted for a word processing document and do not necessarily display the exact spacing that is used by the FEPS.

Note: Password rules can be found in Appendix G.

The following discussion describes how a TP logs on to the system. When a TP connects to EMS, the "Authorized Use" banner shown in Exhibit 3-1 is displayed.

**THIS U.S. GOVERNMENT SYSTEM IS FOR AUTHORIZED USE ONLY!
Use is consent to authorized monitoring, capturing, etc.& no rights to
privacy.**

**THIS U.S. GOVERNMENT SYSTEM IS FOR AUTHORIZED USE ONLY!
Use of this system constitutes consent to monitoring, interception,
recording, reading, copying or capturing by authorized personnel of all
activities. There is no right to privacy in this system. Unauthorized
use of this system is prohibited and subject to criminal and civil
penalties.**

Exhibit 3-1 Authorized Use Banner

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS)

The TP is then prompted for his/her login id and password as shown in Exhibit 3-2. (Note: Not only will the password not be displayed, but also there will be no indication of how many characters the TP has typed).

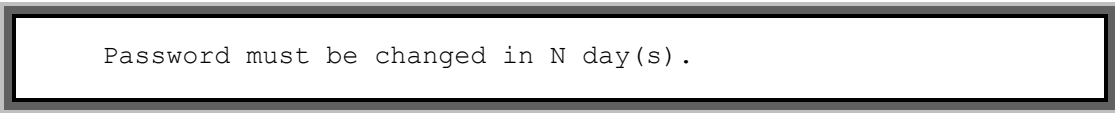

```
login: xxxxxxxx
Password:
```

Exhibit 3-2 Login and Password Prompts

a. SUCCESSFUL LOGIN - NO PASSWORD CHANGE REQUIRED

If the TP successfully logs on and the TP's password will expire in seven days or less, then the message shown in Exhibit 3-3 is displayed and processing continues. (Note that "N" will be replaced by the number of days remaining until the password must be changed).

Password must be changed in N day(s).

Exhibit 3-3 Password Change in N Days

If there are more than seven days until the password expires, then processing continues as described in Section 1-Data Communication .01.9.e.

b. SUCCESSFUL LOGIN - PASSWORD CHANGE REQUIRED

There are times when a TP correctly supplies his/her EMS login id and password, but is required to change his/her password before proceeding. These include:

- the TP first logs in
- the TP's current password has expired after 90 days
- the TP's password has been reset by an EMS system administrator as a result of the TP contacting the
IRS e-Help Desk

When any of these situations occur, the TP is prompted to enter a new password and to confirm his/her new password by re-entering it as shown in Exhibit 3-4.

```
Enter new password:
Re-enter new password:
```

Exhibit 3-4 New Password Prompts

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

If the TP's responses meet the rules for changing the password (refer to Appendix G for rules regarding passwords), the password is changed and the message shown in Exhibit 3-5 is displayed. The TP will subsequently use the new password to log into either EMS processing center. Processing then continues as described in Section 1-Data Communication .01.9.e.

Password changed.

Exhibit 3-5 Password Change Confirmation

However, if the TP's responses to the password prompts do not meet the rules for changing the password, then an error message is displayed. A TP is given at most three tries to change his/her password.

If the TP does not enter the same password in response to the "Enter new password" and "Re-enter new password" prompts, then the password is not changed and the message shown in Exhibit 3-6 is displayed. If the TP has unsuccessfully attempted to change his/her password less than three times, he/she is prompted for his/her new password as shown in Exhibit 3-4. If this is the third unsuccessful attempt, then the TP is disconnected.

New passwords don't match.

Exhibit 3-6 Unmatched New Passwords Message

If the TP enters a new password that does not meet the rules, then the password is not changed and the message shown in Exhibit 3-7 is displayed. If the TP has unsuccessfully attempted to change his/her password less than three times, he/she is prompted for his/her new password as previously shown in Exhibit 3-4. If this is the third unsuccessful attempt, the TP is disconnected.

Password rule(s) have not been met.

Exhibit 3-7 Password Rule Violation Message

If the TP has concurrent sessions, only one **session** can change the password. If the TP attempts to change his/her password in more than one session, only one will be allowed and the message shown in Exhibit 3-8 is displayed to the other session(s) and the TP is disconnected.

Login failed. Another session is trying to change the password.

Exhibit 3-8 Another Login Session Changing Password Message

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

If a system error occurs during the change password operation, the password may or may not be changed. The message shown in Exhibit 3-9 is displayed and the TP is disconnected. The TP may need to try both his/her old and new passwords on his/her next login.

System error.

Exhibit 3-9 System Error Message

c. Unsuccessful Logon

After each unsuccessful login attempt due to the TP entering an incorrect EMS login id or password, the system displays the message shown in Exhibit 3-10.

Login incorrect

Exhibit 3-10 Login Incorrect Message

After each unsuccessful login attempt, the system displays "Login incorrect." After three consecutive unsuccessful login attempts, the TP is disconnected. After six consecutive unsuccessful login attempts (in two or more consecutive sessions) the TP's account is disabled. Once the account has been disabled, any attempt to login to the account causes the system to display the message "This account is currently disabled" and the login attempt fails. If this happens, the TP should contact the **IRS e-Help Desk**.

This account is currently disabled.

Exhibit 3-11 Disabled Account Message

d. EMS Unavailable

If the EMS application is not available when the TP attempts to login, one of two messages is displayed after the login id and password prompts. If EMS is unavailable because of scheduled down time, the message shown in Exhibit 3-12 is displayed and the TP is disconnected.

EFS is currently unavailable. Additional information may be available on IRS quick alerts.

Exhibit 3-12 EFS Unavailable Message

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

If the EMS application is unavailable for unscheduled reasons, the message shown in Exhibit 3-13 is displayed and the TP is disconnected.

```
EFS is busy.  Wait at least 10 minutes, then retry.
```

Exhibit 3-13 EFS Busy Message

e. EMS Main Menu Processing

Once the TP has successfully completed the login process (including changing his/her password, if necessary), the "last login" message is displayed as shown in the Exhibit 3-14.

```
Last login: Tue Sep 4 10:39:31 from computername
```

Exhibit 3-14 Last Login Message

The "Official Use" banner shown in Exhibit 3-15 is then displayed.

```

Next the Main Menu is displayed as shown in 3-16.

```
MAIN MENU

1) Logoff
2) Receive/Send File(s)
3) Change File Transfer Protocol [ZMODEM]
4) Change Compression Method [NONE]
5) Request Transmission Status Report
6) Change Password
7) Show State Return Menu (available for State
   use only)
8) Reset Acknowledgment File(s)

Enter your choice:
```

Exhibit 3-16 Initial Main Menu for Non-State TP

From the Main Menu, the **non-State** TP can now choose to receive acknowledgment files and transmit a file, change the protocol and/or compression settings, request a Transmission Status Report, change his/her password, **or reset acknowledgment file(s)**. Whenever the State TP completes **Option 2 through 6**, the TP is automatically returned to the Main Menu screen. If a non-State TP selects **Option 7**, the message shown in Exhibit 3-17 is displayed along with the Main Menu. If the non-State TP selects **Option 7** three times, the TP is disconnected.

```
MAIN MENU

1) Logoff
2) Receive/Send File(s)
3) Change File Transfer Protocol [FTP]
4) Change Compression Method [NONE]
5) Request Transmission Status Report
6) Change Password
7) Shown State Return Menu (available for State use only)
8) Reset Acknowledgment File(s)

Enter your choice: 7

Invalid option. For State use only.

3) Change File Transfer Protocol [ZMODEM]
4) Change Compression Method [NONE]
5) Request Transmission Status Report
6) Change Password
7) Show State Return Menu (available for State use only)
8) Reset Acknowledgment File(s)

Enter your choice:
```

Exhibit 3-18 Invalid Main Menu Selection

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

For all TPs, the current file transfer protocol is displayed in brackets next to the "Change File Transfer Protocol" menu item. Likewise, the TP's current compression method is displayed in brackets next to the "Change Compression Method" menu item. The possible file transfer protocols and compression method values are identified in Section 1-Data Communication .01.10.a-b., where the "File Transfer Protocols" and "File Compression Methods" menus are discussed.

It should be noted that a TP's initial compression method is "NONE." Since the EMS does not auto-sense compressed files, a TP must select a compression method before submitting compressed files. If the TP has selected a compression method, his/her acknowledgment files and Transmission Status Report are compressed and returned using the selected compression method.

At any prompt, if the TP does not respond in 60 seconds the following message is displayed: "DISCONNECTING FROM EFS." and the TP is disconnected.

If the TP enters a character that is not one of the listed number choices, i.e., is not 1-6 for non-State TPs or is not 1-7 for State TPs, then an invalid menu selection message along with the Main Menu is displayed. An example is provided in Exhibit 3-18. If the TP fails to make a valid selection in three attempts, the TP is disconnected.

10. CHANGING SETTINGS

This section explains how to change the TP's communication protocol and compression settings.

a. Changing the Transmission Protocol

To change the transmission protocol, the TP chooses "Change File Transfer Protocol" as shown in Exhibit 4-1.

MAIN MENU

- 1) Logoff
- 2) Receive/Send File(s)
- 3) Change File Transfer Protocol [ZMODEM]
- 4) Change Compression Method [NONE]
- 5) Request Transmission Status Report
- 6) Change Password
- 7) Show State Return Menu (available for State use only)
- 8) Reset Acknowledgment File(s)

Enter your choice: 3

Exhibit 4-1 Choosing Change File Transfer Protocol

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

When the TP chooses "Change File Transfer Protocol," the menu shown depends on whether or not the TP has been approved to use the FTP protocol (see Appendix C for FTP usage). If the TP cannot use the FTP protocol, the menu shown in Exhibit 4-2 is displayed. Brackets frame the TP's current file transfer protocol. The TP's initial setting is "ZMODEM."

```
FILE TRANSFER PROTOCOLS MENU

1) Return to MAIN MENU
2) [ZMODEM]
3) XMODEM-1K
4) YMODEM BATCH

Enter your choice:
```

Exhibit 4-2 Initial File Transfer Protocol Menu Display without FTP

If the TP has been approved to use the FTP protocol, he/she must provide certain configuration information to the IRS before being able to use FTP. Once the TP's FTP configuration information has been added to the EMS system, then the menu shown in Exhibit 4-3 is displayed.

```
FILE TRANSFER PROTOCOLS MENU

1) Return to MAIN MENU
2) [ZMODEM]
3) XMODEM-1K
4) YMODEM BATCH
5) FTP

Enter your choice:

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

After the TP chooses a valid option from the File Transfer Protocols Menu or chooses "Return to MAIN MENU," the Main Menu is redisplayed with the newly chosen protocol in brackets (Exhibit 4-8).

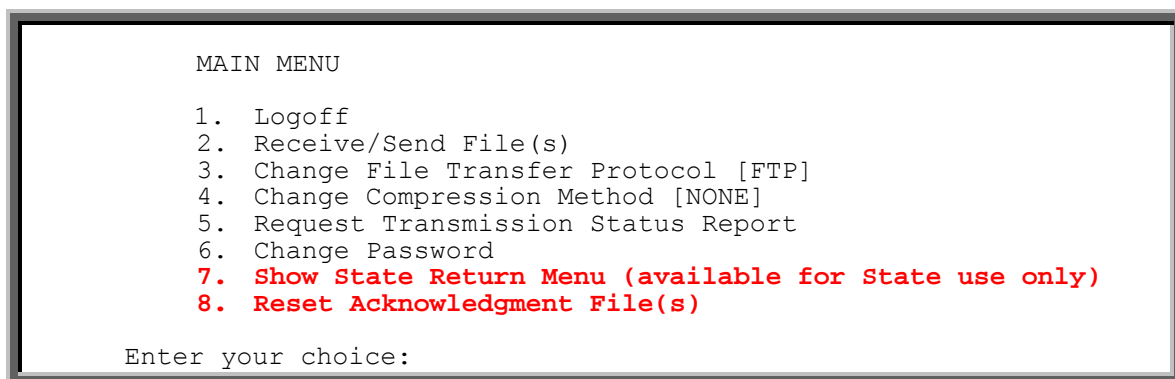

Exhibit 4-8 Redisplay of Main Menu after Protocol Change

The TP can choose any menu item to continue or choose Logoff to end the session.

b. Changing the Compression Method

To change the compression method, the TP chooses "Change Compression Method" from the Main Menu as shown in Exhibit 4-9.

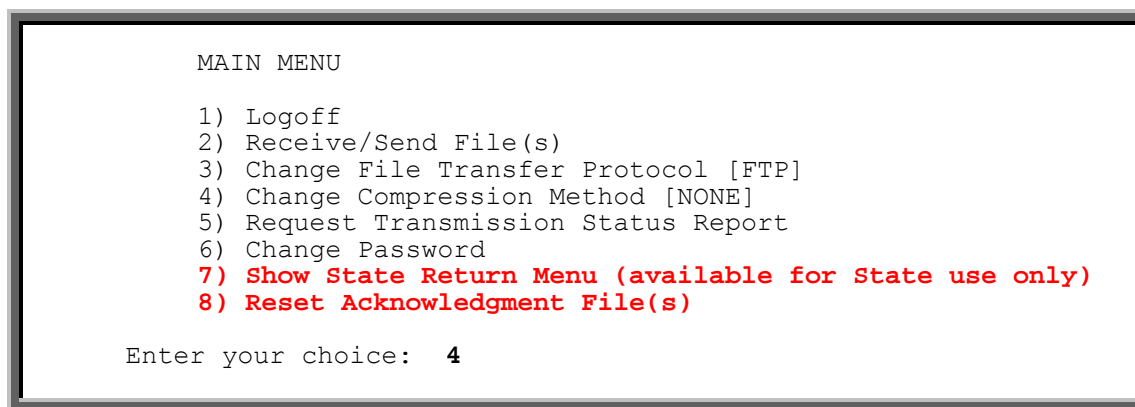

Exhibit 4-9 Choosing Change Compression Method

Note: The two supported compression methods are gzip (a freeware program available at www.gzip.org) and compress (a Unix compression utility). If the TP chooses 3) GZIP or 4) COMPRESS and sends a file that was compressed using PKZIP file format 2.04g, EMS is able to decompress the file. EMS Ack files that are returned to the TPs are named based on the compression method chosen. For example, a TP sends in a file named abc.zip compressed with PKZIP 9 and chooses option 3) GZIP. The Ack file returned will have the extension beginning with .GZ. See Exhibit A-1 in Appendix A for the complete list of possible Ack file names. PKZIP and WINZIP will then decompress these files successfully. PKZIP 9 and WINZIP 9 were both successfully tested with EMS. EMS does not support the use of PKZIP's new encryption capabilities because of the "key management" issue.

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

The TP can now choose any menu item to continue or choose Logoff to end the session.

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

11. RECEIVING ACKNOWLEDGMENTS

From the Main Menu, the TP receives acknowledgment files and/or transmits a file by choosing "Receive/Send File(s)." This section discusses receiving acknowledgment files, and Section 1-Data Communication .01.12. discusses sending files to the EMS System.

MAIN MENU

- 1) Logoff
- 2) Receive/Send File(s)
- 3) Change File Transfer Protocol [FTP]
- 4) Change Compression Method [GZIP]
- 5) Request Transmission Status Report
- 6) Change Password
- 7) Show State Return Menu (available for State use only)
- 8) Reset Acknowledgment File(s)

Enter your choice: 2

Exhibit 5-1 Choosing Receive/Send File(s)

When the TP chooses the "Receive/Send File(s)" menu item, the EMS TP Interface software checks to see if there are acknowledgment files to be sent to the TP. If there are no acknowledgment files, the message in Exhibit 5-2 is displayed and processing continues as discussed in Section 1-Data Communication .01.12. This allows TPs to submit files even if there are no acknowledgment files waiting delivery.

Number of Acknowledgment File(s) in outbound mailbox: 000

Exhibit 5-2 Zero Acknowledgment File Display

If there are acknowledgment files, the text shown in Exhibit 5-3 is displayed. The message shows the number of acknowledgment files waiting delivery to the TP. All acknowledgment files waiting delivery to the TP are delivered before the TP can submit a file. The count of acknowledgment files is updated every time the TP selects item 2) Receive/Send File(s), from the Main Menu. Additional acknowledgment files that were generated during the session are reflected in this count.

Number of Acknowledgment File(s) in outbound mailbox: 003

Are you ready to receive files? Y/[N]: Y or y

Exhibit 5-3 One or More Acknowledgment Files Display

If the TP enters anything other than "Y" or "y," the Main Menu as shown in Exhibit 5-1 is redisplayed. If the TP fails to respond affirmatively three consecutive times he/she is disconnected.

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

If the TP responds to the prompt affirmatively, a message notifying the TP that the file transfer is about to begin is displayed. The message depends on the protocol being used. For Zmodem, Xmodem or Ymodem, the message in Exhibit 5-4 is displayed. For FTP, the message shown in Exhibit 5-5 is displayed. The file transfer begins after the appropriate notice.

EFS ready for modem download.

Exhibit 5-4 Modem Download Notice

Putting File(s) by FTP.

Exhibit 5-5 FTP "Putting Files" Notice

All acknowledgment files are sent as separate files. If the TP is also using compression, each file is separately compressed. (See Appendix A for a description of acknowledgment file names).

If the TP interface software detects that the transmission did not complete successfully, the message in Exhibit 5-6 is displayed followed by the Main Menu (Exhibit 5-1). If this happens three times in a row, the TP will be disconnected.

Error transmitting Acknowledgement File(s).

Exhibit 5-6 Acknowledgment File Transmission Error Message

If the TP interface software does not detect an error, the message shown in **Exhibit 5-7** is displayed.

Acknowledgement File(s) transmission complete.

Exhibit 5-7 Acknowledgement File Transmission Complete Message

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

a. Suspended Transmitter Message

Next, the TP is asked if he/she wants to send a file. Section 6 discusses sending files. After the receive acknowledgment process has completed, if the TP has been suspended, he/she is not allowed to transmit new files. Instead, the message "SUSPENDED TRANSMITTER/ETIN" is displayed, and the TP is disconnected from EMS (Exhibit 5-8).

SUSPENDED TRANSMITTER/ETIN.
Disconnecting from EFS.

Exhibit 5-8 Suspended TP Message

A suspended transmitter is allowed to log on to the EMS to continue to receive Acknowledgements but not allowed to transmit. Suspension occurs for the following reasons:

- Submission of a file with a virus (refer to Appendix B)
- Submission of a file with an XML threat (refer to Appendix B)
- Suspension by tax examiner for procedural reasons

Should this occur, the TP must contact the **IRS** e-Help Desk to **request removal** of the suspended status.

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

12. SENDING FILES

This section describes the process of transmitting files to EMS. It details the messages and prompts for TPs registered as transmitters.

After the receive acknowledgement process has completed, or if there are no acknowledgment files to receive, the TP is asked if he/she wants to send a file as shown in Exhibit 6-1.

a. Starting the Send Process

After the receive acknowledgements process has completed, or if there are no acknowledgment files to receive, the TP is asked if he/she wants to send a file as shown in Exhibit 6-1.

```
Do you want to send a file? Y/[N]: Y or y
```

Exhibit 6-1 Send Tax Return File Prompt

If the TP enters anything other than "Y" or "y," the Main Menu as shown in Exhibit 5-1 is redisplayed. If there are no acknowledgment files for the TP to receive and the TP fails to respond affirmatively three times in a row, the TP is disconnected.

Otherwise, the next prompt depends on the file transfer protocol being used. If the TP is using Zmodem, Ymodem, or Xmodem, he/she is prompted to start the file transfer as shown in Exhibit 6-2.

```
Enter an upload command to your modem program now.
```

Exhibit 6-2 Modem Upload Prompt

If the TP is using the FTP protocol, he/she is prompted to supply a file name as shown in Exhibit 6-3. After supplying the file name the TP is notified that the FTP transfer is beginning. This notice is also shown in Exhibit 6-3.

```
Enter the LOCAL name of the file you are sending from  
your system: myfile  
  
Getting file by FTP.
```

Exhibit 6-3 FTP File Name Prompt

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

If the TP responds to the filename prompt in Exhibit 6-3 with only a carriage return (<CR>), then the notice shown in Exhibit 6-4 is displayed. If the TP responds with only a <CR> three times in a row, the TP is disconnected.

Invalid file name.

Enter the LOCAL name of the file you are sending from
your system: <CR>

Exhibit 6-4 Invalid File Name Message

Once the TP has been notified that the file transfer is beginning (Exhibit 6-2 or 6-3), the TP has 60 seconds to begin his/her file transfer. If the EMS does not receive at least part of the TP's file within 60 seconds, the TP is disconnected.

If the TP Interface software detects that the transmission did not complete successfully, the message in Exhibit 6-5 is displayed followed by the Main Menu. If this happens three consecutive times, the TP is disconnected.

Error receiving file. You must send it again.

Exhibit 6-5 Transmission Receipt Error Message

If the TP Interface software does not detect an error, the prompts displayed vary depending on how the TP is registered and how the TP is sending the file (as either transmitter or reporting agent). These prompts are described in the sections below. See Section 1-Data Communication .01.12 for a description of TP registration types.

b. Sending as Transmitter

If the TP Interface software does not detect an error, the transmission confirmation message shown in Exhibit 6-6 is displayed followed by the Main Menu (Exhibit 6-7). If the TP hangs up without receiving the confirmation message, there is no guarantee that the EMS will process the file(s).

The transmission confirmation message contains the Global Transaction Key (GTX Key) and the **ACK File Reference Name**. The GTX Key is the unique identifier assigned by the EMS to the file sent by the TP, and is used to track the processing of the file and its subsequent acknowledgment. The **ACK File Reference Name** is used when constructing the name of the acknowledgment file delivered to the TP. (See Appendix A for a description of the GTX Key and its relationship to the **ACK File Reference Name**.)

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

```
Transmission file has been received with the following
GTX Key:
                S20041020123423.1700                10200001
```

Exhibit 6-6 Transmission Confirmation Message Display

The Main Menu is displayed again as shown in Exhibit 6-7. The TP can choose any menu item to continue or Logoff to end the session.

```
MAIN MENU

1) Logoff
2) Receive/Send File(s)
3) Change File Transfer Protocol [FTP]
4) Change Compression Method [GZIP]

13. REQUEST TRANSMISSION STATUS REPORT

A Transmission Status Report may be requested from the Main Menu shown in Exhibit 7-1. Examples of Transmission Status Reports are contained in Appendix D. A transmission status report will show the status of all transmissions submitted by the TP since 12:00 a.m. five days ago. For State TPs the report also shows the status of all state acknowledgments that have been received and redirected to other TPs since 12:00 a.m. five days ago. Only one report may be requested per TP session. The report is returned to the TP in an **Hypertext Markup Language (HTML)** format file that is suitable for **offline** viewing with a Web browser **(or other product which recognizes HTML format).**

```
MAIN MENU

1) Logoff
2) Receive/Send File(s)
3) Change File Transfer Protocol [FTP]
4) Change Compression Method [GZIP]
5) Request Transmission Status Report
6) Change Password
7) Show State Return Menu (available for State use only)
8) Reset Acknowledgment File(s)

Enter your choice: 5
```

Exhibit 7-1 Choosing Request Transmission Status Report

When the TP chooses the "Request Transmission Status Report" menu item, a message notifying the TP that the report transfer is about to begin is displayed. The message depends on the protocol being used. For Zmodem, Xmodem, or Ymodem, the message in Exhibit 7-2 is displayed. For FTP, the message shown in Exhibit 7-3 is displayed. The file transfer will begin after the appropriate message.

```
EFS ready for Report download.
```

Exhibit 7-2 Modem Download Message

```
Putting Report by FTP.
```

Exhibit 7-3 FTP "Putting Report File" Message

If the TP has selected compression, the report is compressed. (See Appendix D for a description of Transmission Status Report file names.)

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

If the TP Interface software detects that the transmission did not complete successfully, the message in Exhibit 7-4 is displayed followed by the Main Menu. If this happens three times in a row, the TP is disconnected.

Error transmitting Report File.

Exhibit 7-4 Report File Transmission Error Message

If the TP Interface software does not detect an error, the message shown in Exhibit 7-5 is displayed.

Report File transmission complete.

Exhibit 7-5 Report File Transmission Complete Message

After the file transfer has completed, the Main Menu is redisplayed.

TPs can make only one report request per session. If the TP tries to request a report again, the message shown in Exhibit 7-6 is displayed followed by the Main Menu. If this happens three times in a session, the TP is disconnected.

Only one Report request allowed.

Exhibit 7-6 Report Request Error

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

14. CHANGING PASSWORD

TPs are responsible for maintaining their passwords. When a TP changes his/her password at one EMS processing center, it will be propagated to the other EMS processing center. Therefore, a TP should only execute the change password procedures once per new password.

To change his/her password, the TP chooses "Change Password" as shown in Exhibit 8-1.

MAIN MENU

- 1) Logoff
- 2) Receive/Send File(s)
- 3) Change File Transfer Protocol [ZMODEM]
- 4) Change Compression Method [NONE]
- 5) Request Transmission Status Report
- 6) Change Password
- 7) Show State Return Menu (available for State use only)
- 8) Reset Acknowledgment File(s)

Enter your choice: 6

Exhibit 8-1 Choosing "Change Password"

The TP is then prompted to enter his/her current password and to enter his/her new password twice as shown in Exhibit 8-2. Not only will the passwords not be displayed, but also there will be no indication of how many characters the TP has typed. The new password must meet the rules described in Appendix G.

Enter current password:
Enter new password:
Re-enter new password:

Exhibit 8-2 Current and New Password Prompts

If the TP's responses meet the rules for changing the password, the password is changed and the message shown in Exhibit 8-3 is displayed. The TP will now use the new password to log into any EMS processing center. The Main Menu is then redisplayed as shown in Exhibit 8-4.

Password changed.

Exhibit 8-3 Password Change Confirmation

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

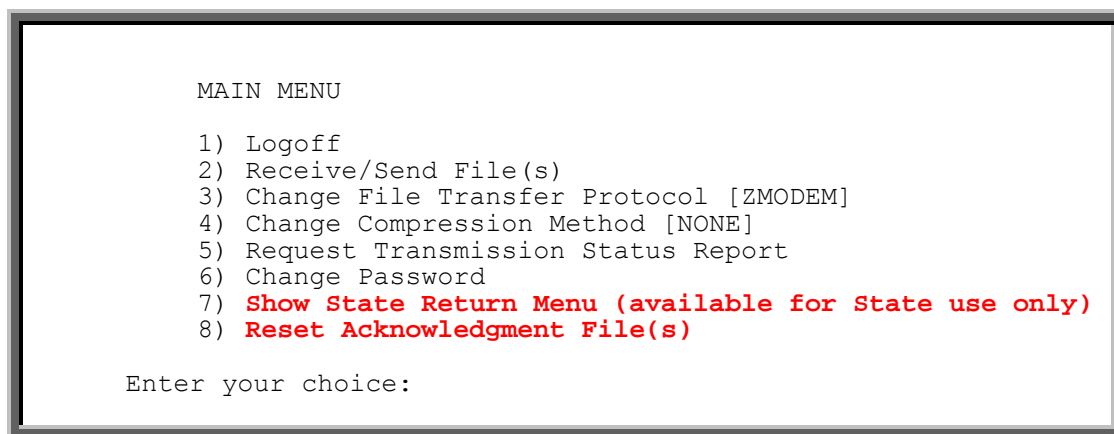

Exhibit 8-4 Redisplay of Main Menu

If the TP's responses to the password prompts do not meet the rules for changing the password, then an error message is displayed. A TP is given at most three tries per session to change his/her password.

If the TP incorrectly enters his/her current password, the password is not changed and the message shown in Exhibit 8-5 is displayed. If the TP has unsuccessfully attempted to change his/her password less than three times, he/she is prompted for his/her current and new passwords as previously shown in Exhibit 8-2. If this is the third unsuccessful attempt, then the Main Menu is redisplayed as previously shown in Exhibit 8-4.

Exhibit 8-5 Incorrect Current Password Message

If the TP does not enter the same password in response to the "Enter new password" and "Re-enter new password" prompts, then the password is not changed and the message shown in Exhibit 8-6 is displayed. If the TP has unsuccessfully attempted to change his/her password less than three times, he/she is prompted for his/her current and new passwords as previously shown in Exhibit 8-2. If this is the third unsuccessful attempt, then the Main Menu is redisplayed as previously shown in Exhibit 8-4.

Exhibit 8-6 Unmatched New Passwords Message

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

If the TP enters a new password that does not meet the rules identified in Appendix G, then the password is not changed and the message shown in Exhibit 8-7 is displayed. If the TP has unsuccessfully attempted to change his/her password less than three times, he/she is prompted for his/her current and new passwords as previously shown in Exhibit 8-2. If this is the third unsuccessful attempt, then the Main Menu is redisplayed as shown in Exhibit 8-4.

Password rule(s) have not been met.

Exhibit 8-7 Password Rule Violation Message

If it has been less than seven days since the last time the TP changed his/her password, then the password is not changed and the message shown in Exhibit 8-8 is displayed. The TP is then returned to the Main Menu as previously shown in Exhibit 8-4. If it has been less than seven days and the TP needs to change his/her password, he/she should contact **the IRS** e-Help Desk.

Less than 7 days from last change. Password not changed.

Exhibit 8-8 Less Than 7 Days Message

If the TP has concurrent sessions, only one can change the password. If the TP attempts to change his/her password in more than one session, only one will be allowed and the message shown in Exhibit 8-9 is displayed to the other session(s). After this message is displayed, the TP is returned to the Main Menu as previously shown in Exhibit 8-4.

Password not changed. Another session is trying to change the password.

Exhibit 8-9 Another Session Changing Password Message

If a system error occurs during the change password operation, the password may or may not be changed. The messages shown in Exhibit 8-10 are displayed and the TP's session is terminated. The TP may need to try both his/her current and new passwords on his/her next login.

System error.
DISCONNECTING FROM EFS.

Exhibit 8-10 System Error and Disconnecting Message

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

The TP can only choose the "Change Password" menu item once during a session. If the TP chooses the "Change Password" menu item more than once, the message shown in Exhibit 8-11 is displayed immediately. If this happens three times in a session, the TP is disconnected; otherwise the Main Menu is redisplayed as previously shown in Exhibit 8-4.

Note: **The TP** will not go through the password prompts for this scenario.

Can only choose Change Password once.

Exhibit 8-11 Change Password Once Message

Except in the case of a system error the Main Menu is displayed as previously shown in Exhibit 8-4 after the TP completes the change password process whether or not he/she was successful.

15. EXECUTING THE STATE RETURN MENU

When the trading partner is a State TP that can retrieve state return data, the Main Menu includes an additional option, "Show State Return Menu." The State TP chooses "Show State Return Menu" (**available for State use only**) to retrieve state return data, reset state return files, or to generate a **"State Files to Download Report"**.

MAIN MENU

- 1) Logoff
- 2) Receive/Send File(s)
- 3) Change File Transfer Protocol [ZMODEM]
- 4) Change Compression Method [NONE]
- 5) Request Transmission Status Report
- 6) Change Password
- 7) Show State Return Menu (**available for State use only**)
- 8) **Reset Acknowledgment File(s)**

Enter your choice:

d. Requesting a State Files to Download Report

Previously this report was automatically displayed during the state data retrieval session. When the State TP chooses "Request State Files to Download Report" from the State Return Menu and no state files are available to send to the State TP, the message shown in Exhibit 9-14 is displayed followed by the State Return Menu. If this happens three times in a row, the State TP is disconnected.

No State Files to download. No Report is available.

16. RESETTING ACKNOWLEDGMENT FILE(S)

This section describes how the TP can reset positive or negative acknowledgments using either a GTX Key or an ACK File Reference Name. After resetting the acknowledgment file(s), the TP can receive the acknowledgment file(s) by choosing "Receive/Send File(s)" as described in Section 5. To reset acknowledgment file(s), the TP chooses "Reset Acknowledgment File(s)" as shown in Exhibit 10-1.

MAIN MENU

- 1) Logoff
- 2) Receive/Send File(s)
- 3) Change File Transfer Protocol [ZMODEM]
- 4) Change Compression Method [NONE]
- 5) Request Transmission Status Report
- 6) Change Password
- 7) Show State Return Menu (available for State use only)
- 8) Reset Acknowledgment File(s)

Enter your choice: 8

Exhibit 10-1 Choosing "Reset Acknowledgment File(s)"

When the TP chooses the "Reset Acknowledgment File(s)" menu item from the Main Menu, the Reset Acknowledgment File(s) Menu shown in Exhibit 10-2 is displayed.

RESET ACKNOWLEDGMENT FILE(S) MENU

- 1) Return to MAIN MENU
- 2) GTXKEY
- 3) ACK File Reference Name

Enter your choice:

Exhibit 10-2 Reset Acknowledgment File(s) Menu

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

The TP can choose to reset an acknowledgment file by GTX Key or ACK File Reference Name regardless of the submission file format type. If the TP enters a character that is not one of the listed number choices, then the invalid menu selection message, along with the Reset Acknowledgment File(s) Menu, is displayed as shown in Exhibit 10-3. If the TP fails to make a valid selection in three attempts, the TP is disconnected.

```
Invalid menu selection.  Try again.

      RESET ACKNOWLEDGMENT FILE(S) MENU

      1) Return to MAIN MENU
      2) GTXKEY
      3) ACK File Reference Name

Enter your choice:
```

Exhibit 10-3 Invalid Menu Selection Message

When the TP chooses "GTXKEY" from the Reset Acknowledgment File(s) Menu, the TP is asked to identify the acknowledgment file by entering the GTXKEY as shown in Exhibit 10-4.

```
Enter GTXKEY (SYYYMMDDhhmmss.nnnn)
or press Enter to return to RESET ACK MENU:
```

Exhibit 10-4 Prompt for GTXKEY

When the TP chooses "ACK File Reference Name" from the Reset Acknowledgment File(s) Menu, the TP is asked to identify the acknowledgment file by entering the ACK File Reference Name as shown in Exhibit 10-5.

```
Enter ACK File Reference Name(MMDDnnnn)
or press Enter to return to RESET ACK MENU:
```

Exhibit 10-5 Prompt for ACK File Reference Name

If the TP does not supply any data and just presses Enter to either of the above two prompts, then the Reset Acknowledgment File(s) Menu is redisplayed. If the TP supplies the ACK identification data and the data is not in the correct format for the selected criteria, the message as shown in Exhibit 10-6 along with the Reset Acknowledgment File(s) Menu is displayed. The screen is not cleared before displaying the error message and the menu, so the TP will be able to see what he/she entered.

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

```
          ACK identification data not in correct format.

          RESET ACKNOWLEDGMENT FILE(S) MENU

          1) Return to MAIN MENU
          2) GTXKEY
          3) ACK File Reference Name

          Enter your choice:
```

Exhibit 10-6 Incorrect Format Message

If the ACK identification data (GTXKEY or ACK File Reference Name) is correctly formatted but no information can be found, then the message as shown in Exhibit 10-7 along with the Reset Acknowledgment File(s) Menu is displayed. The screen is not cleared before displaying the error message and the menu, so the TP will be able to see what he/she entered.

```
          Requested ACK not found.
          Please contact the IRS e-Help Desk for assistance.

          RESET ACKNOWLEDGMENT FILE(S) MENU

          1) Return to MAIN MENU
          2) GTXKEY
          3) ACK File Reference Name

          Enter your choice:
```

Exhibit 10-7 Requested ACK Not Found Message

If the TP enters a valid GTXKEY or ACK File Reference Name, the acknowledgment is reset and the message as shown in Exhibit 10-8 along with the Reset Acknowledgment File(s) Menu is displayed. The screen is not cleared before displaying the message and the menu, so the TP will be able to see what he/she entered.

```
          Acknowledgment successfully reset.

          RESET ACKNOWLEDGMENT FILE(S) MENU

          1) Return to MAIN MENU
          2) GTXKEY
          3) ACK File Reference Name

          Enter your choice:
```

Exhibit 10-8 ACK Successfully Reset Message

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

If the TP enters a GTXKEY or ACK File Reference Name for a file that is not processed, the message as shown in Exhibit 10-9 along with the Reset Acknowledgment File(s) Menu is displayed. The screen is not cleared before displaying the error message and the menu, so the TP will be able to see what he/she entered.

Cannot reset Acknowledgment; file has not been processed yet.

RESET ACKNOWLEDGMENT FILE(S) MENU

- 1) Return to MAIN MENU
- 2) GTXKEY
- 3) ACK File Reference Name

Enter your choice:

Exhibit 10-9 File Not Yet Processed Message

If a TP requests to reset an acknowledgment using the ACK File Reference Name and multiple records are found (this might occur during a disaster recovery situation), then the Acknowledgment is not reset and the message as shown in Exhibit 10-10 along with the Reset Acknowledgment File(s) menu is displayed. The screen is not cleared before displaying the error message and the menu, so the TP will be able to see what he/she entered.

Cannot reset Acknowledgment; more than 1 Acknowledgment qualifies; use GTXKEY.

RESET ACKNOWLEDGMENT FILE(S) MENU

- 1) Return to MAIN MENU
- 2) GTXKEY
- 3) ACK File Reference Name

Enter your choice:

Exhibit 10-10 Use GTXKEY Message

If the TP in three attempts fails to reset the acknowledgment by entering incorrectly formatted ACK identification data, pressing Enter without any ACK identification data, entering ACK identification data that is not found, incorrectly formatted, or cannot be reset, the TP is disconnected. If the TP chooses the Reset Acknowledgment File(s) option from the Main Menu and then immediately chooses to return to the Main Menu three times, the TP is disconnected.

SECTION 1 - DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS) continued

The TP can reset up to ten acknowledgments in a session. If the TP attempts to reset an eleventh acknowledgment, the message as shown in Exhibit 10-11 along with the MAIN Menu is displayed. If the TP attempts to reset an eleventh acknowledgment three times, the TP is disconnected.

Only ten Acknowledgments can be reset in one session.

MAIN MENU

- 1) Logoff
- 2) Receive/Send File(s)
- 3) Change File Transfer Protocol [ZMODEM]
- 4) Change Compression Method [NONE]
- 5) Request Transmission Status Report
- 6) Change Password
- 7) Show State Return Menu (available for State use only)
- 8) Reset Acknowledgment File(s)

Enter your choice:

Exhibit 10-11 Ten ACK File Limit Message

17. LOGGING OFF THE SYSTEM

To end his/her session, TP chooses "Logoff" from the Main Menu Exhibit 11-1.

MAIN MENU

- 1) Logoff
- 2) Receive/Send File(s)
- 3) Change File Transfer Protocol [FTP]
- 4) Change Compression Method [GZIP]
- 5) Request Transmission Status Report
- 6) Change Password
- 7) Show State Return Menu (available for State use only)
- 8) Reset Acknowledgment File(s)

Enter your choice: 1

Exhibit 11-1 Choosing Logoff

The TP Interface software performs any necessary cleanup activities, records statistical information, and then displays the message shown in Exhibit 11-2. The TP should not hang up before receiving the disconnect message. If he/she does hang up prematurely, EMS may not complete its cleanup activities. This could result in the TP receiving his/her acknowledgment files again in the next login session or having the submission file discarded.

DISCONNECTING FROM EFS.

Exhibit 11-2 End of TP Session Message

APPENDIX A

GTX Key and Acknowledgment File Name Formats

Intentional Blank Page

APPENDIX A

GTX KEY AND ACKNOWLEDGMENT FILE NAME FORMATS

The format of the GTX key is SYYYYMMDDhhmmss.xxxx where S is the processing site identifier, YYYY=year, MM=month, DD=day, hh=hour, mm=minutes, ss=seconds, and xxxx=milliseconds. The site identifier is 'T' for transmissions processed in ECC-MEM (Memphis) and 'U' for transmissions processed in ECC-MTB (Martinsburg).

The format of the **ACK File Reference Name** is MMDDnnnn where MM month and DD day match the GTX Key. The nnnn number is a 4-digit sequence number generated by the EMS. The **ACK File Reference Name** is used to generate the acknowledgment file name.

The acknowledgment file can be positive or negative. If the acknowledgment filename ends with ".NAK", then the EMS detected an error in the file submitted by the TP and processing of the file was discontinued.

The EMS acknowledgment files will be named as described in Exhibit A-1.

| Form and Format | ACK File Name (Note 1) | ACK File Name w/ Gzip (Note 2) | ACK File Name w/ Compress (Note 3) |
|--|---------------------------|-----------------------------------|---------------------------------------|
| 94X - XML | | | |
| EMS Error Acknowledgment | MMDDnnnn.NAK | MMDDnnnn.GZ | MMDDnnnn.Z |
| 94X XML System Acknowledgment | MMDDnnnn.ACK | MMDDnnnn.GZ | MMDDnnnn.Z |
| 1065 , 112x and 99x Families (XML) | | | |
| EMS Error Acknowledgment | MMDDnnnn.NAK | MMDDnnnn.GZ | MMDDnnnn.Z |
| MeF Acknowledgment | MMDDnnnn.ACK | MMDDnnnn.GZ | MMDDnnnn.Z |
| 1040/1041/ETD Proprietary (TRANA/TRANB/RECAP) | | | |
| EMS Error Acknowledgment | MMDDnnnn.NAK | MMDDnnnn.GZ | MMDDnnnn.Z |
| Unisys Acknowledgment | MMDDnnnn.ACK | MMDDnnnn.GZ | MMDDnnnn.Z |
| XML PIN Registration | | | |
| EMS Communications Error Acknowledgment | MMDDnnnn.NAK | MMDDnnnn.GZ | MMDDnnnn.Z |
| EMS PIN Registration Acknowledgment | MMDDnnnn.ACK | MMDDnnnn.GZ | MMDDnnnn.Z |
| State ACK Transmission | | | |
| EMS Error Acknowledgment | MMDDnnnn.NAK | MMDDnnnn.GZ | MMDDnnnn.Z |
| EMS Acceptance Acknowledgment | MMDDnnnn.ACK | MMDDnnnn.GZ | MMDDnnnn.Z |
| State ACK for Trading Partner | MMDDnnnn.Sss (Note 4) | MMDDnnnn.GZ | MMDDnnnn.Z |

Exhibit A-1 Ack File Names

APPENDIX A

GTX Key and Acknowledgment File Name Formats continued

Note 1: MM = month
DD = day
nnnn = 4 digit sequence number

MMDD is taken from the GTX Key
nnnn is a 4-digit sequence number generated by the EMS at
the time the TP submitted his/her file.

Note 2: GZIP preserves the uncompressed ACK file name (e.g., MMDDnnnn.ACK)
in its archive.

Note 3: Compress does not preserve the uncompressed ACK file name.

If a TP submits a file that is given the GTX Key "S20041020154710.0800,"
the first four digits of the reference name would be "1020." The next
four digits would be a sequence number generated by the EMS, e.g., "0001."
The reference name would then be "10200001." An EMS error acknowledgment
file would be named "10200001.NAK." An acknowledgment from the Unisys
system would be named "10200001.ACK." If the acknowledgment file is
compressed with gzip it will be named "10200001.GZ." If the
acknowledgment file is compressed with Unix compress it will be named
"10200001.Z."

Note 4: For State Ack files that are redirected to a TP ETIN, the ack file
will have the file extension "Sss" where "ss" is the standard postal
abbreviation published in IRS Publication 1346 "Standard Postal
Service State Abbreviations and Zip Codes." For example, the file
extension "SMD" will be used for an ack file from the state of
Maryland. If the state ack file contains a code that does not appear
in Pub 1346, then "ss" will be replaced with "XX". In this case, the
file extension would be "SXX".

Note 5: The acknowledgment file names shown in this appendix use upper case
letters. These are the names as they appear on EMS. Some file transfer
protocols and/or some operating systems may translate the names into
lowercase.

APPENDIX B

XML Error Acknowledgment Format

Intentional Blank Page

APPENDIX B

XML ERROR ACKNOWLEDGMENT FORMAT FOR DETECTED VIRUSES

EMS checks all incoming files for viruses. If a virus is detected, EMS returns an error acknowledgment to the TP in XML format. If EMS detects a virus, the TP is placed in suspended status. Should this occur, the TP must contact the **IRS e-Help Desk** to request removal of the suspended status.

Below is the format for the error acknowledgment that is returned to the TP when a virus is detected in the transmission. All TPs receive the XML format acknowledgment, even if the transmission was sent using a different IRS approved format. Note that the second line of the file, the Content-Description contains a plain English description of the problem; therefore, an understanding of XML is not required to interpret the message. The shaded areas contain the GTX key, a timestamp, and the virus name. These values vary for each returned acknowledgment. The remainder of the message is constant.

```

APPENDIX B

ERROR ACKNOWLEDGMENT FORMAT FOR DECOMPRESSION FAILURES

If the TP has established a profile that uses one of the supported compression methods, then EMS will decompress the file before processing it. If there is a problem and the file fails to decompress, then the TP will receive the error acknowledgment shown below. All TPs receive the XML format acknowledgment, even if the transmission was sent using a different IRS approved format. Note that the second line of the file, the Content-Description contains a plain English description of the problem; therefore, an understanding of XML is not required to interpret the message. The shaded areas contain the GTX key and a timestamp. These values vary for each returned acknowledgment. The remainder of the message is constant.

MIME-Version: 1.0

Content-Description: Notification that transmission file T200303211345.0100 was rejected because it failed to decompress

Content-Type: text/xml; charset=UTF-8

APPENDIX C

EMS COMMUNICATIONS AND ENCRYPTION

EMS can accept tax returns and tax documents via a non-Web-based Internet solution or via dedicated leased lines as described below. Since December 2005, IRS-provided analog and ISDN lines were removed. However, it may be possible for a TP to use ISDN if he/she provides his/her own equipment.

C.1 Internet Service

To use the Internet service, a TP accesses EMS via his/her own Internet Service Provider (ISP) and does not need to have a static IP address. However, the TP must use Secure Socket Layer (SSL) with Telnet/S layered on top of it. His/her Telnet/SSL software must conform to:

RFC 854 - Telnet Protocol Specification
SSL 3.0 Specification (<http://wp.netscape.com/eng/ssl3>)

The TP can use one of the following encryption standards, listed in order of priority, using SSL and Telnet/S:

AES 128-bit (FIPS-197)
TDES 168-bit (FIPS-197)
RC4 128-bit

When the TP connects over the Internet, the IRS system will automatically negotiate the encryption standard so that the highest prioritized standard that is available is used.

The Telnet/SSL traffic must be transmitted to EMS on **Transmission Control Protocol (TCP)** Port 992. The TP may need to configure his/her firewall(s) to allow this traffic to pass through. This has been the most common cause of failure to connect to EMS through the Internet. **For security reasons**, most businesses routinely block traffic on ports not commonly used for security reasons. The TP connects to EMS using one of the following fully qualified Domain Name Service (DNS) names.

efileA.ems.irs.gov - Martinsburg Computing Center
efileB.ems.irs.gov - Memphis Computing Center
efileC.ems.irs.gov - Memphis Computing Center

The EMS URL Chart with specific returns and dates, and the processing schedules for draining the test and production transmissions for processing are found on www.irs.gov.

If the TP's software allows him/her to establish concurrent sessions to the same computing center, the TP may submit files over multiple concurrent sessions. However, only one session can retrieve acknowledgment files. TPs should note that FTP is not available as a file transfer protocol when using the Internet service.

APPENDIX C

EMS Communications and Encryption continued

Configuring Terminal Emulation Software

A TP may need to provide the following information when he/she is configuring their terminal emulation software.

- **Terminal Name.** Should be something meaningful to the TP. This information is not transmitted to EMS.
- **Terminal Type.** Select a member of the Virtual Terminal (VT) family (e.g., VT100 or VT220).
- **SSL Version.** SSL3. In many terminal emulation packages this is a pull-down menu beside the Destination or Host Name and is not labeled. TLS-1 defaults since it is the latest SSL version but SSL-3 must be chosen.
- **Port 992.** This port number is often filled in automatically by the terminal emulation software if Telnet/SSL is chosen.
- **Destination or Host Name.** One of the fully qualified names listed previously.
- **Destination Host Type.** Unix.
- **User Certificate Mode.** No user certificate is required. However, EMS accepts any certificate from the TP. If the TP wants to send a certificate it can be self-generated.
- **Host Certificate.** EMS sends an Entrust certificate, which the terminal emulation software must accept.
- **Certificate Viewing.** If the TP wants to see the certificates being exchanged and the terminal emulation software supports certificate viewing, then this feature should be turned on.
- **Operating System (OS).** If your terminal emulation software asks for an OS, it is asking about the Trading Partner's system, not the EMS system. Enter the local system parameters upon which the terminal emulation software will be running.
- **Data Characters.** Please specify eight bit data characters if your terminal emulation software does not default to it.

The IRS has tested several terminal emulation software packages supporting Telnet-SSL including PowerTerm Pro Enterprise for Unix Version 8.8.3, Hummingbird Exceed, and Attachmate. Many other commercial and open-source packages can also be used as long as they support the Telnet specification RFC 854 and the SSL 3.0 specification. If a TP cannot successfully connect using **his/her** internally developed package, **it is recommended that the TP try** using one of the above packages, which can often be evaluated free, to verify the connectivity parameters outlined above. **Additional guidance is given in C.3 and C.4**

APPENDIX C

EMS Communications and Encryption continued

C.2 Dedicated/Leased Line Service

Use of dedicated/leased line services requires authorization from the IRS. Please contact Darryl Giles at (202) 283-5193, e-mail darryl.s.giles@irs.gov.

All dedicated lines must be encrypted using at least 128-bit encryption provided by a Federal Information Processing Standards (FIPS) approved method. A TP, using the dedicated/leased line service, is responsible for choosing, procuring, and installing his/her cryptographic solution. To determine if a cryptographic solution meets FIPS standards obtain the "NIST Validation List Certification Number and Date" from the solution provider. This information can be verified by checking the **National Institute of Standards and Technology (NIST)** website at <http://csrc.nist.gov/cryptval/>. There are validation lists for each major FIPS Cryptographic Standard. Each list has a sequence number, and lists the manufacturer/supplier, date of validation, name of the implementation, its operational environment, and a further description of other characteristics. **Dedicated/leased line filers must be FIPS 140-x compliant and must send to the IRS annually a NIST certificate for the device they use, which would use Advanced Encryption Standard (AES) or Triple Data Encryption Standard (TDES).**

The IRS recommends the use of Internet Protocol Security (IPsec) as the cryptographic solution for the dedicated/leased line service.

The following paragraphs describe the hardware and software necessary to use the digital communication service.

C.2.1 Dedicated/Leased Lines

For a TP to connect over a dedicated line he/she must purchase the circuit. Once the TP's request for **dedicated/leased line** service is approved, the IRS provides him/her with IP addressing and routing information.

C.2.2 Communication Services

Connection to the EMS system using the digital communications services provides the TP with a Transmission Control Protocol/Internet Protocol (TCP/IP) interface. To use this service the TP must have the following:

- A system that supports the TCP/IP protocols.
- The ability to make a Telnet connection from his/her system to an EMS host.
- If the TP plans on using Secure File Transfer Protocol (FTP) for data transfer, his/her system must support an FTP server and have the ability to accept an FTP connection from the EMS. The TP must supply a user logon and password for the EMS system to use when connecting to his/her FTP server.
- A **pair of routers** capable of supporting **communication** over the digital circuit **procured by the TP**.

APPENDIX C

EMS Communications and Encryption continued

Once the TP establishes a connection using EMS **dedicated/leased line** services the following capabilities are available.

- Connecting over a TCP/IP link allows a TP to connect to any host available to him/her at the computing center.
- Backup protection. EMS systems have a fail over capability and if there is a system failure a backup system becomes available. **However, TPs may need to reconfigure their routers and their communication servers if they have not initially configured them to communicate with the backup system as well as the primary system.**
- Transfer of data using FTP. If a TP has a host system that supports FTP, he/she may use this as a protocol to send and receive files to the EMS system. For TPs using this transfer method the only configuration needed is to setup a user account for EMS to use and directories for EMS to use to "get" return files and "put" acknowledgment files. EMS transmits one file for each acknowledgment file available for processing. The file transfers are binary and the "#" hash mark is displayed for every 1,024 bytes of data transferred.
- File transfers over Telnet. If a TP uses TCP/IP to connect to the EMS system, his/her logon to the system is through Telnet. If the TP does not want to use FTP to transfer files, he/she may use another file transfer protocol such as Zmodem over the Telnet session. This capability is currently available in many of the Telnet application programs. The file transfer rate of Zmodem over a Telnet session is not as fast as FTP. See Sections C.3 and C.4 for more details.
- One final aspect of a TCP/IP connection to the EMS is that TCP/IP supports multiple simultaneous connections to the same host or multiple hosts. A TP may submit files over multiple concurrent sessions. However, only one session per host can retrieve acknowledgment files.

C.3 Telnet Options

If the TP uses Zmodem, Xmodem-1K, or Ymodem-batch to transfer files over the Telnet session, to be successful the TP's Telnet program must support connections that allow all eight bits of the data to pass through. This is often accomplished on the Telnet command line as "telnet -8 host". If the TP uses the "telnet -8" method, the screen display may appear distorted and after typing in the TP identification information the systems appears to be hung. If this occurs the TP should terminate his/her responses with a Line-Feed Character. On a standard keyboard, **pressing** the Control Key and the "j" generates this character. As an alternative to the "telnet -8" option, the TP may set binary mode before beginning a file transfer and unset binary mode upon completion of the transfer.

Most versions of Telnet have a sequence of characters (called an Escape Sequence) that, when encountered by the Telnet program, interrupts the Telnet session. Unless hidden by the TPs terminal emulation software, the TP normally sees a message displaying the Escape Sequence when the Telnet connection is first started. Although it is possible for the TP to have a successful session when an Escape Sequence exists, at some point a file transfer may abort based on its size or the data in the file. For this reason it is recommended that the Escape Sequence be disabled, if possible. The TP should check his/her Telnet documentation to determine how to do this.

APPENDIX C

EMS Communications and Encryption continued

C.4 Zmodem Options

The most common file transfer software used over the Telnet Session is Zmodem. The package consists of the "sz" command for sending files and the "rz" command for receiving files. As with the Telnet session options described in Section C.3, there are options that may need to be invoked to achieve a successful file transfer. **In addition**, it is important to note that these options are not necessarily mutually exclusive from the Telnet options. It may be that having a specific Zmodem option set might mean that a Telnet option does not need to be invoked. It is recommended that TPs explore the Zmodem options first. These options are available if the TP is experiencing problems:

- **Zmodem Escape Control Characters.** This option, usually "-e", will have Zmodem watch for control characters and modify them so that they pass through undetected as control characters. The option is sometimes available on both the "sz" and "rz" commands. Other versions have the -e option available only on the "rz".
- **Zmodem Binary.** This is another option available on some versions of Zmodem. The TP should check his/her documentation for any option that attempts to make the link transparent to control character sequences.
- **Zmodem Timeout Values.** Within Zmodem there are options for how long to wait for an expected packet of data. The default is normally 10 seconds. In most cases this value should be acceptable. However, the TP should never set these values to wait forever.
- **Zmodem buffer timeout.** There may be times when the timeout values may need to be changed. This can occur with TPs, whose connection to their ISP is through a dial-up line. Because of the buffering ability of telecommunications equipment and the amount of communications equipment usually in place for an Internet connection, the amount of data that can be stored could cause an error. This can happen if a file that is to be transmitted is approximately the same size as one of the buffers present in the data link. The sending program will have completed the streaming of all the data in the file but the receiving side may not have gotten any data yet. If the sending side has its receive packet timeout set too low, it may timeout before the receiver can receive and transmit the packet.
- **Zmodem sliding window.** If this option is not enabled, the sender transmits all of a file without waiting for an acknowledgment. This results in a faster file transfer. However, some of the intermediate communications equipment may store data while it is transferred to the receiver. Sometimes this causes the sender to "get ahead" of the receiver. In this case, the TP may need to enable the sliding window option. This results in intermediate acknowledgments and a slower file transfer. The smaller the value of the sliding window setting the slower the file transfer.
- **Zmodem Debugging.** When testing the TP's Internet connectivity, the TP should become familiar with the debug capabilities of his/her Zmodem software. If the TP experiences problems with the transfer of data, generating a debug file could assist the TP and IRS system support personnel in determining the nature of the problem.
- **Crash Recovery.** EMS does not retain partial files. Therefore, if a transmission to EMS is interrupted, the TP must retransmit from the beginning of the file. For acknowledgment files and state return files, EMS can resume the transmission from where the interruption occurred in the transmission if the TP's software supports it.

Examples of Transmission Status Reports (Browser and Text Displays)

Intentional Blank Page

APPENDIX D

EXAMPLES OF TRANSMISSION STATUS REPORTS

This section shows the following examples of a Transmission Status Report:

- Exhibit D-1 Browser View of State Transmission Report (When No Data is Available)
- Exhibit D-2 Text View of State Transmission Report (When No Data is Available)
- Exhibit D-3 Browser View of State Transmission Report
- Exhibit D-4 Text View of State Transmission Report
- Exhibit D-5 Excel Spreadsheet View of State Transmission Report
- Exhibit D-6 Browser View of TP Transmission Report

The Transmission Status Report is returned to the TP within a file that is suitable for display with a Web browser. The file can also be imported into newer versions of Excel as an Excel spreadsheet. The file name is MMDDhhmm_rpt.html where MM=month, DD=day, hh=hour, and mm=minute. If the TP had previously requested Unix file compression, the file name would be MMDDhhmm_rpt.html.Z. If the TP has previously selected GZIP compression, the file name would be MMDDhhmm_rpt.html.GZ. Some file transfer protocols or operating systems may translate the "Z" or "GZ" to lowercase "z" or "gz." **" The ACK Reference File Name column on the State and TP Transmission Reports corresponds to the uncompressed ACK File Name described in Appendix A.**

TRANSMISSION STATUS DEFINITIONS

TP Transmission Status Report

Waiting TP Delivery The acknowledgment is available for the TP to pick up.
 Received by TP The acknowledgment has been received by the TP.
 In Progress EMS has received and is processing the file.

Intentional Blank Page

APPENDIX E

Guidelines for Trading Partners Using EMS

Intentional Blank Page

APPENDIX E

GUIDELINES FOR TRADING PARTNERS USING EMS

While the following information is provided primarily for those who use scripts to control interaction with EMS, it is also useful for individuals who login and conduct their sessions "manually."

1. Use **pattern matching, not timers**, to control the flow of scripts. Scripts should be able to handle all messages and prompts from EMS, not just the main "retrieve acknowledgment" and "submit a file" paths. See Appendix F for an example of a script that is entirely controlled by simple pattern-matching.
2. If it is absolutely necessary to use a timer when waiting for a message or prompt, then the timer value should not be less than 100 seconds. EMS always sends a response within 100 seconds (worst case) after the last user-interaction (EMS prompt or user response). The timer in the script should function only as a "fail-safe" device in case of unanticipated system behavior.
3. Log off using the "Logoff" menu option on the main menu, instead of simply hanging up. Do not hang up until the "DISCONNECTING FROM EFS" message has been received. This is true for both scripted and human interaction with EMS.
4. When a message is received indicating that EMS is unavailable, don't try again immediately. Wait at least 10 minutes.
5. For TPs that are registered as reporting agents, there are additional prompts to allow a transmission file to be "signed." Since TPs have one ETIN for all form types, and registration types can be added or deleted, scripts should implement responses to the additional prompts if they are displayed, but still operate properly if they are not.
6. Do not login repeatedly when there is no work to do (i.e., no files to submit or acknowledgments to pick up). In most cases, EMS provides a negative acknowledgment within 10 minutes of submission if the file is not accepted for further processing. If EMS has not provided a negative acknowledgment within 35 minutes, the file, except in rare circumstances, has been forwarded to the appropriate tax-return-processing system. For MeF and 94X files, which are forwarded immediately to the tax-return-processing system, acknowledgements are available shortly after that system has processed each file. For files that are batched and "drained" at published times, acknowledgments from the tax-return-processing system will not be available for hours.
7. If a TP has multiple concurrent sessions at the same physical site using the same ETIN, only one session will retrieve acknowledgments. Unless the other sessions are used to submit files, they will not accomplish any useful work.

Intentional Blank Page

APPENDIX F

Example Script to Pick Up Acks and Send a File

Intentional Blank Page

APPENDIX F

EXAMPLE SCRIPT TO PICK UP ACKS AND SEND A FILE

The following example is meant to illustrate how a script can communicate with EMS using only pattern-matching to control logic flow. The example is for reference only, and is not intended for actual use by trading partners.

This particular script is written in "expect", designed for a Unix operating system, and takes advantage of expect's ability to specify a set of strings and events to be watched for if there is a failure to match the string that is anticipated. It also assumes that files are to be sent and received using the FTP protocol. A script that instead used the Zmodem protocol, for example, would differ noticeably in those parts of the script that accomplish the actual sending and receiving of files.

Most "expect" commands and syntax appearing in the script are reasonably intuitive, at least for the limited purposes of illustration for which this script is intended. But it is worth mentioning that the command "send" directs output to the telnet session, while the command "send_user" directs output to "standard output", which is assumed to be directed to a local log file. Lines beginning with "#" are comments.

```
#!/opt/sfw/bin/expect -f $1 $2 $3 $4 $5 $6

#Assign command-line parameters to local variables for convenience.
set log_id [lrange $argv 0 0]
set passwd [lrange $argv 1 1]
set hostid [lrange $argv 2 2]
set retfil [lrange $argv 3 3]
set prtocl [lrange $argv 4 4]
set compid [lrange $argv 5 5]

# Slow down "typing" of replies to allow for modem turnaround delays.
set send_slow {1 .1}

# Start a C-shell in which to run telnet
spawn /usr/bin/csh

# Specify set of "secondary" strings/events to be watched for if anticipated match fails.
# These messages and events could occur at any time during processing.
# message: "EFS is down"
# message: "DISCONNECTING FROM EFS"
# event: eof (telnet session was terminated for any reason, e.g., EMS disconnects)
expect_after {

-exact "      EFS is busy. Wait at least 10 minutes, then retry." {
    send_user "got the EFS BUSY message (abort) \n"
    exit_}

-exact "      EFS is currently unavailable.  Additional information may be available
on IRS quick alerts. " {
    send_user "got the EFS UNAVAILABLE message (abort) \n"
    exit_}

-exact "EFS DISCONNECTING FROM EFS" {
    send_user "got the DISCONNECTING message (abort) \n"
    exit_}

    eof {
        send_user "tp_client disconnected (abort) \n"
        exit_}
```

APPENDIX F

EXAMPLE SCRIPT TO PICK UP ACKS AND SEND A FILE continued

```
}

# When C-shell prompt appears,
#   Start a telnet session to the designated computer (hostid)
#   Exit the C-shell when the telnet session exits (even if that
#   occurs before the script runs to completion)
expect -exact "% "
sleep .1
send -s -- "telnet $hostid; exit\r"

# When login prompt from EMS is received, send username (log_id).
expect -exact "login: "
sleep .2
send -s -- "$log_id\r"

#When password prompt from EMS is received, send password (passwd)
expect -exact "Password:"
sleep .2
send -s -- "$passwd\r"

#When MAIN MENU choice-prompt from EMS is received,
#send 3 (Change File Transfer Protocol)
expect -exact "      Enter your choice: "
sleep .2

send -s -- "$compid\r"

#When MAIN MENU choice-prompt from EMS is received,
#send 2 (Receive/Send File(s))
expect -exact "      Enter your choice: "
sleep .2
send -s -- "2\r"
```

APPENDIX F

EXAMPLE SCRIPT TO PICK UP ACKS AND SEND A FILE continued

```
#If there are acks to pick up, EMS will prompt for the TP to receive them.
#If not, or after they have been picked up, EMS will prompt to allow sending a
file.
#The logic below handles both possibilities.
#If there are files to pick up, the logic responds "y" to receive them.
#After they are received, it responds "y" to the prompt for sending a file,
#then responds with the local filename to be sent, because this script assumes
#that the FTP protocol is being used.
#If there are not any files to pick up, the logic responds "y" to the prompt for
sending #a file, then responds with the local filename to be sent, because this
script assumes
#that the FTP protocol is being used.
expect {
-exact "      Are you ready to receive files? Y/[N]: " {
    sleep .2
    send -s -- "y\r"
    expect -exact "      Do you want to send a file? Y/[N]: "
    sleep .2
    send -s -- "y\r"
    expect -exact "      are sending from your system: "
    sleep .2
    send -s -- "$retfil\r"
}

-exact "      Do you want to send a file? Y/[N]: " {
    sleep .2
    send -s -- "y\r"
    expect -exact "      are sending from your system: "
    sleep .2
    send -s -- "$retfil\r"
}
}

#The send_user command writes a message into the TP's local log file
send_user "after send file looking for choice \n "

#When MAIN MENU choice-prompt from EMS is received, send 1 (Logoff).
#After "DISCONNECTING FROM EFS" message is received from EMS, send exit command to
telnet
expect {
expect -exact "      Enter your choice: " {
    sleep .2
    send -s -- "1\r"
    send_user "answered 1 to choice\n"
    expect -exact "DISCONNECTING FROM EFS"
    send_user "got normal disconnect message \n"
    exit
}
}

#Exit from the script
exit
```

APPENDIX G

EMS Password Rules

Intentional Blank Page

APPENDIX G

EMS Password Rules

A trading partner's password must conform to the following rules.

1. Passwords must be 8 characters long.
2. Passwords must contain:
 - a. at least one uppercase alphabetic character,
 - b. at least one lowercase alphabetic character and
 - c. at least one numeric or special character.
3. Allowable special characters are:

| | | | |
|-------------------|----|----------------------|---|
| Exclamation Point | ! | Less Than Sign | < |
| Pound Sign | # | Equal Sign | = |
| Dollar Sign | \$ | Greater Than Sign | > |
| Percent Sign | % | Question Mark | ? |
| Ampersand | & | At Sign | @ |
| Left Parenthesis | (| Left Square Bracket | [|
| Right Parenthesis |) | Right Square Bracket |] |
| Asterisk | * | Underscore | _ |
| Plus Sign | + | Right Curly Brace | } |
| Comma | , | Left Curly Brace | { |
| Hyphen | - | Vertical Bar | |
| Period | . | Tilde | ~ |
| Slash | / | | |
| Colon | : | | |
| Semi-colon | ; | | |

4. Passwords must not contain:
 - a. the login ID
 - b. reverse shift of the login ID
 - c. circular shift of the login ID
 - d. different upper/lower case version of the login ID
5. A new password must differ by at least three characters from the current password.
6. A new password must not match any password (the last five) in the TP's EMS-maintained password history.
7. Passwords shall expire every 90 days.
8. Passwords cannot be changed within the first 7 days of the last password change.

APPENDIX I

Communication Error Messages

Intentional Blank Page

APPENDIX I

COMMUNICATIONS ERROR MESSAGES

Below are the Communications Error Messages that will be transmitted from the Electronic Management System (Front-End Processing Subsystem (FEPS) in a Communications Error Acknowledgement File, upon detection of a transmission validation error.

1. **"A VIRUS <Virus Name> WAS DETECTED IN THIS FILE"** -- The FEPS (Front-End Processing System) has detected a virus in a transmission file and will quarantine and not process the file. The TP will be temporarily suspended. The TP must clean up the file and call their appropriate e-Help desk for permission to transmit. Please note that this error Acknowledgement is in XML format.

Below is the format for the error Acknowledgement that is returned to the TP when a virus is detected in the transmission. All TP's receive the XML format Acknowledgement, even if the transmission was sent using a different IRS approved format. Note that the second line of the file, the Content Description contains a plain English description of the problem and an understanding of XML is not required to interpret the message. The shaded areas contain the GTX key, a timestamp, and the virus name. These values vary for each returned Acknowledgement. The remainder of the message is constant.

MIME-Version: 1.0

Content-Description: Notification that transmission file T200303211345.0100 was rejected because it contained a virus

Content-Type: text/xml; charset=UTF-8

```
<?xml version="1.0" encoding="UTF-8"?>
<TransmissionAcknowledgement>
  <AcknowledgementTimestamp>2003-12-13T12:05:22-05:00
    </AcknowledgementTimestamp>
  <TransmissionStatus>R</TransmissionStatus>
  <Errors errorCount="1">
    <Error errorId="1">
      <ErrorCategory>Unsupported</ErrorCategory>
      <ErrorMessage><![CDATA[A VIRUS (virus name) WAS DETECTED IN
THIS FILE]]></ErrorMessage>
      <RuleNumber>T0000-009</RuleNumber>
      <Severity>Reject and Stop</Severity>
    </Error>
  </Errors>
  <GTXKey>T200303211345.0100</GTXKey>
</TransmissionAcknowledgement>
```

2. **"ACK COUNT IN TRANSMISSION RECAP RECORD DOES NOT MATCH THE COUNT OF ACKS RECEIVED"** -- The FEPS will reject the entire transmission for State acks, if the number of acknowledgements "inner envelopes" does not match the count in Field 0030 of the "outer envelope" RECAP record. *Applicable to State Acknowledgement Transmissions Only.*
3. **"ADDITIONAL TAX DATA AFTER RECAP"** -- The FEPS will reject the entire transmission when data exists after the RECAP record.
4. **"EFS IS BUSY. WAIT AT LEAST 10 MINUTES, THEN RETRY"** -- The FEPS will reject the entire transmission if the FEPS is unresponsive.
5. **"EFS IS CURRENTLY UNAVAILABLE. ADDITIONAL INFORMATION MAY BE AVAILABLE ON IRS QUICK ALERTS"** -- The FEPS will reject the entire transmission if the FEPS is down because of scheduled downtime or for other planned reasons.

APPENDIX I

Communication Error Messages continued

6. **"ETIN IN INNER ENVELOPE AT RECORD nnnnnn NOT VALID"** -- The FEPS will reject the entire transmission if the ETIN in positions 84-88 of the TRANA record does not match a valid ETIN in the TP profile database. ***Applicable to State Acknowledgement Transmissions Only.***
7. **"EMS RECEIVED YOUR FILE, BUT COULD NOT PROCESS IT. PLEASE CHECK YOUR FILE AND RE-TRANSMIT."** -- This error ack is returned in XML format when EMS receives a file, but fails to decompress and process it.
8. **"FIRST RECORD WITHIN INNER ENVELOPE MUST BE ACK KEY AT RECORD nnnnnn"** -- The FEPS will reject the entire transmission if there is no ACK key record as the first record within an inner envelope. ***Applicable to State Acknowledgement Transmissions Only.***
9. **"INVALID DCN VALUE DETECTED WITHIN ACK KEY RECORD AT RECORD <n>"** -- The return DCN in Field 0090 of the Ack Key record is not present and the first two digits are not zeros. ***Applicable to State Acknowledgement Transmissions Only.***
10. **"INVALID ETIN MISMATCH IN INNER TRANA RECORD AND ACK KEY RECORD AT RECORD <n>"**-- The ETIN in Field 0060 of the inner TRANA record does not match the ETIN in the first five digits of Field 0030 of the Ack Key record. ***Applicable to State Acknowledgement Transmissions Only.***
11. **"INVALID FORM FORMAT BEGINNING AT RECORD n"** -- For ETD transmissions, the FEPS will reject the entire transmission when a form does not begin with a FRM record (valid Record ID, Form Number and Page Number fields) or does not end with a summary record. In addition, the form record must contain a numeric TIN that matches the TIN in the summary record.
12. **"INVALID FORM TYPE FOR THIS EMS PROCESSING SITE"** -- The FEPS will reject the entire transmission if the letter code for the Site Designator in column 75 of the TRANA record is anything other than the specified form type for that processing site.
13. **"INVALID FORM TYPE IN INNER ENVELOPE FOR THIS EMS PROCESSING SITE AT RECORD nnnnnn"** -- The FEPS will reject the entire transmission when the FEPS is not processing for the ELF site that is in the Site Designator in the Inner TRANA record. ***Applicable to State Acknowledgement Transmissions Only.***
14. **"INVALID INNER ENVELOPE FORMAT AT RECORD nnnnnn"** -- The FEPS will reject the entire transmission if any of the following conditions are not met for the contents of the inner envelopes:
 - a) each record begins with a 4 digit byte count = 0120
 - b) the byte count is followed by the 4 asterisk record sentinel
 - c) the record type is ACK or ACKR
 - d) the last character is a #, based on the byte count in the first four digits. ***Applicable to State Acknowledgement Transmissions Only.***
15. **"INVALID INNER ENVELOPE PRODUCTION-TEST CODE. P=PRODUCTION, T=TEST AT RECORD nnnnnn"** -- The FEPS will reject the entire transmission if the production test code field in the TRANA record does not equal P or T. ***Applicable to State Acknowledgement Transmissions Only.***

APPENDIX I

Communication Error Messages continued

16. "INVALID INNER ENVELOPE TRANA (TRANB or RECAP): WRONG LENGTH OR EMBEDDED # AT RECORD nnnnnn" -- If any of the following conditions exist in an inner envelope:
- a) TRANA record is not equal to 120 bytes in length or contains an embedded pound sign.
 - b) TRANB record is not equal to 120 bytes in length or contains an embedded pound sign.
 - c) RECAP record is not equal to 120 bytes in length or contains an embedded pound sign. The FEPS shall generate an error ACK File.
Applicable to State Acknowledgement Transmissions Only.
17. "INVALID JULIAN DAY IN THE TRANA RECORD" -- The FEPS will reject the entire transmission when the Julian day in columns 91-93 of the TRANA record is more than two days prior to the actual receipt Julian day or more than one day after the actual receipt Julian day. ***Not Applicable to State Acknowledgement Transmissions.***
18. "INVALID PROCESSING SITE DESIGNATOR. C=ANDOVER, E=AUSTIN" F=KANSAS CITY, G=PHILADELPHIA, H=FRESNO" -- **EMS** will reject the entire transmission when the letter code for Site Designator in column 75 of the TRANA record is not equal to one of the alphabetic codes, OR when the actual processing site or alternate site code does not agree with the Site Designator in the TRANA record.
19. "INVALID PRODUCTION-TEST CODE - P = PRODUCTION, T = TEST" -- **EMS** will reject the entire transmission when Test/Production indicator in column 117 of the TRANA record does not equal "T" or "P".
20. "INVALID RECAP: WRONG LENGTH OR EMBEDDED #" -- **EMS** will reject the entire transmission when the byte count of the last record is **not equal to** 120 and the terminus character (#) agrees with the byte count.
21. "INVALID RECORD FORMAT IN RECORD NUMBER XXX" -- **EMS** will reject the entire transmission when the number of bytes in a record that the Trading Partner indicates does not equal the number counted by the FEPS, **starting with the TRANA record.** The byte count begins with the 4-digit byte count followed by the 4 asterisks (****) in the record sentinel, the data, followed by the record terminus.
22. "INVALID T/P MODE FOR PROCESSING SITE DESIGNATOR"-- **EMS** will reject the entire transmission if a transmission is received and the Test/Production (T/P) indicator within the transmission does not match the processing modes allowed for the site, the transmission will be rejected.
23. "INVALID TAX RETURN FORMAT BEGINNING AT RECORD n" -- **EMS** will reject the entire transmission Error Ack message after the first occurrence of this validation error. For return transmissions, the FEPS will validate that every return begins with a tax return record (valid Record ID, Return type and Page number fields) and ends with a summary record. In addition, the tax return record must contain a numeric TIN that matches the TIN in the summary record. If an error is encountered, no further validation will take place after this first error is encountered.
24. "INVALID TOTAL ACK KEY COUNT IN ACK FOR ETIN NNNNN" -- **EMS** will reject the entire transmission if the number of Total Ack Key records in an "inner envelope", does not match the number in Field 0030 of an "inner envelope" RECAP record. ***Applicable to State Acknowledgement Transmissions Only.***

APPENDIX I

Communication Error Messages continued

25. "INVALID TOTAL ACKR COUNT IN INNER ENVELOPE RECAP AT RECORD nnnnnn." -- **EMS** will reject the entire transmission if the number of "ACKR" records in an "inner envelope", does not match the number in Field 0100 of an "inner envelope" RECAP record. *Applicable to State Acknowledgement Transmissions Only.*
26. "INVALID TOTAL FORM COUNT IN RECAP" -- **EMS** will reject the entire transmission and generate an Error ACK file with the message if the number of ETD forms counted does not match the Total Form Count in columns 29-34 of the RECAP record.
27. "INVALID TOTAL RETURN COUNT IN RECAP RECORD" -- **EMS** will reject the entire transmission and generate this Error ACK message when the number of tax returns counted does not match the Total Return Count in columns 29-34 of the RECAP record.
28. "INVALID TRANA: WRONG LENGTH OR EMBEDDED #" -- **EMS** will reject the entire transmission when the byte count of the first record is less than 120 and the end-of-record indicator (#) agrees with the byte count.
29. "INVALID TRANB: WRONG LENGTH OR EMBEDDED #" -- **EMS** will reject the entire transmission when the byte count of the second record is less than 120 and the terminus character (#) agrees with the byte count.
30. "INVALID TRANSMISSION TYPE CODE" -- **EMS** will reject the entire transmission when the Trading Partner's transmission type code specified in column 118 of the TRANA record is not valid. Valid codes must equal one of the following codes:
- | | | |
|-----|---------|----------------------------------|
| " " | (blank) | = regular 1040 Electronic Filing |
| "D" | | = ETD |
| "N" | | = ETD Online |
| "O" | | = Online Filing |
| "Z" | | = State Acknowledgement |
31. "THE ETIN CORRESPONDING TO THE EMS LOGIN ID AND THE ETIN IN THE TRANA RECORD WERE DIFFERENT" -- **EMS** will reject the entire transmission when the ETIN in columns 84-88 of the TRANA record does not match the login ETIN.
32. "MULTIPLE INNER ENVELOPE TRANA/TRANB RECORDS DETECTED AT RECORD nnnnnn" -- **EMS** will reject the entire transmission if more than one TRANA record or TRANB record exists in the same inner envelope. *Applicable to State Acknowledgement Transmissions Only.*
33. "MULTIPLE TRANA/TRANB RECORDS DETECTED" -- **EMS** will reject the entire transmission when multiple TRANA or TRANB or RECAP records are found within a file. *Not Applicable to State Acknowledgement Transmissions.*
34. "NO ACKNOWLEDGEMENTS WITHIN THE TRANSMISSION" -- **EMS** will reject the entire transmission if the number of inner envelope counted is zero (0), a communications error ack will be generated and returned to the State transmitter. *Applicable to State Acknowledgement Transmissions Only.*
35. "NO FORMS WITHIN THE TRANSMISSION" -- **EMS** will reject the entire transmission when there are no ETD forms within a transmission.

APPENDIX I

Communication Error Messages continued

36. "NO INNER ENVELOPE TRANA RECORD RECEIVED AT RECORD nnnn" -- **EMS** will reject the entire transmission if the first record in the inner envelope is not a correctly formatted TRANA record as follows:
- a) byte count and end of record indicator(#) do not agree or
 - b) record sentinel **** is not present or
 - c) TRANA is not in columns 9-14 or
 - d) byte count is > 120 characters or is not numeric or
 - e) CR or LF imbedded within the record.
- Applicable to State Acknowledgement Transmissions Only.***
37. "NO INNER ENVELOPE TRANB RECORD RECEIVED AT RECORD nnnn" -- If the second record in the inner envelope is not a correctly formatted TRANB record as follows:
- a) byte count and end of record indicator(#) do not agree or
 - b) record sentinel **** is not present or
 - c) TRANB is not in columns 9-14 or
 - d) byte count is > 120 characters or is not numeric or
 - e) CR or LF imbedded within the record.
- Applicable to State Acknowledgement Transmissions Only.***
38. "NO RECAP RECORD RECEIVED; POSSIBLY DUE TO A LINE PROBLEM" - **EMS** will reject the entire transmission when the last record byte count and the end-of-record indicator (#) do not agree, or record sentinel (****) is not present, or "RECAP" is not in columns 9-14, or byte count is > 120 characters or is not numeric, or <CR> or <LF> is embedded within the record.
39. "NO RETURNS WITHIN THE TRANSMISSION" -- **EMS** will reject the entire transmission when there are no returns within a transmission.
40. "NO TRANA RECORD RECEIVED" -- **EMS** will reject the transmission when the first record byte count and end-of-record indicator (#) do not agree, or record sentinel (****) is not present, or "TRANA" is not in columns 9-14, or byte count is >120 characters or is not **numeric, or <CR> or <LF> is imbedded within the record.**
41. "NO TRANB RECORD RECEIVED" -- **EMS** will reject the entire transmission when the second record byte count and end-of-record indicator (#)do **not agree, or record sentinel (****) is not present, or "TRANB" is not in columns 9-14, or byte count is >120 characters or is not numeric, or <CR> or <LF> is imbedded within the record.**
42. "NON-MATCHING ETIN IN INNER ENVELOPE RECAP AT RECORD nnnnnn" -- **EMS** will reject the entire transmission if an inner RECAP record is detected with an ETIN that does not match the ETIN in the inner envelope TRANA record. ***Applicable to State Acknowledgement Transmissions Only.***

APPENDIX I

Communication Error Messages continued

43. "PRODUCTION-TEST CODE IN TRANA RECORD DOES NOT MATCH PROFILE" --- **EMS** will reject the entire transmission when the Production/Test indicator in column 117 of the TRANA record does not match the production/test mode in the Trading Partner profile. *Not applicable to inner TRANA of State Acknowledgement Transmission.*
44. "RECORD n <record-id> NOT IMMEDIATELY PRECEDED BY SUM RECORD" - **EMS** will reject the entire transmission when the SUM record is missing. "n" stands for the number of the record being processed when the error is discovered and "record-id" stands for the value of the Record ID Field of record n, e.g., RECAP.
45. "RECORD n <record-id> NOT IMMEDIATELY PRECEDED BY SUMETD RECORD" - **EMS** will reject the entire transmission when the SUMETD record is missing. "n" stands for the number of the record being processed when the error is discovered and "record-id" stands for the value of the Record ID Field of record n, e.g., RECAP.
46. "THE T/P INDICATOR FOR INNER ENVELOPE AT RECORD nnnnnn MUST BE T for TEST" -- **EMS** will reject the entire transmission when the state transmitter is in test mode, if the T/P indicator (Field 0160) of an 'inner envelope' TRANA record is not 'T'. *Applicable to State Acknowledgement Transmissions Only.*
47. "TRANSMITTER NOT VALID FOR TRANSMISSION TYPE" --- **EMS** will reject the entire transmission when the Trading Partner profile in the TPDB does not allow the Transmission Type specified in column 118 of the TRANA record.

Intentional Blank Page

SECTION 2 - TRANSMISSION FILE FORMAT

.01 General Description

1. All transmission data must be in ASCII format. No binary fields may be transmitted.
2. A transmission session will normally consist of three parts:
 - a. First, the communications link must be established using acceptable protocol.
 - b. Next, the transmitter will receive the Acknowledgement transmission containing information about the previous transmission session, **if an Acknowledgement file exists**.
 - c. Then, the return record transmission may commence. The return record transmission will consist of 1) a series of logical records, beginning with the TRANA record, 2) some number of logical return records, and 3) a RECAP Record.
3. All return records must be in ascending order by Declaration Control Number (DCN) and Return Sequence Number (RSN).
4. Two four-byte fields (the Record Control Information) must precede each record within a transmission. The first four-byte field is a record Byte Count that will contain a count of the number of bytes within the logical record including the four bytes for the counter itself, four bytes for the Start of Record Sentinel (****), and one byte for the Record Terminus Character (#). The second four-byte field will be the Start of Record Sentinel, which must be four asterisks (****).
5. Every record must have the Record Terminus Character (#) as its last significant byte.

Note: Provisions have been made to allow for **non-significant padding** to exist following the Record Terminus Character, i.e., CR or LF may be added after the Record Terminus Character to fill up a physical block size. This is permitted to accommodate all the different computer systems being used to transmit data.

6. The first records on a transmitted file, the TRANA and TRANB Records, contain information regarding the transmitter and file format. The tax return records should follow these records.

SECTION 2 - TRANSMISSION FILE FORMAT

.01 General Description continued

7. The end of the logical transmission is signaled by the literal "RECAP". It is followed by the RECAP Record data and ends with the Record Terminus Character (#).
8. The TRANA, TRANB and RECAP records are fixed-length records of 120 bytes each. Any non-significant field should be blank-filled.
9. A tax return will consist of a variable number of fixed length or variable length records. The size and format of the logical record for each page of each schedule, form, etc., are specified in Part II Record Layouts. See Section 2 for file formats.
10. Each logical record should contain all data fields pertaining to one printed page of an official schedule or form, including the Form Payment, Authentication, Preparer Note, Election Explanation and Regulatory Explanation records, or to a line of a Statement Record. Therefore, the logical record contains an entire schedule or form, or a logical part (i.e., PG01 or PG02) of a schedule or form, or line of a Statement Record. See Section 8 for Statement Record information.
11. Each complete tax return must consist of all logical records pertaining to it in the following sequence:
 - Form 1040/1040A/1040EZ Page 1
 - Form 1040/1040A Page 2
 - Schedules in alphabetical order or in Attachment Sequence Number order as preprinted on the official IRS form
 - Forms in numerical order or in Attachment Sequence Number order as preprinted on the official IRS form
 - (Forms W-2, W-2G, and 1099-R should precede other forms, and Form Payment should follow other forms)
 - Authentication Record
 - Statement Records
 - Preparer Notes
 - Election Explanations
 - Regulatory Explanations
 - State Records
 - Summary Record
12. Schedule, Form, Statement, Preparer Note, Election Explanation and Regulatory Records can contain additional sequential Page Records if the record consists of more than one printed page. (Pages are only numbered within a schedule, form, or statement record, not across the return). All records must appear in the order above with the proper control information. The counts of the schedules and forms must match the counts in the Summary Record or the return will be rejected.
13. The file should be unlabeled (no standard header or trailer records).
14. Each file must contain only complete returns.

SECTION 2 - TRANSMISSION FILE FORMAT

.01 General Description continued

15. The page should not be generated if there are no entries on a page record of a schedule or form. A blank page (Record ID Group only) will cause the return to be rejected, except in cases where multiple forms require that one page be present when the other page is present.
16. The first logical record of a tax return (i.e., Page 1 of the Form 1040/1040A/1040EZ) will contain the Record Control Information and Tax Return Record Identification (ID) Group, followed by the Return Sequence Number (RSN) and the Declaration Control Number (DCN). The Record ID Group includes the Record ID, Return Type, Page Number, Taxpayer Identification Number, and Tax Period.
 - a. The Return Sequence Number (RSN) is a unique 16-digit number assigned by the transmitter to each return within a return transmission. The RSN includes the transmitter's Electronic Transmitter Identification Number (ETIN). The RSN consists of the following fields:
 - (1) Electronic Transmitter Identification Number (ETIN) of the transmitter (5 numeric characters)
 - (2) Transmitter Use Field, the value of which is determined by the transmitting electronic filer (2 numeric characters)
 - (3) Julian Day of Transmission (3 numeric characters)
 - (4) Transmission Sequence Number for the given Julian Day (2 numeric characters (00-99))
 - (5) Sequence Number assigned to the return (4 numeric characters (0000-9999))
 - b. The DCN is a 14-digit number assigned by the electronic filer to each return within a return transmission. The DCN must contain the Electronic Filer Identification Number (EFIN) of the electronic filer that originated the electronic submission of the return, even if the transmitter assigns the DCN as a service to the electronic return preparer. The DCN consists of the following fields:
 - (1) Always "00" (2 numeric characters)
 - (2) Electronic Filer Identification Number (EFIN) of the electronic filer (6 numeric characters)
 - (3) Batch Number (3 numeric characters (000-999))
 - (4) Serial Number (2 numeric characters (00-99))
 - (5) Year Digit (1 numeric character)

NOTE: When using variable format, begin bracketing field numbers on Page 1 of the tax return beginning with the RSN [0007].

SECTION 2 - TRANSMISSION FILE FORMAT

.02 Fixed and Variable Length Options

There are two options available for transmitting logical tax return records: fixed length (fixed format) and variable length (variable format). (The Transmitter Records TRANA, TRANB, and RECAP Record are not tax return records.)

See Section 5 for requirements related to specific field descriptions and types of characters.

1. Fixed Length Option (Fixed Format)

The fixed length option requires the complete tax return to be transmitted exactly as defined in Part II Record Layouts. All fields must be present. If a field contains no data, it must be blank-filled or zero-filled. An "F" in the Record Type (SEQ 0100) of the TRANS Record A (TRANA) indicates fixed-length option.

When the fixed length option is used, the following data field conventions must be followed:

a. Alphanumeric Fields - Fixed Format

- (1) Left-justify the field with trailing blanks.
- (2) When a "literal" is included in the field description, enter the literal value, left-justified, exactly as specified in Part II Record Layouts. Trailing blanks must be entered.

NOTE: The trailing blanks are not shown in the Record Layouts.

b. Numeric Fields - Fixed Format

- (1) Unsigned numeric fields: Right-justify with leading zeros.
- (2) Signed numeric fields (money amounts): Right-justify with leading zeros, reserving the right-most position for the Sign. A blank (" ") indicates a gain and a minus sign ("-") indicates a loss.
- (3) Signed numeric fields that can also contain literal values: Enter signed numeric fields as described above. When entering a literal value, left-justify and blank-fill the field.

a. Preparer Note, Election Explanation and Regulatory Explanation Records

If less than 4,000 characters of data is present for one of these records, it is permissible to enter the Terminus Character immediately following the last significant character when filing in fixed format. If you choose to do this, be sure to adjust the byte count accordingly.

SECTION 2 - TRANSMISSION FILE FORMAT

.02 Fixed and Variable Length Options continued

2. Variable Length Option (Variable Format)

The variable length option provides for the transmission of only control information, including the record ID group, significant data fields, and significant data within individual fields. Indicate the variable length option by entering a "V" in the Record Type (SEQ 0100) of the TRANS Record A (TRANA).

When the variable length option is used, the following data field conventions must be followed:

a. Alphanumeric Fields - Variable Format

- (1) Left-justify data in the field. Do not enter leading blanks. Trailing blanks are dropped.
- (2) When a "literal" is included in the field description, enter the literal value, left-justified, exactly as specified in Part II Record Layouts. Only the value of the literal (including embedded blanks) must be entered. Trailing blanks are dropped.

b. Numeric Fields - Variable Format

- (1) Unsigned numeric fields: In most cases, leading zeros may be dropped.

Leading zeros cannot be dropped from the following:
Date fields, Ratio (percentage) fields, Business Code field of Schedules C/C-EZ; Agricultural Activity Code field of Schedule F; Two-digit value of the Post of Duty field of Forms 2555/2555EZ; "Type of Use" fields of Form 4136.
- (2) Signed numeric fields (money amounts): Leading zeros are dropped. For a positive value, the trailing blank that indicates a gain is dropped. For a negative value in a field that can contain either a gain or a loss, the minus sign ("-") must be entered in the last position of the signed numeric field.
- (3) Signed numeric fields that can also contain literal values: Enter signed numeric fields as described above. When entering a literal value, left-justify the field; it is not necessary to enter trailing blanks.

SECTION 2 - TRANSMISSION FILE FORMAT

.02 Fixed and Variable Length Options continued

c. Tax Form, Schedule, and Form Records - Variable Format

When transmitting in variable format, each Tax Form (Form 1040/1040A/1040EZ), Schedule, and Form Record will begin with the Record Control Information (Byte Count and Start of Record Sentinel fields) in the same fixed format shown in the record layouts. The Record Control Information is followed by the Record ID Group. Following the Record ID Group are the data fields. Each data field is preceded by the applicable Field Sequence Number, which is enclosed by square bracket field delimiters, "["and"]". The Field Sequence Number is a 4-position number. However, it is permissible to drop the first zero when bracketing the field sequence number. A minimum of three positions must be present. For example, you can use [0010] or [010] for Primary SSN of Page 1 of the Tax Return record. The Record Terminus Character (#) follows the last data field in the record.

Example:

nnnn****RECORD ID GROUP [1st field sequence number]DATA...[next field sequence number]DATA...# ("nnnn" is the record byte count)

NOTE: THE FOLLOWING THREE CHARACTERS "[", "]", and "#" ARE RESERVED AS DELIMITERS AND CANNOT APPEAR AS DATA CHARACTERS. See Section 5 for information about types of characters in electronically filed returns.

d. Preparer Note, Election Explanation and Regulatory Explanation Records

If fewer than 4000 characters of data are present for one of these records, the terminus character can be entered immediately following the last significant character.

e. State Records - Variable Format

See Section 12 for file format specifications for Federal/State Electronic Filing.

f. Statement and Summary Records - Variable Format

All data fields of the Statement and Summary Records must be formatted as fixed length fields. If a field contains no data, it must be blank-filled or zero-filled, as appropriate.

When transmitting in variable format, each Statement and Summary Record will begin with the Record Control Information (Byte Count and Start of Record Sentinel fields) in the same fixed format shown in the Part II Record Layouts. This is followed by the Record ID Group, the data fields formatted as fixed length fields, and the Record Terminus Character (#).

See Section 8 for Statement Record information.

SECTION 3 - ACKNOWLEDGEMENT FILE FORMAT

.01 Acknowledgement File Components

1. Every transmission will be acknowledged by the return of an Acknowledgement File (ACK File) to the transmitter. The Acknowledgement File will be available from the IRS service center to the transmitter within two workdays from the original transmission. The Acknowledgement File must be retrieved before sending a return file transmission.
2. If the entire transmission is rejected **by the Unisys programs**, the ACK File will contain the following:
 - a. The original transmitter records (TRANA and TRANB).
 - b. One ACK Record Set consisting of an ACK Key Record with a "T" in the Acceptance Code field and one ACK Error Record containing a maximum of 15 transmission reject errors related to this transmission.
 - c. The Acknowledgement Recap Record (ACK Recap Record) with Fields 0070 through 0120 zero-filled.
3. If the transmission is accepted, the ACK File will contain the following:
 - a. The original TRANA and TRANB sent by the transmitter with Field 0180 of the TRANA record updated with an IRS entry indicating the (Front-End Processing Subsystem/Central Processing Unit) FEPS/CPU Designator.
 - b. Next, an Acknowledgement Record (ACK Record Set) is sent for each recognizable return transmitted.
 - c. Next, the Acknowledgement Recap Record (ACK Recap Record), which is the original RECAP Record updated with counts of the Total Accepted Returns, Total Duplicated Returns, Total Rejected Returns, Total Duplicated EFT, IRS Computed EFT Count, and IRS Computed Return Count.
 - d. And finally, the FEPS-generated Acknowledgement File Name containing the GTX Key (Field 0140 in the ACK Recap Record).
4. The Acknowledgement of an individual return is the ACK Record Set. An ACK Record Set consists of one ACK Key Record for an accepted return, or one ACK Key Record followed by up to 96 ACK Error Records for a rejected return.
 - a. The ACK Key Record contains information to identify the return it represents, plus a field to indicate how many (if any) ACK Error Records follow. See Section 3.02.1 for the values of the Acceptance Code field of the ACK Key Record and Section 12.08 for the State Packet Acknowledgement format.
 - b. If present, each ACK Error Record will contain data defining the Error Form Record Type, Error Form Record Number, the Error Form Occurrence for multiple occurrences of schedules or forms, the Error Field Sequence Number, and the Error Reject Code describing the specific error encountered.

SECTION 3 - ACKNOWLEDGEMENT FILE FORMAT

.01 Acknowledgement File Components continued

5. An "A" in the Acceptance Code field of an ACK Key Record indicates that the associated tax return has been accepted as a filed tax return and will be processed in the same manner as a return originally submitted on a paper document. This does not imply that the return will pass all IRS validity checks or post to the IRS Master File without delays.
6. The "D" in the Acceptance Code field of an ACK Key Record indicates that the associated tax return has been identified as a duplicate return, i.e., a tax return record had previously been transmitted and accepted for that Social Security Number.
7. The "R" in the Acceptance Code field of an ACK Key Record indicates that the associated tax return has been rejected due to a fatal error involving the return format, internal consistency, or data errors in a key field. The error(s) must be corrected and the return resubmitted to the IRS to be considered a filed tax return.
8. The "T" in the Acceptance Code field of an ACK Key Record indicates that the entire transmission has been rejected.
9. The "D" in the Duplicate Code field of an ACK Key Record indicates that the DCN is a duplicate or zero.
10. The "P" in the Duplicate Code of an ACK Key Record indicates that the Primary SSN is a duplicate or zero.
11. The "S" in the Duplicate Code of an ACK Key Record indicates that the Spouse SSN is a duplicate or zero.
12. The "B" in the Debt Code of the ACK Key Record indicates that a debt was found on both the FMS and IRS files for this return.
13. The "F" in the Debt Code of the ACK Key Record indicates that a debt was found on the FMS File for this return.
14. An "I" in the Debt Code of the ACK Key Record indicates that a debt was found on the IRS File for this return.
15. The "N" in the Debt Code of the ACK Key Record indicates that no debt was found on either the FMS or IRS Files.
16. The "9" in the PIN Presence Indicator field means that no PIN is present on the return. Form 8453 or Form 8453-OL is required.
17. The "1" in the PIN Presence Indicator field means that taxpayer PIN is present and was entered using the Practitioner PIN method.
18. The "2" in the PIN Presence Indicator field means that taxpayer PIN is present and was entered using the Self-Select PIN method by Practitioner.
19. The "3" in the PIN Presence Indicator field means that taxpayer PIN is present and was entered using the Self-Select PIN method by Online.

SECTION 3 - ACKNOWLEDGEMENT FILE FORMAT

.01 Acknowledgement File Components continued

20. The "4" in the PIN Presence Indicator field means that a State-Only return was filed.

NOTE: Taxpayer PIN cannot be used with State-Only returns and Form 8453 or 8453-OL is NOT required.

21. A "(blank)" in the PIN Presence Indicator means that a return with a PIN was rejected.
22. The "R" in the Reserved IP Address Code field of the ACK Key Record indicates that a reserved IP address is present for this return.
23. Up to 96 ACK Error Record(s) may be furnished to the electronic filer, one for each four-position Error Reject Code. Filers should use these Error Reject Codes to determine the source of the error causing the return (or transmission) to be rejected. If more than the maximum number of reject conditions are identified, the last reject code will be "0999".
24. The Error Reject Codes and references to validation criteria related to the error conditions are listed in Attachment 1. Filers should use this information to resolve reject conditions. When a condition cannot be resolved with the information provided, the filer should contact the Electronic Filing Unit at the applicable submission processing center for assistance.

- |

- |

25. The "E" in the Acceptance Code field of an ACK Key Record indicates that this return has rejected previously with either ERC 501 and/or 504 and that this subsequent submission still has some invalid data. A math notice error will be sent to the taxpayer advising of any changes made to the return as a result of this exception processing. This returns will be processed in 4 to 6 weeks from the date of acceptance. DO NOT RESUBMIT THE TAX RETURN or FILE ON PAPER.

4. ACK RECAP Record - Acknowledgement File Recap Record continued

NOTE: Fields 0000 and 0020-0060 are identical to those in the original RECAP Record.

Fields 0110 and 0120 are computed by IRS.

Fields 0000 and 0020-0060 are identical to those in the original RECAP Record.

Fields 0070, 0080, 0090, 0100, 0110, 0120, and 0140 are computed by IRS.

04 How to Batch and Match Returns with Acknowledgement Files

The following information is provided to filers who may not be aware of how to batch their returns and match them up later with Acknowledgement Files. Because filers request to "re-hang" Acknowledgement Files so frequently, it may be that their software is not reading and storing properly the ACK File Name(s) that appear within the ACK File Transmission. **The ACK File Name is generated by the Front-End Processing Subsystem (FEPS) as a 20 byte GTX Key and passed onto the UNISYS with the return file.** After UNISYS processing, this ACK File Name is returned with the ACK file in the RECAP record. When the ACK file is returned to the Transmitter, it is renamed to a DOS 8.3 byte format called the ACK Reference File Name with an extension. The name contains the same month and day from the GTX Key, a 4 digit sequence number assigned by the FEPS for that transmission, followed by the extension. See Figure 34 for an explanation of the extension.

Returns are to be transmitted, using the following specifications from the latest version of the Electronic Return File Specifications and Record Layouts.

- a. In Part II, **Section 1**, the record layout for the TRANA, the first record in any transmission, indicates where the return file batch information is to be entered.
- b. In Field 0060, the 5 digit ELECTRONIC TRANSMITTER IDENTIFICATION NUMBER (ETIN) assigned by the IRS, is entered. This is followed by TRANSMITTER'S USE CODE, 2 digits of the transmitter's choice to specify the type of returns (some transmitters use this field to identify which office or branch it belongs to or if it is a RAL return, etc.). It can also be left blank or zero filled.
- c. In Field 0070, the 3 digit JULIAN DAY (001-365) follows. Field 0080 is composed of 2 digit TRANSMISSION SEQUENCE NO (00-99) for the above Julian Day.
- d. In Part II, **Section 2**, the record layout for the TAX RETURN RECORD for page 1 of either the Form 1040, 1040A, or 1040EZ, indicates where the RETURN SEQUENCE NUMBER is entered, which is used for each return within the batch identified in the TRANA record above.
- e. Field 0007, the 16 digit RETURN SEQUENCE NUMBER (RSN), is composed of the following sub-fields:
 - a. ETIN of Transmitter 5n = Field 0060 of the TRANA
 - b. TRANSMITTER'S USE FIELD 2n = Field 0060 of the TRANA
 - c. JULIAN DAY
OF TRANSMISSION 3n = Field 0070 of the TRANA
 - d. TRANSMISSION SEQUENCE NUMBER 2n = Field 0080 of the TRANA
(00-99)
 - e. SEQUENCE NO. OF EACH RETURN 4n = 0000-9999

NOTE: Dedicated leased line filers can file a maximum of 10,000 returns.

SECTION 3 - ACKNOWLEDGEMENT FILE FORMAT

.04 How to Batch and Match Returns with Acknowledgement Files continued

- f. In Field 0008, the 14 digit DECLARATION CONTROL NUMBER (DCN), that is also used on the corresponding Form 8453 signature document, is composed of the following sub-fields:
 - a. Always 00 2n = 00
 - b. EFIN of ERO 6n = (Assigned to ERO by IRS)
 - c. Batch Number of EROs returns 3n = 000-999
 - d. Serial Number of return in batch 2n = 00-99
 - e. Year 1n = (ending digit of tax year)
- g. In Part II, the record layout appears for the RECAP record, which ends a transmission.
- h. Field 0040, the ETIN and TRANSMITTER'S USE CODE must equal the same one in Field 0060 of the TRANA.
- i. In Field 0050, the JULIAN DAY must equal the JULIAN DAY in Field 0070 of the TRANA.
- j. In Field 0060, the TRANSMISSION SEQUENCE NUMBER must equal Field 0080 of the TRANA.

2. Assignment of File Name by FEPS

- a. After transmitting a file, the system indicates that it was successfully received with the message: **"Transmission file has been received with the following GTX Key:**

Syyyymmddhmmss.xxxx

mmddnnnn

The Global Transaction (GTX) key is a series of unique numbers identifying the system that received it and day/time information. After the GTX key, the system generates a unique file name for the transmission that will be used as part of the Acknowledgement Reference File Name returned to the transmitter. The GTX Key is placed in field 0140 of the Acknowledgement File ACK RECAP Record. Transmissions and Acknowledgements can be matched using the 20 character GTX Key, the ETIN, and/or the ACK Reference File Name.

- b. The Acknowledgement Reference File Name consists of the 4-digit numerical representation of the transmission month and day (MMDD) followed by a 4-digit sequence number for the transmissions received to date for that transmitter (0000-9999). The Acknowledgement Reference File Name will be part of the file name returned to the transmitter.

See Appendix A for more information on the Ack File Reference Name.

CAUTION: After receiving transmission 9,999, the system begins to number again with 0000 or the next available sequence number after 0000. Therefore, if large transmitters do not pick up ACK files within a few days, they may see this number repeated and not be able to identify which batch is which, or their software may overwrite a previous ACK file in their directory on their PC.

CAUTION: If more than 100 batches per ETIN in a day are filed, the transmitter should request another ETIN.

SECTION 3 - ACKNOWLEDGEMENT FILE FORMAT

.04 How to Batch and Match Returns with Acknowledgement Files continued

3. Receiving, Locating, Storing, and Matching ACK Files

- a. In Part I, **Section 3.01**, the Acknowledgement File format appears. It is composed of the original TRANA and TRANB received from the Transmitter, followed by the ACK KEY Record, ACK ERR Record(s) as applicable, and the ACK RECAP record.
- b. In Part I, **Section 2.02**, the ACK KEY RECORD is outlined.
 - (1) Field 0030 contains the RETURN SEQUENCE NUMBER (RSN) as submitted by the Transmitter in Field 0007 of page 1, 1040, 1040A, 1040EZ.
 - (2) Field 0090 contains the return Declaration Control Number (DCN), as submitted by the Transmitter in Field 0000, page 1, 1040, 1040A, or 1040EZ.
- c. In Part I, **Section 2.02**, the ACK RECAP is outlined.
 - (1) Field 0040 contains the ETIN plus TRANSMITTER'S USE CODE as in the original transmitter's RECAP.
 - (2) Field 0050 contains the JULIAN DAY OF TRANSMISSION as in the original transmitter's RECAP.
 - (3) Field 0060 contains the TRANSMISSION SEQUENCE NUMBER FOR JULIAN DAY in Field 0050, as in the original transmitter's RECAP.
 - (4) Field 0140 contains the ACKNOWLEDGEMENT FILE NAME, which was generated by the FEPS in the **"Transmission file has been received with the following GTX Key"** message. (Software developers/transmitters must program to wait for this message and should store the File Name for comparison with the ACK File transmission when received.)
- d. In summary, the transmitter and ERO have numerous ways of matching up their batches of return files they transmitted with the ACK files they receive.

SECTION 3 - ACKNOWLEDGEMENT FILE FORMAT

.04 How to Batch and Match Returns with Acknowledgement Files

e. CAUTION:

- (1) Block zero ("0") identifies the filename. Data is transmitted starting in Block one ("1") up to Block "255" and then rolls to Block "0". The last block for the file is padded with "Ctrl Z" characters. The next transmission packet should be the End of Transmission (EOT) character (ASCII - "cntl d"). If there is another file, the next block, Block "0" will contain the next filename. Otherwise a Block "0" without a filename will be followed by the EOT character.
- (2) **If using ZMODEM, Acknowledgement Files are sent as separate files within the transmission, with "zfile" and "eof" in between each file, with a "zfin" at the end of all files.** Filer's software should read for the "zfile" and "eof" and store the file under the IRS File Name in the directory for each ACK File within the ACK transmission. The Front-End Processing System is set to overwrite when sending ACK Files.
- (3) Sometimes transmitters will use a different protocol if they are having problems with one. **Transmitter's software must be flexible to handle the above rules when various file transfer protocols might be used in order to parse their individual ACK files properly for correct storage in their directories.** Otherwise, transmitters may not realize they have received more than one ACK file and store multiples under one of the ACK File Names.

f. ETD Batching and Matching

The ETD batching and Acknowledgement File processing follow the same patterns as 1040 returns.

Intentional Blank Page

SECTION 4 - TYPES OF RECORDS

.01 Transmitter Records

See Part II Record Layouts for the exact formats of the Trans Record "A" (TRANA), Trans Record "B" (TRANB), and RECAP Record.

1. TRANA and TRANB Records*

The first two records of a transmitted file are the Transmitter Records TRANA and TRANB. These records contain data entered by the transmitter. (The "transmitter" is defined as the firm transmitting directly to the IRS.)

2. RECAP Record

The RECAP Record follows the Tax Return Records and is the final record of a transmitted file. The RECAP Record provides balancing counts for the tax returns contained in the transmitted file.

.02 Tax Return Records

See Part II Record Layouts for the exact formats of individual records listed below. All records within a tax return should appear in the order listed in Part II, Record Layouts or in the order of the Attachment Sequence Number preprinted on the corresponding paper form. (Refer to Section 2.01, Item 11)

All "total" fields must have a significant entry when there are amounts leading to the total. Any "total" field that has a significant entry must have at least one significant amount leading to that total. Otherwise, processing of the tax return will be delayed to resolve the discrepancy.

1. Tax Form Record

Each tax return must begin with the Tax Form Record, which consists of Form 1040 Page 1 and Form 1040 Page 2, or Form 1040A Page 1 and Form 1040A Page 2, or Form 1040EZ Page 1.

2. Schedule and Form Records

Some schedules and forms consist of multiple pages. Each page of a multiple-page schedule or form is a separate record within the tax return.

Multiple occurrences of certain schedules and forms are permitted. Refer to Attachment 11 for a list of the maximum number of schedules and forms permitted in an electronically filed tax return. When there are multiple occurrences of schedules or forms, the Page Number must be sequential within the Form/Schedule Occurrence Number of the schedule or within the Form Occurrence Number of a form.

SECTION 4 - TYPES OF RECORDS

.02 Tax Return Records continued

a. Instructions for Multiple Occurrences of Schedules C and C-EZ:

Schedule C and Schedule C-EZ are separate schedule types. The Form/Schedule Occurrence Number in the Record ID must be incremented starting with "0000001" for each schedule type. For example, if a joint return contains four Schedules C for the primary taxpayer and one Schedule C-EZ for the secondary taxpayer, the first Schedule C will contain "0000001" in the Form/Schedule Occurrence Number, the second Schedule C will contain "0000002" in the Form/Schedule Occurrence Number, etc. The Form/Schedule Occurrence Number for the Schedule C-EZ will contain "0000001". If this format is not followed, the return may be rejected or the refund delayed.

The number of Schedules C plus the number of Schedules C-EZ cannot exceed a total of eight. When eight Schedules C are transmitted, no Schedule C-EZ can be transmitted. When a Schedule C-EZ is transmitted for a taxpayer, no Schedule C can be transmitted for the same taxpayer.

b. The "Form Payment" record is considered to be a form, although there is no equivalent paper form.

3. Foreign Employer Compensation (FEC) Record

The FEC RECORD is required information to support entries to Line 7, Forms 1040 and 1040A, and Line 1, Form 1040EZ, for compensation received from non-U.S. employers who do not have EIN's nor issue Forms W-2. The FEC RECORD must be completed when the Foreign Employer Compensation Literal, Field No. 0378 of the Tax Form indicates "FEC". A maximum of 10 FEC RECORD's are permitted. The total of Foreign Employer Compensation Amount(s) from Field No. 0220 of the FEC RECORD(s) is reported in the Foreign Employer Compensation Total, Field No. 0379, of Forms 1040, 1040A, and 1040EZ. The appropriate address fields, U.S. or Foreign, must be completed on the FEC RECORD to identify the location at which the wage-recipient resided when the services for the Foreign Employer were performed. If the services for the Foreign Employer were performed in the U.S., enter alphabetic "US" (not shown in the Country Code Table) for the Country Code Field No. 0130.

4. Authentication Record

The Authentication (ATH) Record is used when the taxpayer(s) is filing an Online return and/or electing to use the Self-Select or Practitioner PIN (Personal Identification Number) for e-file signature option. Only one Authentication Record is permitted per tax return.

5. Statement Records

Statement Records can only be used by the electronic filer when the number of data items exceeds the number that can be contained in the space provided on the printed schedule or form, or when the data must be provided on a separate continuation statement record, or when a statement of explanation is required for a specific condition.

See Section 8 for Statement Record information.

SECTION 4 - TYPES OF RECORDS

.02 Tax Return Records continued

6. STCGL/LTCGL Records

"STCGL" is the Short Term Capital Gain or Loss Record and "LTCGL" is the Long Term Capital Gain or Loss Record. Each record is considered a separate transaction. These transaction records are used when there is a need to transmit five or more transactions with an electronically filed return. (Use the Schedule D to report four or less for short term and long term transactions.) Each Schedule D and/or F8865 occurrence may have up to 5000 transaction records (i.e., 5000 short term and 5000 long term). The "STCGL" and/or "LTCGL" transaction record must be transmitted prior to the parent form (i.e., Sch. D or 8865). The "STCGL" can be submitted without the "LTCGL" and vice versa. When the "STCGL" or "LTCGL" transaction record is present, then "STCGL" or "LTCGL" record CANNOT be blank. All "STCGL" and/or "LTCGL" transaction records must be in the appropriate numerical order based on occurrence number within subpart occurrence and each set must start with "0000001".

7. Preparer Note, Election Explanation and Regulatory Explanation Records

- a. Preparer Note (NTE) records can be used by the paid preparer, electronic return originator or taxpayer to provide additional, voluntary information related to the tax return but not required to be attached to it.
- b. Election Explanation (ELC) records are used when the taxpayer makes an election for certain tax treatment, status, exception or exemption based on an instruction for the tax form or in a related tax publication when there is no official IRS form designed for that purpose. The specific "election" must be cited followed by any explanatory or supporting information required. Multiple elections can be combined on one page record; separate page records can be used for each applicable election; and/or, multiple page records can be used for one election. The maximum number of ELC page records is 20. Enter the terminus character (#) after the last significant character in each ELC page record.
- c. Regulatory Explanation (REG) records are similar to Election Explanation records and are used when the taxpayer cites a specific regulation for certain tax treatment, status, exception or exemption when there is no official IRS form designed for that purpose. The specific "regulation" must be cited followed by any explanatory or supporting information required. Multiple regulatory explanations can be combined on one page record; separate page records can be used for each applicable regulation cited; and/or, multiple page records can be used for one regulatory explanation. The maximum number of REG page records is 20. Enter the terminus character (#) after the last significant character in each REG page record.

SECTION 4 - TYPES OF RECORDS

.02 Tax Return Records continued

8. State Records

State Records include the Generic Record "STbbbb0001bb" and the Unformatted Record "STbbbb0002bb". There can be only one Generic Record for each return. There can be up to nine Unformatted Records for each return. The Generic Record must be present and must precede any other State Record.

See Section 12 for specifications and examples of the State Records.

9. Summary Record

The Summary Record is the final record for each tax return. This record contains electronic filer identification data, the counts for Form, Schedule, Authentication, Statement, Preparer Note, Election Explanation, and Regulatory Explanation Records included in the return, and the paper document indicators. (A value of "1" in a paper document indicator field shows that the paper document specified is a part of the return and has been attached to the Form 8453). It also contains the Electronic Postmark fields, the IP (Internet Protocol) fields and the Software Identification fields.

SECTION 5 TYPES OF CHARACTERS

This section identifies the types of characters that are valid for an electronically filed return. Although characters other than these may be entered by a taxpayer on the paper form, the invalid characters are not key entered to the electronically filed return.

THE FOLLOWING THREE CHARACTERS "[", "]", and "#" ARE RESERVED AS DELIMITERS AND CANNOT APPEAR AS DATA CHARACTERS. The left ([]) and right ([]) brackets are used to enclose Field Sequence Numbers. The Pound Sign (#) (Record Terminus Character) is used to indicate the End of Record.

.01 Allowable Characters

1. Alpha (A)

Upper case alpha characters only: A - Z

Literal values - Enter exact character string from the Field Description in Part II Record Layouts.

2. Numeric (N)

Numeric characters only: 0 - 9

a. MONEY AMOUNT (N) (Signed Numeric) -

Enter whole dollar amounts (do not enter cents).

- (1) Fixed format: 12 characters, right-justified with leading zeros; the right-most position is reserved for the sign. A blank () indicates a gain and a minus sign (-) indicates a loss.

Non-significant - Zero-fill the field, reserving the right-most position for the sign.

- (2) Variable format: Leading zeros are dropped. For a positive value, the trailing blank that indicates a gain is dropped. For a negative value in a field that can contain either a gain or a loss, the minus sign (-) must be present in the last position of the signed numeric field.

Non-significant - Omit the field.

SECTION 5 TYPES OF CHARACTERS

.01 Allowable Characters continued

- b. **RATIO** (R) (percentage) - Left-justify and zero-fill for both fixed and variable formats. DO NOT ENTER A DECIMAL POINT. Other than the exception listed below, ratio fields contain six numeric characters with the decimal point assumed to be between the left-most and the second left-most positions. If less than 100%, precede with a zero.

Examples: 25.32% = 025320, 105% = 105000

- (1) **EXCEPTION:** "Rate" fields on Form 4136 equal six numeric characters. The decimal point is assumed to precede the left-most position. Transmit all six positions, left-justified and zero-filled.

Examples: Rate .183 = 183000
 Rate .03967 = 039670
 Rate .17 = 170000

- c. **EIN** (Employer ID Number) (N), e.g., if no EIN is present on Schedule C or Schedule F - for fixed format, blanks should be entered; for variable format, the field should be omitted.
- d. **ZIP CODE** (N) should be left-justified. For fixed format, if there are only five Zip Code characters, the seven remaining positions can be either blank-filled or zero-filled. For variable format, if there are only five Zip Code characters, transmit the five numeric characters.
- e. **DATE** (DT) - M = Month, D = Day, Y = Year (YYYY, YYYYMM, YYYYMMDD, MMYYYY, MMDDYYYY); if date is not known or covers various dates, enter zeros unless otherwise specified in the record layout field description. Leading zeros cannot be dropped from date fields for both fixed and variable formats.

If a date field is not defined as "DT" in Part II Record Layouts, then the Field Description will specify the required date format.

- f. **OTHER UNSIGNED NUMERIC FIELDS** (N)

- (1) Fixed format: Enter the numeric characters, right-justified and zero-filled.

Non-significant - Blank-fill (unless otherwise specified in the Record Layout for that field).

SECTION 5 TYPES OF CHARACTERS

.01 Allowable Characters continued

- (2) Variable format: For most unsigned numeric fields other than ratio, EIN, Zip Code, and date fields, leading zeros may be dropped.

Leading zeros cannot be dropped from the Business Code field of Schedules C/C-EZ nor from the Agricultural Activity Code field of Schedule F. The leading zero cannot be dropped from the two-digit value of the Post of Duty field of Forms 2555/2555EZ, Foreign Employer Compensation (FEC) Record, or from the "Type of Use" fields of Form 4136.

Non-significant - Omit the field.

3. Alphanumeric (AN)

Upper case alpha characters A - Z; numeric characters 0 - 9; and special characters in cases listed below.

Literal values - Enter exact character string from Field Description in Part II Record Layouts.

Non-significant - For fixed format, blank-fill; for variable format, omit the field.

- a. Special Characters - Only the following are permitted in certain cases: Ampersand (&); blank (), often shown in the record layouts as "b"; comma (,); hyphen (-); less-than (<); percent (%); plus (+); and slash (/).
- b. Special Symbols and their hexadecimal conversion characters for ASCII are below:

| <u>Symbol</u> | <u>ASCII Hex</u> | <u>Symbol</u> | <u>ASCII Hex</u> |
|---------------|------------------|---------------|------------------|
| [| 5B | - | 2D |
|] | 5D | & | 26 |
| # | 23 | / | 2F |
| < | 3C | % | 25 |

SECTION 5 TYPES OF CHARACTERS

.02 Special Cases for Special Characters

1. Form 1040

Name Line 1: A - Z; ampersand (&); blank (); hyphen (-); and less-than (<).

Name Line 2: A - Z; 0 - 9; ampersand (&); blank (); hyphen (-); percent (%) for "in care of" address; and slash (/).

Street Address: A - Z; 0 - 9; blank (); hyphen (-); and slash (/).

City: At least three characters must be entered; A - Z; blank (); APO/FPO - Refer to Attachment 4.

State: A - Z - Refer to Attachment 3.

Dependent Names: A - Z; blank (); and hyphen (-).

2. Form 5329

Name of Person Subject to Penalty Tax: A - Z; blank (); hyphen (-); and less-than (<).

3. Form 8606

Nondeductible IRA Name: A - Z; blank (); hyphen (-); and less-than (<).

4. Forms W-2/W-2G/W-2GU/1099-R

Employer Name: A - Z; 0 - 9; ampersand (&); comma (,); hyphen (-); plus (+); and slash (/).

City/State/Zip: A - Z; 0 - 9; comma (,); and hyphen (-).

5. Foreign Employer/Payer Address on Forms W-2/W-2G/W-2GU/1099-R

Employer/Payer State: Period (.).

6. Employee, Recipient/Winners with Foreign Address on Form W-2/W-2G/W-2GU/1099R

Employee/Recipient/Winner State: Enter Period (.).

7. Other Schedules/Forms with Similar Fields

Follow character set instructions for fields that most resemble those listed above.

8. Summary Record

IP Address: 0-9, A-F, period (.), colon (:), or blank ().

SECTION 6 - CRITERIA FOR FILER FRONT-END CHECKS

.01 Refund Delay Conditions

The following conditions may delay the refund and/or change the refund amount.

1. Taxpayer owes back taxes, either individual or business (refund offset).
2. Taxpayer owes delinquent child support (refund offset).
3. Taxpayer has certain delinquent federal debit, such as student loans, etc. (refund offset).
4. The last name and social security number of the primary taxpayer must be the same as on last year's return or the return will be delayed at least one week for rematching. It is **strongly** suggested that you use the name as it appears on the mailing label of the tax package.
5. The Estimated Tax payments reported on the return do not match the Estimated Tax payments recorded on the IRS Master File. This generally occurs when:
 - a. The spouse made separate Estimated Tax payments and filed a joint return, or vice versa; or
 - b. The return was filed before the last Estimated Tax payment was credited to the account.
6. The taxpayer has a Schedule E claiming a deduction for a questionable tax shelter.
7. The taxpayer is claiming a blatantly unallowable deduction.
8. The taxpayer is considered to be a first-time filer. A first-time filer is defined as an taxpayer who has not filed a tax return as a primary or secondary taxpayer during the previous ten years.

SECTION 6 - CRITERIA FOR FILER FRONT-END CHECKS

.02 Optional Social Security Number Validation against Label

Preparers may wish to make a computer check on the validity of the SSN's of those taxpayers who have IRS preprinted mailing labels to prevent data entry errors that would result in delayed refunds. The two alpha characters that appear on the IRS label are check digits that can be used to verify the SSN. Use the following formula to validate the transcription of the SSN when the taxpayer presents an IRS mailing label:

1. Generate the high order check digit by multiplying the specific digits by the appropriate weight multiple.

| <u>Digit of the SSN</u> | <u>Times</u> | <u>Weight Multiple</u> |
|---------------------------|--------------|------------------------|
| 1st position (high order) | X | +1 |
| 2nd position | X | +2 |
| 3rd position | X | -4 |
| 4th position | X | +1 |
| 5th position | X | +2 |
| 6th position | X | -4 |
| 7th position | X | +1 |
| 8th position | X | +2 |
| 9th position | X | -4 |

2. Add the products to an accumulator. If the net result of the accumulation is within the range of 0 through -22, select the alphabetical equivalent from the alphabetic table below. If the net result is outside the range of the table, check the sign of the accumulation.

If the sign is plus, subtract 23 from the result; if the sign is minus, add 23 to the result. Repeat this until the result is within the range of the table and select the alphabetic equivalent from the table for the high order position of the check digit.

SECTION 6 - CRITERIA FOR FILER FRONT-END CHECKS

.02 Optional Social Security Number Validation against Label continued

3. Generate the low order position of the check digit by multiplying the specific digits by the appropriate weight multiple.

| <u>Digit of the SSN</u> | <u>Times</u> | <u>Weight Multiple</u> |
|--------------------------|--------------|------------------------|
| 1st position (low order) | X | +1 |
| 2nd position | X | -3 |
| 3rd position | X | +1 |
| 4th position | X | -3 |
| 5th position | X | +1 |
| 6th position | X | -3 |
| 7th position | X | +1 |
| 8th position | X | -3 |
| 9th position | X | +1 |

4. Add the products to an accumulator and repeat the calculation in "2" above to arrive at the low order position of the check digit.

5. Alphabetic Table

| | | |
|--------|---------|---------|
| 0 = A | -8 = K | -16 = T |
| -1 = B | -9 = L | -17 = U |
| -2 = C | -10 = N | -18 = V |
| -3 = D | -11 = O | -19 = W |
| -4 = E | -12 = P | -20 = X |
| -5 = F | -13 = Q | -21 = Y |
| -6 = G | -14 = R | -22 = Z |
| -7 = H | -15 = S | |

SECTION 6 - CRITERIA FOR FILER FRONT-END CHECKS

.03 SSN Validation

Refer to Attachment 9 for valid ranges of Social Security/Taxpayer Identification Numbers.

.04 Optional Validation of Routing Transit Number (RTN)

Verify the validity of the Routing Transit Number by computing the check digit, which is the ninth digit of the RTN. There may be instances in which the RTN is valid in format and equal to an actual number used by a financial institution, but is not yet on the Financial Management Organization Master File (FOMF). In these cases, the tax return would be rejected.

The steps are as follows:

1. Multiply each of the first eight digits of the RTN by the appropriate multiplier (the first digit multiplied by 3, the second by 7, the third by 1, the fourth by 3, the fifth by 7, the sixth by 1, the seventh by 3, and the eighth by 7).
2. Add all the products.
3. Subtract the sum of all the products from the next multiple of ten.
4. The remainder is the check digit, which must be equal to the ninth digit of the RTN.

Note: If the sum of the products is evenly divisible by 10, the check digit is zero (0).

5. Example:

If 120139013 were the RTN, verify the check digit as follows:

- a. Multiply each of the first eight digits, 12013901, by 37137137 respectively:

| | | | | | | | | |
|------------------------|----|----|----|----|----|----|----|----|
| Routing Transit Number | 1 | 2 | 0 | 1 | 3 | 9 | 0 | 1 |
| Constant Multiplier | X3 | X7 | X1 | X3 | X7 | X1 | X3 | X7 |
| | 3 | 14 | 0 | 3 | 21 | 9 | 0 | 7 |

- b. Add the products: $3 + 14 + 0 + 3 + 21 + 9 + 0 + 7 = 57$
- c. Subtract the sum of all the products from the next multiple of ten:
 $60 - 57 = 3$
- d. The remainder is the check digit: 3
- e. If the check digit does not equal the ninth digit of the RTN, verify that the first eight digits of the RTN were correctly entered from the source document and recompute if appropriate.

Note: If the check digit does not match, the refund cannot be directly deposited.

SECTION 7 - FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

The instructions in sub-sections 7.01 through 7.04 must be carefully followed to avoid delaying returns for error conditions. They must be included in electronic filers' programs as consistency tests and in the data entry instructions.

The Primary SSN, Primary Name Control, State Abbreviation, and Zip Code should be key verified to avoid lengthy delays caused by mismatches with existing taxpayer information in IRS records or by undeliverable refund checks.

.01 Name Controls for Individual Tax Returns

1. Primary Name Control (SEQ 0050) of Form 1040/1040A/1040EZ must equal the first four significant characters of the primary taxpayer's last name. No leading or embedded spaces are allowed. The first left-most position must contain an alpha character. Only alpha, hyphen, and space are allowed. Omit punctuation marks, titles and suffixes.

Spouse's Name Control (SEQ 0055) of Form 1040/1040A/1040EZ, Dependent Name Control (SEQ 0172, 0182, 0192, 0202, 0212) of Form 1040/1040A, Qualifying Child Name Control (SEQ 0007, 0077) of Schedule EIC, Parent Name Control (SEQ 0045) of Form 8615, and Child Name Control (SEQ 0015) of Form 8814 must meet the same criteria.

Examples:

| <u>Individual Name</u> | <u>Primary Name Control</u> |
|-------------------------|-----------------------------|
| John Brown | BROW |
| John Di Angelo | DIAN |
| John En, Sr. | EN |
| John Lea-Smith | LEA- |
| Joe McCarty | MCCA |
| Mary Smith & John Jones | SMIT |
| John O'Neil | ONEI |

2. Consider certain foreign suffixes as part of the last name (i.e., Armah-Bey, Paz-Ayala, Allar-Sid). Particular attention must be given to those names that incorporate a mother's maiden name as a suffix to the last name. This practice is common in names of Spanish extraction. Consider the mother's maiden name as part of the surname for Name Control purposes.

Examples:

| <u>Individual Name</u> | <u>Primary Name Control</u> |
|-----------------------------|-----------------------------|
| Abdullah Allar-Sid | ALLA |
| Jose Alvarado Nogales | ALVA |
| Juan de la Rosa Y Obregon | DELA |
| Pedro Paz-Ayala | PAZ- |
| Donald Vander Neut | VAND |
| Otto Von Wodtke | VONW |
| John Big Eagle | BIGE |
| Mary Her Many Horses | HERM |
| John Smith Gonzalez | GONZ |
| Maria Acevedo Smith | SMIT |
| John Garcia Garza Hernandez | GARZ |

SECTION 7 - FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.01 Name Controls for Individual Tax Returns continued

3. Below are examples of Indo-Chinese last names and the derivative Name Control. Some Indo-Chinese names have only two characters. Indo-Chinese names often have a middle name of "Van" (male) or "Thi" (female).

Examples:

| <u>Individual Name</u> | <u>Primary Name Control</u> |
|------------------------------|-----------------------------|
| Binh To La | LA |
| Kim Van Nguyen | NGUY |
| Nhat Thi Pham | PHAM |
| Jin-Zhang Qui & Yen-Yin Chiu | QUI |

.02 Name Line 1 Format

1. Name Line 1 (SEQ 0060) of Form 1040/1040A/1040EZ can have no leading or consecutive embedded spaces. The only characters allowed are alpha, ampersand (&), hyphen (-), less-than sign (<), and space. The left-most position must be alpha. The less-than sign replaces the intervening space to identify the primary taxpayer's last name. It cannot be preceded by or followed by a space.
2. All apostrophes (') and any other punctuation characters, except the hyphen (-), must be omitted from names and the alphabetic characters shifted to the left in their place (e.g., O'Shea = OSHEA).
3. Numeric characters in name components must be replaced by alphabetic Roman Numerals (e.g., Charles 3rd = CHARLES III).
4. When a suffix such as "JR" or "III" is part of the name, enter a less-than sign (<) between the suffix and the last name. Do not enter a space before or after any less-than sign; the less-than sign takes the place of a space.

Titles such as "M.D." or "Ph. D.", which are not part of a give name, may be omitted.

5. Name Line 1 CANNOT CONTAIN MORE THAN 35 CHARACTERS.

If information in Name Line 1 exceeds 35 characters, truncate using the following priority:

- a. Substitute the initial for the second given name.
- b. Omit the second initial of the secondary taxpayer, if necessary.
- c. Omit the second initial of the primary taxpayer, if necessary.
- d. Substitute initials for the secondary taxpayer's given name.
- e. Substitute initials for the primary taxpayer's given name.

SECTION 7 - FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.02 Name Line 1 Format continued

6. Enter taxpayer names as follows:

- a. For one taxpayer: Enter first name, a space, middle name or middle initial, a less-than sign (<), last name. (The last name of the individual must be contained within this name line field.) If there is a suffix, enter a less-than sign (<) between the last name and the suffix.
- b. For two taxpayers with same last name: Joint returns must contain one ampersand (&) between taxpayers' first names. The taxpayer whose first name is associated with the Primary SSN used on the return must be entered first, and the last name of that taxpayer must be identified by a preceding less-than sign (<).
- c. For two taxpayers with different last names: If the spouse uses a different last name, enter the primary taxpayer's first and last names as above for one taxpayer's name, but after the last name, add another less-than sign (<) followed by an ampersand and the full name of the spouse. A maximum of two less-than signs are permitted. Any suffixes should follow the primary taxpayer's last name only.

Examples:*

Enter as:

| | |
|--|---------------------------|
| John C. (Brown), III | JOHN C<BROWN<III |
| John M. (Brown), M.D. | JOHN M<BROWN |
| Henry A. (Carter) | HENRY A<CARTER |
| Frank N. (De Porta) | FRANK N<DE PORTA |
| Timothy (Jackson), 2nd | TIMOTHY<JACKSON<II |
| Carl A. (Jones) & Angie Myer | CARL A<JONES<& ANGIE MYER |
| Charles (Jones) & Diane D. Jones, M.D. | CHARLES & DIANE D<JONES |
| Florence E. (Jones) MD | FLORENCE E<JONES |
| Alfred (Newman), Minor | ALFRED<NEWMAN<MINOR |
| James R. (O'Donnell) | JAMES R<ODONNELL |
| James (Oliver-Keogh), 3rd | JAMES<OLIVER-KEOGH<III |
| Lillie B. (Owen-Smith) | LILLIE B<OWEN-SMITH |
| J. B. (Smith) Jr. & Ann Trent | J B<SMITH<JR & ANN TRENT |
| John A. (Smith), III & Ann Smith, M.D. | JOHN A & ANN<SMITH<III |
| John A. and Jane B. (Smith) | JOHN A & JANE B<SMITH |

- d. For other than Joint Return and deceased taxpayer: Enter the literal "DECD" after the surname of the deceased taxpayer (e.g., John A<Doe<DECD or John A<Doe<JR DECD).
- e. For a Joint Return with the same last name and Primary taxpayer is deceased: Enter the literal "DECD" after the first name and/or initial of the deceased taxpayer (e.g., John A DECD & Jane B<Doe or John A DECD & Jane B<Doe<JR).
- f. For a Joint Return with the same last name and Secondary taxpayer is deceased: Enter the literal "DECD" after the first name and/or initial of the deceased taxpayer (e.g., John A & Jane B DECD<Doe or John A & Jane B DECD<Doe<SR).

SECTION 7 - FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.02 Name Line 1 Format continued

- g. For a Joint Return with different last names and either the Primary OR the Secondary taxpayer is deceased: Enter the Literal "DECD" after the surname of the deceased taxpayer (e.g., John A<Doe<DECD & Jane B Smith or John A<Doe<III DECD & Jane B Smith; John A<Doe<& Jane B Smith DECD or John A<Doe<JR & Jane B Smith DECD).
 - h. For a Joint Return with the same last name and both taxpayers are deceased: Enter the literal "DECD" after the first name and/or initial of the deceased taxpayer (e.g., John A DECD & Jane B DECD<Doe or John A DECD & Jane B DECD<Doe<JR).
 - i. For a Joint Return with different last name and both taxpayers are deceased: Enter the literal "DECD" after the surname of the deceased taxpayer (e.g., John A<Doe<DECD & Jane B Smith DECD or John A<Doe<SR DECD & J B Smith DECD).
- * Parentheses indicate the last name of the taxpayer with Primary SSN.

SECTION 7 - FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.03 Street Address Format

1. The Street Address (SEQ 0080) of Form 1040/1040A/1040EZ contains the house number and street, route number, post office box, or box number. Enter college, building, or post office branch as the address if no other mailing address is given. If there is no address information, the literal "NONE" must be entered in the Street Address field.
2. Do not use the "#" symbol, "No.", or "Number" as a prefix to an apartment, house, P.O. Box, or route.
3. Always add "ST", "ND", "RD", "TH" to a numbered street or avenue. Examples: 1 = 1ST; 2 = 2ND; 3 = 3RD, etc.
4. Enter one-half as 1/2 (no spaces).
5. Plurals for apartment, avenue, road, street, etc., are entered as APTS, AVES, RDS, STS, etc.
6. Replace a period with a space.
7. For military overseas addresses, enter the letters "APO" or "FPO" in the first three left-most positions of the City field. Refer to Attachment 4 for list of valid APO/FPO City/State/Zip Codes.
8. Words may be abbreviated unless the word is a proper name. Refer to Attachment 2 for list of acceptable abbreviations.

Examples:

Enter as:

| | |
|--------------------|--------------|
| 3 Ave. | 3RD AVE |
| Circle Drive | CIRCLE DR |
| Lane Building | LANE BLDG |
| Northeast Street | NORTHEAST ST |
| South Court Street | S COURT ST |
| Third Street | THIRD ST |

SECTION 7 - FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.04 Name Line 2 Format

Name Line 2 (SEQ 0070) of Form 1040/1040A/1040EZ is used for a street address that requires two lines or for an "in care of" address.

An "in care of" address must be indicated by a percent (%) character, followed by a space, followed by the name of the person who is in care of the delivery.

Example 1: Mr. John Jones
In care of Alice B. Smith
801 Brown St.

Enter As: JOHN JONES (Primary First Name, Primary Last Name)
% ALICE B SMITH (Name Line 2)
801 BROWN ST (Street Address)

If two addresses are present, enter the actual mailing address in the Street Address field. Enter the post office box in the Street Address field only if the post office does not deliver mail to the street address. The remaining address should be entered in the Name Line 2 field. Do not enter a post office box in the Name Line 2 field.

Example 2: Mr. John Jones
80 Erie Street Apartment 5
Great Lakes Resort

Enter As: JOHN JONES (Primary First Name, Primary Last Name)
GREAT LAKES RESORT (Name Line 2)
80 ERIE ST APT 5 (Street Address)

Example 3: Mr. John Jones
1 Lost Way
P.O. Box 1502

Enter As: JOHN JONES (Primary First Name, Primary Last Name)
1 LOST WAY (Name Line 2)
PO BOX 1502 (Street Address)

Example 4: Mr. John Jones
P.O. Box 150
State University

Enter As: JOHN JONES (Primary First Name, Primary Last Name)
STATE UNIVERSITY (Name Line 2)
PO BOX 150 (Street Address)

SECTION 7 - FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.05 Business Name Controls for Forms W-2, W-2G, W-2GU, 1099-R, 2441 and Schedule 2

The business Name Control consists of four alpha and/or numeric characters. The ampersand (&) and hyphen (-) are the only special characters permitted in the Name Control. The Name Control can have fewer than four characters. Blanks may be present only as the last two positions of the Name Control.

1. Individuals (Sole Proprietorships)

Always use the first four characters of the individual's (sole proprietor's) last name.

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|---|---------------------|
| Arthur P. <u>Aspen</u> | ASPE |
| Jane & Mark <u>Hemlock</u> The Sunshine Cafe | HEML |
| John and Mary <u>Redwood</u> | REDW |

2. Estates

Always use the first four characters of the last name of decedent. The last name of the decedent may be followed by the word "Estate" in the first name line.

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|---|---------------------|
| Estate of Jay <u>Gold</u> | GOLD |
| Homer J. <u>Maroon</u> Estate | MARO |
| Frank <u>White</u> Estate Alan Baker Exec. | WHIT |

SECTION 7 - FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.05 Business Name Controls for Forms W-2, W-2G, W-2GU, 1099-R, 2441 and Schedule 2 continued

3. Partnerships

Determine the Name Control using the following order of selection:

- a. Derive the Name Control for partnership entities from the trade or business name of the partnership. Omit the word "The" when it is followed by more than one word. Include the word "The" when it is followed by only one word.

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|---|---------------------|
| <u>Alabaster</u> Group B.J Fuschia, M.L. Magenta, & R. T . Indigo Ptrs. | ALAB |
| The <u>Green</u> Parrot | GREE |
| Harold J. Crimson & Bernard L. Ochre et at Ptr. <u>Howard Azure</u> Development Co. | HOWA |
| W.P Plum & H.N. Lavender dba <u>P & L Pump</u> Co. | P&LP |
| <u>Rose</u> Restaurant | ROSE |
| <u>The Blues</u> | THEB |
| <u>Violet Drywall</u> Finishers William Wheat, Gen. Ptr | VIOL |

- b. If no trade or business name is present, derive the Name Control from the surname of the first listed partner.

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|---|---------------------|
| <u>Burgundy</u> , Olive & Cobalt, Ptrs. | BURG |
| Bob <u>Orange</u> & Carol Black | ORAN |
| G.H. <u>Orchid</u> et al Ptrs. | ORCH |
| A.B., C.D., & E.F. <u>Turquoise</u> | TURQ |

SECTION 7 - FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.05 Business Name Controls for Forms W-2, W-2G, W-2GU, 1099-R, 2441 and Schedule 2 continued

4. Corporations

- a. Use the first four significant characters of the corporation name.

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|--------------------------------------|---------------------|
| <u>11th</u> Street Inc. | 11TH |
| <u>Falcon</u> Field Plow Inc. | FALC |
| <u>J.R.</u> Oriole Inc. | JROR |
| <u>P & P</u> Company | P&PC |
| <u>Purple</u> Martin Ltd. | PURP |
| <u>RS</u> Corporation | RSCO |
| <u>Whippoorwill</u> Homeowners Assn. | WHIP |
| <u>Y-Z</u> Drive Co. | Y-ZD |
| <u>ZZZ</u> Club | ZZZC |

- b. When determining a corporate Name Control, omit the word "The" when it is followed by more than one word. Include the word "The" when it is followed by only one word.

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|--------------------------------|---------------------|
| The <u>Meadowlark</u> Co. | MEAD |
| <u>The</u> Swan | THES |

SECTION 7 - FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.05 Business Name Controls for Forms W-2, W-2G, W-2GU, 1099-R, 2441 and Schedule 2 continued

- c. If an individual name contains the following abbreviations, use corporate Name Control rules.

SC - Small Corporation
PA - Professional Association
PC - Professional Corporation
PS - Professional Service

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|--------------------------------|---------------------|
| <u>Carl</u> Sandpiper M.D.P.A. | CARL |
| <u>John</u> Waxwing PA | JOHN |
| <u>Sam</u> Sparrow SC | SAMS |

- d. When the organization name contains the word "Fund" or "Foundation," corporate rules still apply.

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|-------------------------------------|---------------------|
| The <u>Joseph</u> Eagle Foundation | JOSE |
| <u>Kathryn</u> Canary Memorial Fdn. | KATH |

- e. Corporate Name Control rules apply to local governmental organizations and to chapter names of national fraternal organizations.

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|---|---------------------|
| <u>City</u> of Fort Hulsache Board of Commissioners | CITY |
| <u>House</u> Assn. Of Beta XI Chapter of Omicron Delta Kappa | HOUS |
| <u>Rho</u> Alpha Chapter Epsilon Alpha Tau Fraternity | RHOA |
| <u>Waxwing</u> County Employees Association | WAXW |

SECTION 7 - FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.05 Business Name Controls for Forms W-2, W-2G, W-2GU, 1099-R, 2441 and Schedule 2 continued

5. Trusts and Fiduciaries

Derive the Name Control from the name of the trust, using the following order of selection:

- a. For individuals, use the first four characters of the last name.

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|---|---------------------|
| Richard L. <u>Aster</u> Charitable Remainder Unitrust | ASTE |
| Testamentary Trust U/W Margaret <u>Balsam</u> Cynthia Ivy & Laura Iris | BALS |
| Donald C. <u>Begonia</u> Trust FBO Mary, Karen, & Michael Violet | BEGO |
| Jonathan <u>Periwinkle</u> Irrevocable Trust FBO Patrick Redwood Chestnut Bank TTEE | PERI |

- b. For corporations, use the first four characters of the corporate name.

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|--|---------------------|
| <u>Daisy</u> Corp. Employee Benefit Trust | DAIS |
| <u>Marigold</u> Association Charitable Lead Trust | MARI |
| <u>Morningglory</u> Church Endowment Trust John J. Waxbean, Trustee | MORN |

SECTION 7 - FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.05 Business Name Controls for Forms W-2, W-2G, W-2GU, 1099-R, 2441 and Schedule 2 continued

- c. For numbered trusts and GNMA Pools, use the first digits of the trust number disregarding any leading zeros and/or trailing alpha characters. If there are fewer than four numbers, use the letters "GNMA" to complete the Name Control.

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|---|---------------------|
| GNMA Pool No. 00 <u>100</u> B | 100G |
| ABCD Trust No. 00 <u>1036</u> , Lotusbank TTEE | 1036 |
| Trust No. <u>12190</u> , FBO Margaret Lily 00 <u>20</u> , <u>GNMA</u> POOL | 1219 20GN |

- d. If none of the above information is present, use the first four characters of the last name of the trustee (TTEE) or beneficiary (FBO).

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|---|---------------------|
| Testamentary Trust Edward <u>Bluebell</u> TTEE | BLUE |
| Trust FBO The <u>Cherryblossom</u> Society | CHER |
| Trust FBO Eugene <u>Eucalyptus</u> | EUCA |
| Michael <u>Tulip</u> Clifford Trust | TULI |

Note: "Clifford Trust" is the name of a type of trust.

SECTION 7 - FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.05 Business Name Controls for Forms W-2, W-2G, W-2GU, 1099-R, 2441 and Schedule 2 continued

6. Other Organizations

- a. The only organization that will always be abbreviated is Parent Teachers Association (PTA). The Name Control is "PTA" plus the first letter of a State, whether or not the state name is present as part of the name of the organization.

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|--|---------------------|
| Parent Teachers Association of San Francisco | PTAC |
| Parent Teachers Association Congress of Georgia | PTAG |

- b. If the business name contains an abbreviation other than "PTA," the Name Control is the first four characters of the abbreviated name.

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|--------------------------------|---------------------|
| A.I.S.D | AISD |
| R.S.V.P. Post No.245 | RSVP |

- c. The Name Control is the first four characters of the national title.

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|---|---------------------|
| Local 210 International Canary Assn. | INTE |
| Laborers Union, AFL-CIO | LABO |
| Post 3120, Veterans of Space Wars of U.S. Dept. of Georgia | VETE |

SECTION 7 - FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.05 Business Name Controls for Forms W-2, W-2G, W-2GU, 1099-R, 2441 and Schedule 2 continued

- d. When an individual name and corporate name appear, the Name Control is the first four letters of the corporate name.

Example:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|--|---------------------|
| Barbara J. Zinnia <u>ZZ</u> <u>G</u> rain Inc. | ZZGR |

- e. For churches and their subordinates (i.e., nursing homes, hospitals), derive the Name Control from the legal name of the church.

Examples:

| <u>Name Control Underlined</u> | <u>Name Control</u> |
|--|---------------------|
| <u>St. Bernard's</u> Methodist Church <u>Bldg.</u> Fund | STBE |
| Diocese of Kansas City <u>St.</u> <u>R</u> ose's Hospital | STRO |
| <u>St.</u> <u>S</u> ilver's Church Diocese of <u>Larkspur</u> | STSI |

.06 Foreign Employer/Payer Address on Forms W-2/W-2G/W-2GU/1099-R

1. Employer/Payer Name Line 2: Foreign Street Address - If none, enter "NONE".

Employer/Payer Address: Foreign city, province or postal code.

Employer/Payer City: Foreign country name. Do not abbreviate the country name.

Employer/Payer State: Period (.) .

2. Employee, Recipient/Winners with Foreign Address on Form W-2/W-2G/1099-R

Employee/Recipient/Winner Street Address: Foreign Street Address. If none, enter "NONE".

Employee/Recipient/Winner Address Continuation: Foreign city, province or postal code

Employee/Recipient/Winner City: Foreign Country Name. Do not abbreviate country name unless absolutely necessary.

Employee/Recipient/Winner State: Enter Period (.) .

INTENTIONAL BLANK PAGE

SECTION 8 - STATEMENT RECORDS

.01 General Information

Statement Records are transmitted as part of the tax return and can only be used when the Field Description in the Record Layouts contains "STMbnn". Statement Records follow the Tax Form, Schedules, Forms and Authentication Records and precede the Preparer Note, Election Explanation, Regulatory Explanation, State and Summary Records.

The record layouts for Form 5471, Form 5713 and especially Form 8865 and associated schedules contain statement references identified as "Global". These statement fields are usually found at the end of the data for a page of the form, right before the Record Terminus character. These statements are to be used to enter any data for statements/attachments that are referenced on the form or in the form instructions but do not have their own separate "Statement" field within the record layout.

See Section 10.02 for Error Reject Codes pertaining to Statement Records.

See Part II Record Layouts for the fields that can contain "STMbnn" and to determine how the data fields should be formatted.

See Part II Record Layouts Section 5 for the Statement Record Layout.

.02 Types of Statement Records

There are two types of Statement Records:

1. **Optional Statement Records** are used only when there are not enough occurrences in the Record Layouts for all the occurrences of a field needed for a particular schedule or form. An optional Statement Record must contain at least four Statement Lines. Fields that can contain a reference to an optional Statement Record are identified in the Record Layouts by an asterisk (*) before the Field Sequence Number. Related fields, which are identified by a plus sign (+), must be included in the Statement Record.

Example:

A taxpayer files Schedule A to claim a deduction for three types of other taxes paid, but the Record Layout for Line 8 of Schedule A only allows for one occurrence of "Other Taxes Type" (SEQ *0130) and "Other Taxes Amount" (SEQ +0135). A statement reference is entered in the field "Other Taxes Type" (SEQ *0130) of Schedule A, and each Statement Line (03-05) of the corresponding Statement Record will contain the type and amount for each of the other taxes paid.

2. **Required Statement Records** are used only when a statement of explanation is necessary. A required Statement Record must contain at least three Statement Lines and the second line must be blank. Fields that can contain a reference to a required Statement Record are identified in the Record Layouts by an at-sign (@) before the Field Sequence Number. Unlike optional statement fields, which can contain either data or a statement reference, required statement fields can contain a statement reference only.

SECTION 8 - FORMATS FOR STATEMENT RECORDS

.02 Types of Statement Records continued

Example:

A taxpayer files Schedule A to claim a deduction for interest paid on a mortgage by the taxpayer and another person, but the Form 1098 was received by the other person. The taxpayer is required to provide the name and address of the other person. A statement reference is entered in the field "Form 1098 Name/Address" (SEQ @0165) of Schedule A, and the name and address are entered in Statement Line 03 of the corresponding Statement Record.

.03 Statement Record Format

1. Each line of a Statement Record is counted as a separate record and must contain the Byte Count, Start of Record Sentinel, Record ID Group (Fields 0000 through 0006), Statement Data (Field 0010) and the Record Terminus Character. Each line is a fixed-sized record of 123 bytes whether transmitting in fixed or variable format. Delimiters "[" and "]" are not used on statement records.
2. Each statement line of the Statement Record contains the 80-character Statement Data.

When the total length of the related fields is less than 80 characters, the line must be blank-filled to equal the length of 80 characters.

When the total length of the related fields exceeds the 80-character length of the Statement Data (Field 6) of the Statement Record, the information must be provided in two parts. The second part is actually a separate "continuation" Statement Record, which requires a separate statement reference and statement number. Fields that can contain a reference to continuation statement record are identified by an asterisk and a plus sign (+) before the Field Sequence Number.

3. The individual data fields of Statement Records are not keyed to Field Sequence Numbers. Therefore, all data fields must be formatted as fixed length fields, so that the data will appear in the correct positions. If a field contains no data, it must be blank-filled or zero-filled, as appropriate.
4. Each Statement Reference on the tax return must have a corresponding Statement Record.
5. The total number of Statement Records cannot exceed the total number of Statement References entered in the tax return.

SECTION 8 - FORMATS FOR STATEMENT RECORDS

.03 Statement Record Format continued

6. A maximum of 30 Statement References can be entered in a tax return.
7. A Statement Record can contain a maximum of two pages. The first page can contain a maximum of 50 lines. The second page can contain a maximum of 49 lines. There is an absolute limit of 999 statement lines permitted for each tax return.

When the second page of a Statement Record is used, data fields are entered on the first line (LN51) of Page 02 in the same format used for lines 03 - 50 of Page 01.

Note: If desired, the line numbering for Page 02 can begin with "LN01", instead of "LN51"; however, do not enter titles and column headings in the first two lines of Page 02, regardless of the line numbering style used.

8. The Statement Reference and the corresponding Statement Record contain a Statement Number, which can equal any number from 01 to 99. The Statement Reference Numbers on the tax return must be in ascending numerical sequence and must be referenced in the same order as the transmission sequence of the schedules and forms. A Statement Number cannot be used more than once.

Note: Although Statement Numbers must be in ascending sequence, they do not have to be in consecutive numerical sequence.

9. The first line of the first page of a statement record (PG01 LN01) will contain a literal description (title) of the statement record. It is recommended that the name and page of the schedule or form precede any other descriptive information entered on this line (e.g., "SCHEDULE B PAGE 1 Schedule B Interest Income").
10. An optional statement record must contain at least four lines. The second line of the first page of an optional statement record (PG01, LN02) contains the column headings from the schedule or form (e.g., "ST PROP DESCRIP", "DATE.."), with the headings spaced as they would appear on the printed form).
11. Each subsequent line of an optional statement record (LN03 to LN99) contains the related data fields in the format in which they appear in the record layouts. It is imperative that the data fields are entered in the statement record with the exact length and format defined in the record layouts.
12. A required statement record must contain at least three lines. The second line of a required statement record (LN02) must be blank.
13. Each subsequent line of a required statement record is used as needed for a narrative statement of explanation or to supply any additional information required.

SECTION 8 - FORMATS FOR STATEMENT RECORDS

.04 Examples of Optional Statement Records

1. Optional Statement Record - Page 01 and Page 02 (Fixed or Variable Format)

The following example includes Page 01 and Page 02 of a Statement Record for Schedule B. The Statement Reference Number "STM 01" is entered in the field "Interest Payer 1" (*SEQ 0030) of Schedule B.

Page 01 Line 01:

```
-----1-----2-----3-----4-----5-----6
0123****STM 01      PG01 333003333 LN01      bbbbbbbbbbbbbbbbbbb
SCHEDULE B INTEREST INCOME bbbbbbbbbbbbbbbbbbb
bb#
```

Line 01 of Page 01 contains the name (and page number if present) of the schedule or form and a title describing the information contained in the statement record. Blanks may be placed before the text in Line 01 to "center" the title.

Page 01 Line 02:

```
-----1-----2-----3-----4-----5-----6
0123****STM 01      PG01 333003333 LN02      bbbbbbbbbbbbbbbbbbb
INTEREST PAYER bbbbbbbbbbbbbbbbbbb AMOUNT bbbbbbbbbbbbbbbbbbb
bb#
```

Line 02 of Page 01 contains column titles (headers) for an Optional Statement Record. The spacing of the column titles is determined by the filer, allowing for easy readability.

Page 01 Line 03:

```
-----1-----2-----3-----4-----5-----6
0123****STM 01      PG01 333003333 LN03      FIRST NATIONAL BAN
K bbbbbbbbbbbbbbbbbbb 00000000350 bbbbbbbbbbbbbbbbbbb
bb#
```

Line 03 is the first line containing data for individual fields. The data fields are entered in the statement lines as they would be entered on the schedule or form. In this example, the first data field is alphanumeric with a length of 50 characters. The information for this field equals 19 characters, including embedded blanks, so the remaining 31 characters are blank-filled.

The next data field is a signed numeric field with a length of 12 characters. A money amount field must contain 11 numeric characters followed by a blank for a positive amount, or by a minus sign for a loss. In this example, the value of the money amount is 350, so the entry is right-justified and zero-filled with eight zeros, allowing for a blank in the 12th position.

The total of the maximum lengths of the two data fields in this example equals 62 characters (50 + 12). The length of the Statement Data must equal 80 characters, so 18 blanks follow the last character of the second data field.

SECTION 8 - FORMATS FOR STATEMENT RECORDS

.04 Examples of Optional Statement Records continued

Page 01 Line 04:

```
-----1-----2-----3-----4-----5-----6
0123****STM 01      PG01 333003333 LN04  LOTS OF MONEY MARK
ETbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbb00000000200 bbbbbbbbbbbbbbbb
bb#
```

Lines 04 - 50 of Page 01 are used to report additional interest.

Page 01 Line 50:

```
-----1-----2-----3-----4-----5-----6
0123****STM 01      PG01 333003333 LN50  CREDIT UNIONbbbbbb
bbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbb00000004800 bbbbbbbbbbbbbbbb
bb#
```

In this example, interest has been received from more than 48 payers, so Page 02 of the same Statement Record will be used.

Page 02 Line 51:

```
-----1-----2-----3-----4-----5-----6
0123****STM 01      PG02 333003333 LN51  FORTY NINE SAVINGS
AND LOANbbbbbbbbbbbbbbbbbbbbbbbb00000006000 bbbbbbbbbbbbbbbb
bb#
```

Data fields are entered on the first line (LN51) of Page 02 in the format used for lines 03 - 50 of Page 01. Although "LN51" is used as the number of the first line of Page 02 in this example, the line numbering for Page 02 can begin with "LN01", if desired. In either case, do not enter titles and column headings in the first two lines of Page 02.

Lines 51 - 99 (or 01 - 49) of Page 02 are used as needed.

SECTION 8 - FORMATS FOR STATEMENT RECORDS

.04 Examples of Optional Statement Records continued

2. Optional Statement Record (Fixed or Variable Format)

The following is an example of the first part of a two-part Statement Record for Schedule E Page 2 Part III. The second part is actually a separate Statement Record with its own Statement Reference Number, but is referred to as a "continuation" Statement Record.

For the first part of the Statement Record in this example, the Statement Reference Number "STM 02" is entered in the field "Estate/Trust Name A" (*SEQ 1790) of Schedule E.

Line 01:

```
-----1-----2-----3-----4-----5-----6
0123****STM 02      PG01 444004444 LN01  SCHEDULE E PAGE 2

```

SECTION 8 - FORMATS FOR STATEMENT RECORDS

.05 Reporting Money Amount Fields and Totals

The following "total" fields on the tax form, schedules, and forms should reflect the total of the money amount fields reported on the related Statement Record. If a Statement Record is not present, the applicable money amount should be entered in the specific field and repeated in the "total" field.

| <u>Schedule/Form</u> | <u>SEQ #</u> | <u>Identification</u> |
|----------------------|--------------|--|
| Form 1040 Page 1 | 0590 | Total Other Income |
| | 0697 | Total Alimony Paid |
| | 0735 | Total Other Adjustments |
| Form 1040 Page 2 | 1136 | F8882 Literal |
| Schedule A | 0140 | Total Other Taxes Amount |
| | 0410 | Total Unreimbursed Employee Business Expense Amount |
| | 0435 | Total Other Expenses |
| | 0495 | Total Other Expenses |
| Schedule B | 0025 | Total Seller Financed Mortgage Amount |
| Form 6198 | 0040 | Total Other Gain/Loss |

SECTION 9 - VALIDATION - TRANSMISSION RECORDS

Balance Due Returns and Refund Returns can be included in the same transmission.

If any of the following reject conditions exist in a Transmission Record, the entire transmission will be rejected.

For detail description of Error Reject Codes, see Publication 1346 Attachment 1.

.01 General Transmission Reject Conditions

ERC 0805, 0823, 0825

.02 TRANS Record A (TRANA) Reject Conditions

ERC 0439, 0824

.03 RECAP Record Reject Conditions

ERC 0830, 0831, 0832, 0840

INTENTIONAL BLANK PAGE

SECTION 10 - VALIDATION - TAX RETURN

.01 General Reject Conditions

For detail description of Error Reject Codes, see Publication 1346 Attachment 1.

ERC 0001, 0010, 0014, 0030, 0033, 0034, 0035, 0044, 0045, 0500, 0501, 0502, 0503, 0504, 0505, 0506, 0507, 0508, 0509, 0510, 0511, 0512, 0513, 0514, 0515, 0516, 0517, 0520, 0521, 0524, 0525, 0526, 0527, 0528, 0600, 0999

.02 Statement Record Reject Conditions

SECTION 11 - VALIDATION - SPECIFIC SCHEDULES AND FORMS

The first **eight** sub-sections of Section 11 contain Error Reject Codes pertaining to the tax form, organized as follows:

- 11.01 **Tax Form** - Forms 1040, 1040A, 1040EZ and **1040-SS (PR)**
- 11.02 Forms 1040, 1040A and 1040EZ
- 11.03 Direct Deposit Information - Forms 1040, 1040A, and 1040EZ
- 11.04 Forms 1040 and 1040A only
- 11.05 Form 1040 only
- 11.06 Form 1040A only
- 11.07 Form 1040EZ only
- 11.08 **Form 1040-SS (PR)**

The remaining four sub-sections include Error Reject Codes for the following:

- 11.09 Specific Schedules
- 11.10 Specific Forms
- 11.11 Short Term Capital Gain/Loss (STCGL) and
Long Term Capital Gain/Loss (LTCGL)
- 11.12 Authentication Record
- 11.13 State Records
- 11.14 Summary Record

For detail description of Error Reject Codes, see Publication 1346, Attachment 1.

.01 Tax Form - Form 1040, Form 1040A, Form 1040EZ and 1040-SS (PR)

ERC 0001, 0004, 0006, 0007, 0016, 0019, 0020, 0021, 0022, 0023, 0024, 0071, 0105, 0126, 0233, 0234, 0299, 0531, 0532, 0610, 0611, 0612, 0613, 0614, 0615, 0767, 0770, 1014, 1119, 1156

SECTION 12 - FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.01 General Description

Federal/State Electronic Filing is a cooperative one-stop filing program between IRS and state tax administration agencies. This program allows the filing of both federal and state income tax returns through the IRS Electronic Filing System. This effort represents one of the Service's programs in support of burden reduction for the tax preparation community and the taxpayers they represent.

The IRS will function strictly as a "data conduit" for electronic state returns. The term "data conduit" defines a strictly controlled process to receive, temporarily store, and then provide correctly formatted state data to the state tax administration agency.

A. State-Only Filing

Any Federal/State e-file participant has the option of participating in State-Only e-filing. Taxpayers will have the choice of filing a State Return without the standard Form 1040 attached for the following instances:

- Previously rejected state e-file return
- State return input separately from Federal return
- Part-year resident state return
- Multiple state returns for one taxpayer
- Non-resident state returns
- Married filing separately with state, but filing jointly with Federal return

B. Federal/State e-file Returns with Foreign Addresses

IRS e-file accepts Federal/State e-file returns with Foreign Addresses, including the U.S. possessions of American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. These returns will be processed at the Austin Submission Processing Center.

Note: PR, GU, MP, AS, or VI are not considered foreign addresses. Please use the domestic address fields for these returns. However, they are processed at the Austin Submission Processing Center.

C. State Acknowledgements

The Internal Revenue Service provides State Acknowledgement service on its Front End Processing System known as EMS (Electronic Management System). Participating Federal States can transmit their State Acknowledgements to EMS for trading partners to pick up when they pick up their Federal Acknowledgement.

.02 Federal/State Filing - Participating States

Thirty-seven states and the District of Columbia will participate in the **2007** Federal/State e-file Program.

Each state will issue its own publications to detail the state's software specifications and testing requirements. Software developers will need to contact the appropriate state to obtain electronic filing publications. A roster of state electronic filing coordinators is included in Section 12 Subsection 13. Updated rosters of state coordinators will be available in the IRS Home Page and on the IRS Centralized Bulletin Board. Most states will place their specifications in the IRS Centralized Bulletin Board, Federal/State Library.

SECTION 12 - FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.03 Data Communications

All e-file returns will be transmitted to two transmission centers, Martinsburg Submission Processing Center (ECC-MTB) and Tennessee Computing Center (ECC-MEM). The data communications procedures described in Section 1 will be the same for transmitting Federal/State electronic returns as for transmitting federal electronic returns.

The following chart reflects the 38 participating Federal/States. Two states were realigned. Kansas and Missouri will be processed at Kansas City Submission Processing Center. Federal/State electronic returns are to be transmitted based on the following state home service center relationship.

| Home Service Center | Transmit Site | States Supported |
|---------------------|---------------|-------------------------------|
| Andover | ECC-MTB* | CT DC DE MD NJ NY PA RI VA VT |
| Austin | ECC-MTB | AR AL CO IA LA MS ND NE NM OK |
| Kansas City | ECC-MEM** | IL IN KS MI MO OH WI WV |
| Fresno | ECC-MEM | AZ HI ID MT OR UT |
| Philadelphia | ECC-MTB | GA KY NC SC |

IRS will reject Federal/State returns that are not submitted to the correct home service center. The correct home Submission Processing Center is always the center supporting the state of the taxpayer's residence. In other words, if it is a Federal/State electronic return, always transmit it to the home Submission Processing Center that supports the state. For federal returns only, the ERO should always transmit to supporting home service center. For Online federal returns, transmission should be based on taxpayer's address.

* ECC-MTB represents Martinsburg, West Virginia

** ECC-MEM represents Memphis, Tennessee

SECTION 12 - FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

04. Record Format General Description

The fifth series of federal records (after return, schedule, forms, and statement records) are the electronic state records. There are two different electronic state records, the "generic" and the "unformatted". A combination of these records make up the state return packet. The IRS record layouts for the generic and unformatted records are specified in the Part II Record Layouts.

The state records should be formatted following IRS and state specifications. All the tax information that the state requires is included in the state packet. The IRS does not augment the state packet in any way. The state records are considered logical records and all the specifications provided in Section 2 apply except for the following:

1. The counts entered in Number of Logical Records in Tax Return (SEQ 0040) and Number of Form Records (SEQ 0090) of the Summary Record must include a count for each state packet.
2. Increase the counts in Number of Logical Records in Tax Return (SEQ 0040) and Number of Form Records (SEQ 0090) by "1" for each state packet, whether there are one or ten records in the state packet. The IRS will reject the return if these counts are not accurate.

.05 File Format General Description

The Federal/State electronic filing process requires that participating electronic filers comply with the following file specifications:

1. A state packet cannot be filed without the associated federal return. The IRS will not accept more than one state packet per electronic return. The state packet can be associated with a federal refund, zero-balance or balance due return.
2. The state packet must be placed after the federal statement records and before the preparer notes record. Any other order will cause return rejection.

SECTION 12 - FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.06 File Format Fixed and Variable Length Options

Electronic filers can transmit Federal/State returns using the fixed or variable length options described in Section 2. State records transmitted to IRS using the variable format option are expanded by IRS into fixed format before the records are provided to the state. Some states require copies of the federal return within the unformatted state records. Since IRS expands these records to fixed format before they are provided to the state, in order for states to receive a "variable" format within the fixed format the following specifications apply to state records:

1. No data field in any state record should contain the following stream of characters or the return will be rejected by the Data Communications Subsystem:

****TRANA, ****TRANB, ****1040 PG01, ****RECAP, ****SUM.

2. State records must not contain the following data characters: "[" "]" "#" "*" within the state's variable format. These are reserved by the IRS for use as delimiters.
3. The following delimiters must be used to transmit the unformatted state records as variable to the state:

"{" instead of "[" and
"}" instead of "]" and
"\$" instead of "#" and
"!" instead of "*".

The hexadecimal representations of these characters are:

| <u>Symbol</u> | <u>ASCII Hex</u> | <u>Symbol</u> | <u>ASCII Hex</u> |
|---------------|------------------|---------------|------------------|
| [| 5B | } | 7B |
|] | 5D | } | 7D |
| # | 23 | \$ | 24 |
| * | 2A | ! | 21 |

4. The IRS Record Layouts for generic and unformatted records contain the only valid Field Sequence Numbers for IRS processing. Any Sequence Number transmitted that is not listed, or any Sequence Number transmitted that duplicates a prior Sequence Number will cause rejection.

.07 Types of Characters

The character specifications provided in Section 5 for ALPHA, NUMERIC, and ALPHANUMERIC apply to state records. The section "Special Cases for Special Characters" does not apply to state records. For example, each state may have requirements which are different from IRS requirements for formatting the taxpayer's name and address.

SECTION 12 - FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.08 Validation of State-Only Returns

1. State-Only return data will contain a Form 1040, Page 1 record, state return packet, and a Summary record. The State Abbreviation of the Form 1040 (SEQ 0087) must contain the value "SO", indicating that: (1) State-Only return data is attached, (2) State-Only processing will be performed, and (3) Form 1040, Page 2 and foreign 1040 processing will be bypassed.
2. The State-Only return should always be transmitted to the Center that supports that particular state. State-Only returns with Foreign addresses will be processed at Austin Submission Processing Center.
3. If the State Abbreviation (SEQ 0087) is equal to "SO" in variable format of the Form 1040 Page 1 record, then the highest sequence number present cannot be greater than the Address Indicator (SEQ 0097). If the State Abbreviation field is equal to "SO" in fixed format of the Form 1040 Page 1 record, then all fields beyond the Address Indicator field must be blank.
4. The Primary SSN of the State-Only 1040 record (SEQ 0010) must equal the SSN of the attached State generic record and the Taxpayer Identification Number of the Summary record (SEQ 0002).
5. The Primary SSN (SEQ 0010) and Primary Name Control (SEQ 0050) of State-Only 1040 record must match data from the IRS Master File.
6. The Secondary SSN (SEQ 0030) and Secondary Name Control (SEQ 0055) of State-Only 1040 record must match data from the IRS Master File.
7. The RECAP Record will contain a new count for the total number of State-Only returns (SEQ 0130).

.09 Validation of Federal/State e-file returns with Foreign addresses

1. Addresses from the U.S. possessions will be formatted as U.S. addresses. Addresses from the foreign countries will be formatted using new foreign country address fields.
2. All returns with a foreign address will be transmitted at the Austin Submission Processing Center.
3. The following IRS Error Reject Code is used exclusively for errors in the Foreign State return packet.

0419 STATE RECORD

State Record - If Address Indicator (SEQ 0097) on the Tax Return is equal to "3" (indicating a foreign country), then the following fields must be present: Foreign Street Address (SEQ 0077), Foreign City, State or Province, Postal Code (SEQ 0087), and Foreign Country (SEQ 0098); and the following fields cannot be present: Street Address (SEQ 0080), City (SEQ 0085), State Abbreviation (SEQ 0095) and Zip Code (SEQ 0100).

If Address Indicator (SEQ 0097) on the Tax Return is not equal to "3", then the following fields cannot be present: Foreign Street Address (SEQ 0077), Foreign City, State or Province, Postal Code (SEQ 0087), and Foreign Country (SEQ 0098).

0430 STATE RECORD

State Record - If State Abbreviation (SEQ 0095) equals "AS", "GU", "MP", "PR" or "VI"; or Address Ind SEQ (0097) on the State Only 1040 equals "3" it must be processed at Austin.

SECTION 12 - FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.10 Acknowledgement File for Federal/State-Only Transmissions

Each file of electronic returns transmitted by an electronic filer will normally be acknowledged within forty-eight hours of receipt and, if the Federal/State return is accepted, the state packet will be available to the State Agency from the Internal Revenue Service for retrieval within twenty-four hours of IRS Acknowledgement.

The ACK Key Record received by the transmitters will contain a State Packet Code. This code indicates whether a state packet was filed in conjunction with the accepted or rejected federal return. IRS acceptance of the federal return and receipt of the state packet **does not imply state Acknowledgement or acceptance of the state tax return.**

The State Packet Code in the ACK Key Record will be blank if there is no state packet associated with the federal return, or will consist of the two character state abbreviation contained in the State Code field of the generic record. This is the only field in the ACK Key Record that is changed due to the presence of a state return packet. The Expected Refund or Balance Due field, the Duplicate Code field, and EFT Code field refer only to the federal return.

The state records are identified in the ACK Error Record by the Form Record Id Type ("STbbbb"), and Form Number ("0001bb" or "0002bb") Page Number and Form/Schedule Number.

Once a state packet is available for state retrieval, filers need to contact the respective state to resolve taxpayer problems. Error resolution for state returns is the responsibility of the state tax administration agency. The IRS will purge state packets thirty days from IRS Acknowledgement of federal return acceptance. Electronic filers must contact the states to obtain state Acknowledgement of state return receipt.

.11 State Acknowledgement File Transmitted by State Agencies to EMS

The Internal Revenue Service provides State Acknowledgement service on its Front End Processing System, known as EMS (Electronic Management System). Participating Federal States can send their State Acknowledgements to EMS for trading partners to pick up when they pick up their Federal Acknowledgement.

There will be a new state abbreviation code in the State Acknowledgement Reference File Name extension. For example: "SSC", the first "S" represents state acknowledgement and the last two letters "SC" represents state abbreviation code for South Carolina.

NOTE: "Transmitter" in the outer envelope refers to the state (the state is a transmitter sending state ACKS to the IRS). "Transmitter" in the inner envelope refers to the tax return transmitter, the recipient of the State Acknowledgements.

1. The State will transmit state tax return acknowledgements in the IRS 120 byte format. The State Acknowledgements must be able to interface with EMS as outlined in Publication 1346 Part 1, Section 1, Data Communications.
2. The State will transmit Acknowledgement files to EMS with an outer TRANA, an outer TRANB, at least one inner TRANA, at least one inner TRANB, and at least one ACK Key Record, at least one inner RECAP, and an outer RECAP Record. It may contain zero or multiple ACK Error Records, The ACK Error Records can only be present when there is an accompanying ACK Key Record.

SECTION 12 - FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.11 State Acknowledgement File Transmitted by State Agencies to EMS continued

3. The Acknowledgement file transmission may consist of Acknowledgement files for multiple Trading Partners.
4. Field 0170 of the TRANA Record must be "Z" equal State Acknowledgement file.
5. If the transmission is successful, the state will receive a message, "Transmission file has been received with the following GTX Key:_____".
6. EMS will read and process the ETIN in Field 0060 of the "inner envelope" of the TRANA Record and place the Acknowledgement File in "Transmitters" outbound mailbox.
7. The Trading Partner will receive all acknowledgements that are in status Waiting TP Delivery when the Trading Partner receives acknowledgements, whether the source is Federal or State.
8. Acknowledgements are archived 14 calendar days after Acknowledgements are picked up.
9. Transmitters must contact the State regarding rejections, taxpayer problems or any other questions that may arise about the state acknowledgement. See Section 12.19 of Publication 1346 for the State Agency contacts.
10. Transmitters/Trading Partners (TPs) should download, at least every five days, the Transmission Status Report to be sure they have received all of their Ack Files. If they are missing an ACK file and have the GTX key, they can call the IRS e-Help to rehang it. If they do not obtain the report, they need to call the State Help Desk to obtain the GTX key for a specific return's ACK file and then call IRS to rehang the specific file.
11. The State must download the State Transmission Report, at least every five days, and store every state and individual TPs GTX Key from the report and associate it with each Social Security Number. When a TP inquires about an ACK File for a specific return, the State Help Desk can give them the TPs GTX Key to be used when the TP calls IRS e-Help to re-hang an Ack File.

SECTION 12 - FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

11a. Processing and Validations of State Acknowledgement (Outer Envelope)

Note: Lower case "b" = blank

Outer TRANA:

- Byte Count Must be 120 bytes
- Start of Record Sentinel "*****"
- Record ID Field must be TRANAb (all caps)
- Field 0040 Processing Site
- Field 0060 (ETIN) must be valid in TPDS and must match ETIN in logon
- Field 0160 (Production-Test Code) must match T/P code in Transmitters profile data base
- Field 0170 (Transmission Type Code) must be a "Z" = State ACK
- Record Terminus Character must be a "#" sign

Note: Validation for Julian Day is not a requirement for States

Outer TRANB:

- Byte Count Must be 120 bytes
- Start of Record Sentinel "*****"
- Record ID Field must be TRANBb (all caps)
- Record Terminus Character must be a "#" sign

Outer RECAP:

- Byte Count Must be 120 bytes
- Start of Record Sentinel "*****"
- Record ID Field must be RECAPb (all caps)
- Field 0030 (Total Inner TRANA Count) must equal number of TRANA records in the (Inner Envelopes)
- Field 0040 ETIN must = TRANA ETIN Field 0060
- Field 0140 Acknowledgement File Name (GTX Key) for transmission must be blank (IRS will populate)
- Record Terminus Character must be a "#" sign

SECTION 12 - FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

11b. Processing and Validations of State Acknowledgement (Inner Envelope Format)

Inner TRANA:

- Byte Count Must be 120 bytes
- Start of Record Sentinel "*****"
- Record ID Field must be TRANAb (all caps)
- Field 0040 (Processing Site) must match valid processing site
- Field 0060 (ETIN) must match valid TP ETIN in Transmitter Profile Data Base
- Field 0160 (Production-Test Code) must be P or T; if Outer = T, then Inner must equal "T"
- Field 0170 (Transmission Type Code) must be "Z" = State Acknowledgement
- Record Terminus Character must be a "#" sign

Inner TRANB:

- Byte Count Must be 120 bytes
- Start of Record Sentinel "*****"
- Record ID must be TRANBb (all caps)
- Record Terminus Character must be a "#" sign

Inner ACK KEY:

- Byte Count Must be 120 bytes
- Record Sentinel "*****"
- Record ID Field must be ACKbbb (all caps)
- Field 0130 (State Packet Code) must be a valid 2 ltr state code
- Record Terminus Character must be a "#" sign

Inner ACK Error is Optional:

- Byte Count Must be 120 bytes
- Start of Record Sentinel "*****"
- Record ID Field must be ACKRbb (all caps)
- Record Terminus Character must be a "#" sign

Inner RECAP:

- Byte Count Must be 120 bytes
- Record Sentinel "*****"
- Record ID Field must be RECAPb (all caps)
- Field 0030 (Total ACK Key Count) must equal number of ACK Key Records
- Field 0040 (ETIN) must match Inner TRANA Field 0060 ETIN
- Field 0100 (Total ACK Error Count) must equal number of ACK Error Records
- Field 0140 Acknowledgement File Name (GTX Key) for transmission must be blank (IRS will populate) Record Terminus Character must be a "#" sign

SECTION 12 - FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.12 Transmission Status Report

A Transmission Status Report is available for States to download that will show the status of the Acknowledgement files when selected from the main menu. The State Report will show the "outer envelope" GTX Key of original State transmission, ETIN for each Acknowledgement file in the "inner envelope" GTX key assigned to trading partner's acknowledgement, and current status of each Acknowledgement.

The Trading Partner's report shows the status of their transmissions and acknowledgements.

The reports will show the last 5 calendar days of transactions for successfully processed files, showing what was picked up and not picked up by Trading Partners. Acknowledgements are archived 14 calendar days after Acknowledgements are picked up. Transmissions that are rejected will not be included in the report. If no data is available, you will receive a message, "No Data Available."

See Section 1 - Data Communications for more information about the Transmission Report.

SECTION 12 - FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.17 Validation of State Records

Most standard reject conditions for state records are listed in the preceding section. Additionally, filers must follow these specifications or the state record(s) could be rejected.

1. The state packet consists of the state generic record followed by all associated unformatted records for the taxpayer. A maximum of one state generic record, and zero to twenty-five unformatted records can be contained in a packet. Only one state packet is allowed per federal return.
2. A generic record must be present in each state packet. Only one generic record is allowed per state packet. The generic record must precede any unformatted records for that tax return.
3. An unformatted record is not required; however, up to twenty-five unformatted records are allowed per state return packet. If more than twenty-five are present, the entire return is rejected with Error Reject Code 0045.
4. The Header Section in the generic and unformatted records (SEQ 0000 through SEQ 0020) must be present.
5. The Record ID's in both the generic and unformatted records are checked for consistency. If inconsistent, the record is rejected. The Record ID consists of 26 characters, broken down as follows:

| | | |
|--------------------------------|---|--|
| Record ID Type | 6 | (Both Records "STbbbb") |
| Form Number | 6 | (Generic Record "0001bb" Unformatted Record "0002bb") |
| Page Number | 5 | (Both Records "PG01b") |
| Taxpayer Identification Number | 9 | N (Primary SSN) |
| Filler | 1 | blank |
| Form/Schedule Number | 7 | N (Generic "0000001" Unformatted "0000001 to "0000025") |

6. The State Code represents the taxpayer's residence state. The taxpayer's residence state may be different than the state of the taxpayer's address. State return packets are distributed to states based on the state code in the generic record. The state code must be a valid Federal/State Electronic Filing state. Valid states in Tax Year **2007** are:

| | | |
|--------------------|--------------------|--------------------|
| Alabama.....AL | Kansas.....KS | New York.....NY |
| Arkansas.....AR | Kentucky.....KY | North Carolina..NC |
| Arizona.....AZ | Louisiana.....LA | Ohio.....OH |
| Colorado.....CO | Maryland.....MD | Oklahoma.....OK |
| Connecticut....CT | Michigan.....MI | Oregon.....OR |
| Washington DC...DC | Mississippi....MS | Pennsylvania....PA |
| Delaware.....DE | Missouri.....MO | Rhode Island....RI |
| Hawaii.....HI | Montana.....MT | South Carolina..SC |
| Georgia.....GA | North Dakota....ND | Utah.....UT |
| Idaho.....ID | Nebraska.....NE | Vermont.....VT |
| Illinois.....IL | New Jersey.....NJ | Virginia.....VA |
| Indiana.....IN | New Mexico.....NM | West Virginia...WV |
| Iowa.....IA | | Wisconsin.....WI |

The state code must be consistent throughout the generic record and all associated unformatted records for the taxpayer.

SECTION 12 - FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.17 Validation of State Records continued

7. The State Direct Deposit/Direct Debit Section should be blank if there is no direct deposit or direct debit at the state level. There is no connection between the federal and state direct deposit or direct debit fields since these can differ. Taxpayers may elect to have the federal and state direct deposit or direct debits in the same account, or they can chose different accounts.
8. If there is an entry in the State Direct Deposit/Direct Debit Section the IRS will verify the state Routing Transit Number (RTN). If the state RTN is not listed on the current Financial Organization Master File (FOMF) an indicator will be set for the state's future use. The return will not be rejected.
9. The following Entity Section fields of the generic record must be significant or the returns will be rejected by the IRS: Name Line 1 (SEQ 0060), Address Line 1 (SEQ 0075), City (SEQ 0085), State Abbreviation (SEQ 0095), and Zip Code (SEQ 0100).
10. Any entry in the Consistency Section of the Generic Record, must equal the corresponding Federal Tax Form entry. If an entry is significant (i.e., not blank), it will be compared to the federal return. If a Consistency Section entry does not match the corresponding federal entry, the return will be rejected.

To the extent possible, the Sequence Numbers for Forms 1040, 1040A, and 1040EZ are the same for the equivalent fields. If no Sequence Number is given, the field does not exist for that form.

| Generic Record Consistency Section | 1040 | 1040A | 1040EZ |
|--|-------------------------|-------|------------|
| | ----Sequence Number---- | | |
| 0150 Federal Filing Status----- | 0130 | 0130 | (See note) |
| 0155 Total Federal Exemptions----- | 0355 | 0360 | (See note) |
| 0160 Wages, Salaries, Tips----- | 0375 | 0375 | 0375 |
| 0165 Taxable Interest----- | 0380 | 0380 | 0380 |
| 0170 Tax Exempt Interest----- | 0385 | 0385 | 0385 |
| 0175 Dividends----- | 0394 | 0394 | |
| 0180 State/Local Income Tax Refund----- | 0420 | | |
| 0185 Taxable Social Security Benefits----- | 0557 | 0557 | |
| 0190 Keogh Plan and SEP Deductions----- | 0650 | | |
| 0195 Adjusted Gross Income----- | 0750 | 0750 | 0750 |
| 0200 Standard/Itemized Deductions----- | 0789 | 0789 | |
| 0205 Earned Income Credit----- | 1180 | 1180 | 1180 |

Note: The Generic Record Federal Filing Status (SEQ 0150) and the Total Federal Exemptions (SEQ 0155) can contain an entry when the corresponding federal form is a Form 1040EZ and IRS will not reject the Federal/State return.

SEQ 0032 of the Generic Record is for IRS Use Only. IRS will populate this field.

SECTION 12 - FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.17 Validation of State Records continued

11. The numeric fields (SEQ 0350 - SEQ 0675), if not blank, will be checked for format.
12. The IRS will check the Declaration Control Number (DCN) in the federal Form 1040, 1040A, or 1040EZ against the Declaration Control Number (SEQ 0020) of the Generic and Unformatted Records and reject both the federal and state returns if these are not equal.
13. The IRS will check the Return Sequence Number (RSN) in the federal Form 1040, 1040A, or 1040EZ against the Return Sequence Number (SEQ 0023) of the Generic Record and reject both the federal and state returns if these are not equal.
14. The IRS will check all Federal/State returns for the following fields on Form(s) W-2: If "State Income Tax 1" (SEQ 0400) contains a positive value, then "State Name 1" (SEQ 0370) should contain a Standard Postal State Abbreviation. If "State Income Tax 2" (SEQ 0470) contains a positive value, then "State Name 2" (SEQ 0440) should contain a Standard Postal State Abbreviation. If this is not done, both the federal and state returns will be rejected with Error Reject Code 0405.
15. If the federal return is an Online return, the associated state return must also be an Online return. IRS will check the Online-State-Return (SEQ 0049) indicator of the state Generic Record. If these do not match, the Federal/State return will be rejected.
16. The following IRS Error Reject Codes are used exclusively for errors in the state return packet:

0009 RESERVED

The unformatted state record in fixed format exceeds the maximum length.

0400 STATE RECORD

The Generic Record must be present in the state data packet.

An Unformatted Record was present without the Generic Record, or the Unformatted Record preceded the Generic Record.

0401 STATE RECORD - STATE CODE (SEQ 0010)

The State Code (SEQ 0010) in the Header Section of the Generic Record must be valid for the processing service center.

The State Code must be consistent throughout Generic and associated Unformatted Records for the return.

Exception: If State Abbreviation (SEQ 0095) of State Only Return equal "AS", "GU", "MP", "PR", or "VI" allow returns to be processed in Austin.

SECTION 12 - FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.17 Validation of State Records continued

0402 STATE RECORD - ENTITY SECTION

All "Required Entry" fields in the Entity Section of the Generic Record (SEQ 0060, 0075, 0085, 0095, 0100) must be present.

0403 STATE RECORD - CONSISTENCY FIELDS

Any entry present in the Consistency Section of the Generic Record must equal the corresponding federal Tax Form entry.

0404 STATE RECORD - DECLARATION CONTROL NUMBER (DCN)

The DCN (SEQ 0020) of the Generic Record must equal the DCN of the federal Tax Form.

The DCN (SEQ 0020) of the Generic Record must equal the DCN (SEQ 0020) of the Unformatted Record.

0405 STATE RECORD - FORM W-2 CHECK

Each Form W-2 associated with a State Record must contain a valid State Abbreviation in State Name (SEQ 0370, 0440) when there is a significant entry in State Income Tax (SEQ 0400, 0470).

0406 STATE RECORD

A valid two-digit EFIN Prefix Code is permitted, if not assigned to a processing site, when State Data is present; or when Processing Site equals "E" Austin and at least one of the following is present: Form 2555, Form 2555-EZ, Form 4563, Form 5074, Form 8689, Form 8833, Form 8854, Form 8891 and/or Form W-2GU; an Address Ind (SEQ 0097) of the Tax Form equal to "3"; a State Abbreviation (SEQ 0087) of the Tax Form equal to "AS", "GU", "MP", "PR", or "VI".

0407 STATE RECORD - RETURN SEQUENCE NUMBER (RSN)

The Return Sequence Number (RSN) (SEQ 0023) of the Generic Record must equal the RSN of the Federal Tax Form.

0408 STATE RECORD - ONLINE RETURN INDICATOR

When Online-State-Return (SEQ 0049) of the Generic Record is equal to "O", the Transmission Type Code (SEQ 0170) of the TRANS Record A (TRANA) must equal "O", and vice versa.

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

IRS has two electronic signature options available for taxpayers to sign their tax returns, the Self-Select PIN and Practitioner PIN methods.

Questions or comments regarding Section 13 should be sent to:

Internal Revenue Service

Johl Jamanow, W:CAS:SP:ES:I, NCFB **C5-351**

5000 Ellin Road

Lanham, MD 20706

Phone: (202) 283-**0407**

01. What is the Self-Select PIN Method?

The Self-Select PIN method is one option for taxpayers to use when signing their electronic tax return. The PIN is any five numbers (except ALL zeros) the taxpayer chooses to enter as their electronic signature. A PIN is needed for each taxpayer if filing a joint return, and each can choose any five numbers. If the taxpayer is filing through an Electronic Return Originator (ERO), or using Tax Preparation Software, the taxpayer Date of Birth and Prior Year Adjusted Gross Income (AGI) or Prior Year PIN from the original return must also be entered for authentication.

If the taxpayer agrees, it is acceptable for an ERO and/or software program to generate or assign the taxpayer PIN. The taxpayer consents to the ERO's choice by completing and signing an IRS e-file signature authorization containing the intended taxpayer PIN. The taxpayer PIN can be systemically generated or manually assigned into the electronic format and/or the signature authorization form. However, the ERO must receive the signature authorization signed by taxpayer(s) before they transmit the return or release it for transmission to the IRS.

See Questions and Answers for the Self-Select PIN Method at the end of this Section.

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

02. Taxpayer Eligibility Requirements for the Self-Select PIN Method

The following taxpayers are eligible to use this option:

- Taxpayers who are eligible to file Form 1040, 1040A, 1040EZ or **1040-SS (PR)** for Tax Year **2007**.
-|
- Taxpayers who did not file for Tax Year **2006**, but have filed previously. |
- Taxpayers who are age 16 or older on or before December 31, **2007**, who have never filed a tax return. |
- Primary taxpayers under age 16 who have filed previously.
- Secondary taxpayers under age 16 who have filed in the immediate prior year.
- Military personnel residing overseas with APO/FPO addresses.
- U.S. Citizens and resident aliens residing in the American Possessions of the Virgin Islands, Puerto Rico, America Samoa, Guam and Northern Marianas, or with foreign country addresses.
- Taxpayers filing a Form 4868 (extension of time to file) or Form 2350 (extension for certain U.S. citizens living aboard).
- Those who are filing on behalf of deceased taxpayers.

The following taxpayers are NOT eligible to participate:

- Primary taxpayers under age 16 who have never filed.
- Secondary taxpayers (spouse) under age 16 who did not file in the immediate prior year.
-|
- Taxpayers required to file the following forms, which must be attached to Form 8453, U.S. Individual Income Tax Declaration for an IRS e-file Return or Form 8453-OL, U.S. Individual Income Tax Declaration for an IRS e-file Online Return:
 - Form 1098-C, *Contributions of Motor Vehicles, Boats, and Airplanes* (or acceptable documentation/required donor documentation),
 - Form 3115, *Application for Change in Accounting Method*,
 - Form 3468, *Computation of Investment Credit*, if historical *Structure Certificate* is required,
 - Form 4136, *Credit for Federal Tax Paid on Fuels*, if certificate and/or reseller statement is required,
 - Form 5713, *International Boycott Report*,
 - Form 8283, *Noncash Charitable Contributions*, Section A, if statement(s) required, or Section B, *Donated Property*,
 - Form 8332, *Release of Claim to Exemption for Children of Divorced or Separated Parents*,
 - Form 8858, *Information Return of U.S. Persons with Respect to Foreign Disregarded Entities*,
 - Form 8864, *Biodiesel and Renewable Diesel Fuels Credit*, if Certificate and/or reseller statement is required,
 - Form 8885, *Health Care Tax Credit*, and
 - Schedule D-1, *Continuation Sheet for Schedule D (Form 1040)* (or acceptable substitute), if taxpayer elects not to include their transactions on the electronic STCGL or LTCGL records.

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

03. What is the Practitioner PIN method?

The Practitioner PIN method is another electronic signature option for taxpayers to e-file using a five digit PIN. The taxpayer chooses any five digits, except ALL zeros, as their PIN signature and must use an Electronic Return Originator (ERO) to e-file under this method. A PIN is needed for each taxpayer if filing a joint return, and each can choose any five numbers.

NOTE: The taxpayer's Date of Birth and Prior Year Adjusted Gross Income or Prior Year PIN are not required.

The Practitioner PIN method offers another signature option as well for EROs to use in preparing and transmitting Forms 1040, 1040A, 1040EZ, and **1040-SS (PR)** to IRS. In most cases, this method is totally paperless and eliminates the Form 8453.

If the taxpayer agrees, it is acceptable for an ERO and/or software program to generate or assign the taxpayer PIN. The taxpayer consents to the ERO's choice by completing and signing an IRS e-file signature authorization containing the intended taxpayer PIN. The taxpayer PIN can be systemically generated or manually assigned into the electronic format and/or the signature authorization form. However, the ERO must receive the signature authorization signed by taxpayer(s) before they transmit the return or release it for transmission to the IRS.

See Questions and Answers for the Practitioner PIN method at the end of this Section.

04. Taxpayer Eligibility Requirements for the Practitioner PIN Method

The following taxpayers are eligible to use this option:

- Taxpayers who are eligible to file Forms 1040, 1040A, 1040EZ or **1040-SS (PR)**.
- Military personnel residing overseas with APO/FPO addresses.
- U.S. citizens and resident aliens residing in the American Possessions of the Virgin Islands, Puerto Rico, America Samoa, Guam and Northern Marianas, or with foreign country addresses.
- Taxpayers filing a Form 4868 (extension of time to file).
- Those who are filing on behalf of deceased taxpayers.

The following taxpayers are NOT eligible to participate:

- Taxpayers required to file the following forms, which must be attached to Form 8453, U.S. Individual Income Tax Declaration for an IRS e-file Returns:
 - Form 1098-C, *Contributions of Motor Vehicles, Boats, and Airplanes, (or acceptable documentation/required donor documentation),*
 - Form 3115, *Application for Change in Accounting Method,*
 - Form 3468, *Computation of Investment Credit, if historic Structure Certificate is required,*
 - Form 4136, *Credit for Federal Tax Paid on Fuels, if certificate and/or reseller statement is required,*
 - Form 5713, *International Boycott Report,*
 - Form 8283, *Noncash Charitable Contributions, Section A, if statement(s) required, or Section B, Donated Property,*
 - Form 8332, *Release of Claim to Exemption for Children of Divorced or Separated Parents,*
 - Form 8858, *Information Return of U.S. Persons with Respect to Foreign Disregarded Entities,*
 - Form 8864, *Biodiesel and Renewable Diesel Fuels Credit, if Certificate and/or reseller statement is required,*
 - Form 8885, *Health Coverage Tax Credit, and*
 - Schedule D-1, *Continuation Sheet for Schedule D (Form 1040) (or acceptable substitute), if taxpayer elects not to include their transactions on the electronic STCGL or LTCGL records.*

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.05 Data Validation

The following information must be present for the taxpayer when using the Self-Select PIN option for e-file:

Primary Taxpayer:

Social Security Number
Name Control
Date of Birth
Prior Year Adjusted Gross Income (AGI) - AND/OR Prior Year PIN (prior to any adjustment or change by IRS)

NOTE: Taxpayers may provide both prior year AGI and PIN but must match one to be authenticated.

Spouse, When Married Filing Jointly:

Spouse Social Security Number
Spouse Name Control
Spouse Date of Birth
Prior Year Adjusted Gross Income (AGI) - AND/OR Prior Year PIN (prior to any adjustment or change by IRS)

Note: Taxpayers may provide both prior year AGI and PIN but must match one to be authenticated.

Special Circumstances:

If taxpayers filed a joint return for Tax Year **2006** and want to file separate returns for Tax Year **2007**, they will each enter the same AGI or their PIN from the **2006** joint return on their separate returns for Tax Year **2007**.

If taxpayers did not file jointly for Tax Year **2006**, they are required to provide their respective AGI amount or PIN.

If a return was not filed for Tax Year **2006**, the taxpayer is required to enter zero "0" in the AGI field. (Prior Year PIN field should be left blank)

If taxpayers filed Form 1040PR for Tax Year **2006**, the taxpayer is required to enter zero "0" in the AGI field. (Prior Year PIN field should be left blank)

Note: Taxpayers who filed their **2006** tax return after December 9, **2007**

are eligible to use the Self-Select PIN for e-file. However, these taxpayers will need to submit zeroes for their Adjusted Gross Income. In the event their return is rejected due to a mismatch of AGI, they can resubmit their return using their actual values. The extract creating the Self-Select PIN eligibles is created in December and due to processing constraints, late filers may or may not be included. Late filers can still use the Self-Select PIN.

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

05. Data Validation continued

Validation of Data:

Prior Year Adjusted Gross Income

The Prior Year AGI is entered in whole dollar amounts. There will be a one dollar tolerance level.

Date of Birth

An exact match on day, month and year against Social Security Administration records is required for all online returns with or without the Self-Select PIN usage. If a married filing jointly (MFJ) return is filed through a practitioner electronically and taxpayer(s) uses the Self-Select PIN(s) to sign their return, the date of birth for the primary taxpayer and spouse are required. However, their tax return will not reject if the Dates of Birth do not match. The Date of Birth Validity Code (Field 0117) will be present in the Acknowledgement Record. The Date of Birth Validity Code identifies whether validation of the Date of Birth (DOB) is required; and if the DOB is required, whether the DOB matched on the IRS File or not.

PIN

The Personal Identification Number (PIN) is self-selected or agreed to by the taxpayer. A PIN is required for the primary and secondary taxpayer. PIN is composed of 5 digits. All zeroes are not permitted. The spouse can use the same PIN as the primary. The PIN is used on the current year tax return as the taxpayer's signature.

Assignment of Taxpayer PIN

If the taxpayer agrees, it is acceptable for an ERO and/or software program to generate or assign the taxpayer PIN. The taxpayer consents to the ERO's choice by completing and signing an IRS e-file signature authorization containing the intended taxpayer PIN. The taxpayer PIN can be systemically generated or manually assigned into the electronic return format and/or the signature authorization form. However, the ERO must receive the signature authorization signed by the taxpayer(s) before they transmit the return or release it for transmission to IRS. This guideline refers to returns filed using the Self-Select or Practitioner PIN method.

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.06 IRS e-file Signature Authorizations

1. Form 8879, IRS e-file Signature Authorization, is used to authorize an Electronic Return Originator to enter the taxpayer's self-select personal identification number (PIN) as the taxpayer's signature on electronically filed Forms 1040, 1040A, 1040EZ and **1040-SS (PR)** income tax returns. Form 8879 is provided as a convenience when the taxpayer is unavailable or unable to return to the office, or it is inconvenient for the taxpayer to personally sign the electronically prepared income tax return.
2. If the taxpayer agrees, it is acceptable for an ERO and/or software program to generate or assign the taxpayer PIN. The taxpayer consents to the ERO's choice by completing and signing an IRS e-file signature authorization containing the intended taxpayer PIN. The taxpayer PIN can be systemically generated or manually assigned into the electronic format and/or the signature authorization form. However, the ERO must receive the signature authorization signed by taxpayer(s) before they transmit the return or release it for transmission to the IRS. This guideline refers to returns filed using the Self-Select or Practitioner PIN method.
3. The practitioner will provide Form 8879 to the taxpayer along with a copy of the completed tax return personally or by U.S. mail, private delivery service, e-mail, or an Internet web site. Upon review of their tax return, the taxpayer(s) complete Part II of Form 8879 with their PIN, signature and date. The taxpayer must return the form to the ERO either personally, by U.S. mail, private delivery service, or FAX transmission. The ERO must retain the completed Form 8879 as instructed on the form.
4. Form 8878, IRS e-file Signature Authorization on Application for Extension of Time to File, is used for taxpayers to authorize the ERO to enter the taxpayer's PIN on one of several extension of time to file applications processed through Electronic Transmitted Documents (ETD) programs. Form 8879 procedures above also apply to Form 8878.
5. Electronic Funds Withdrawals accompanying Form 4868 can be signed using the Practitioner PIN method. A Form 8878 must be completed by all taxpayers who use this method. Note that a signature is only required to authorize the funds withdrawal. There is no signature requirement for the Form 4868 itself. See Part III of this publication for additional information on ETD programs.
6. When finalized, Forms 8879 and 8878 and instructions for use with Tax Year **2007** e-file will be available on the IRS website, The Digital Daily, at www.irs.gov (click on "Forms and Pubs", then "Forms and Instructions"). Tax year **2007** forms will be posted on the website as soon as possible; however, they may not be available at the time this document is published.
7. Beginning Tax Year 2005, Forms 8879 and 8878 were revised to include the Electronic Funds Withdrawal (EFW) statement in the Part II. When either of these forms is used a separate EFW statement does not have to be provided to the taxpayer.
8. Exhibits of Forms 8879 and 8878 will be included in Publication 1345A, Filing Supplement for Authorized e-file Providers, Tax Year **2006**.

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.07 Jurat/Disclosure Guidelines

1. This section provides guidelines for the jurat/disclosure language that is to be included in software packages for electronically filed returns.
2. In all instances, the appropriate jurat/disclosure text must be provided to taxpayers prior to the presentation of fields used to enter signature(s) (e.g. PIN) and related authentication information (e.g. Date of Birth and Adjusted Gross Income).
3. It is imperative that all taxpayers who use the Electronic Funds Withdrawal feature are provided with the appropriate Electronic Funds Withdrawal (EFW) text for their review. Only the approved EFW text displayed in this publication is to be used. The approved EFW text (selection D1) is displayed separately and has not been included in samples for Jurat/Disclosure Version A-D provided.
4. Online software products must provide the capability for taxpayers to view the jurat/disclosure statements on the input screen.
5. When Form 8879 and 8878 is used, the Electronic Withdrawal statement is provided to the taxpayer in Part II of the form. See Section 13.06.
6. Software products intended for use by tax professionals may also provide functionality to print a graphic equivalent of the jurat/disclosure statements for taxpayers to sign as an alternative to viewing and signing the statement on the input screen. A graphic equivalent may be appropriate when the taxpayer will not be present to review the completed return in the presence of the ERO, and has elected to authorize the ERO to enter the taxpayer(s) Self-Select PIN(s).
7. The jurat/disclosure text selections are located in Section 13.08 of this document. Samples of the jurat/disclosure versions A-D are included in Section 13.09.
8. Certain Decedent returns Forms 1040, 1040A, and 1040EZ are accepted into e-file. Text Selection T8 must be included for decedent returns filed with Form 1310, Statement of Person Claiming Refund Due a Deceased Taxpayer. If both taxpayers on a jointly filed refund return are deceased, a Form 1310 and selection T8 must be completed for each decedent.
9. Use the guidelines below, and notes on the text selections for jurat entry field format.

| Jurat Entry Field Format Guidelines | | | |
|---|----------------|-------------------|--|
| Field | Length | Characters | Format/Notes |
| Dates - (e.g. signature dates, Date of Birth) | Eight | All numeric | MMDDYYYY <i>(must convert to YYYYMMDD for record layouts)</i> |
| Taxpayer's PIN | Five | All numeric | Cannot be all zeroes |
| ERO or Paid Preparer PIN | Eleven | All numeric | First six positions = Electronic Filing Identification Number (EFIN); last five positions = Self-Selected numerics |
| Money Fields | Twelve maximum | All numeric | Dollars ONLY, zero fill if no prior year AGI |

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.07 Jurat/Disclosure Guidelines continued

10. The following table includes the valid Jurat Disclosure Codes for electronically filed Tax Year **2006** Forms 1040, 1040A, 1040EZ and **1040-SS (PR)**.

The codes (e.g. P1,C1,T1) in the third column identify the possible selections for each jurat version.

11. Some text selections are required only when a specific condition exists. The jurat version display pages include a reference to these selections. Complete text is displayed on the page entitled "Special Condition Text Selections". Text for these selections MUST BE included when they apply to the taxpayer's filing situation. For example, include Selection D1 for all returns with an Electronic Funds Withdrawal (EFW), and use Selection T8 for decedent returns when a Form 1310 is attached. **NOTE: Decedent returns can not be filed on Form 1040-SS (PR).**

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATION

.08 Jurat Language Text Selections

1. This section identifies the various Perjury, Consent to Disclosure, and Electronic Funds Withdrawal (EFW) text selections (components) used to develop jurat language statements for electronic filing tax preparation software.
2. The software shall provide the capability to incorporate these statements into the appropriate jurat text for presentation to taxpayer(s) for their review.
3. Use the table in .06 above and the displays in this section to determine the appropriate components or building blocks to develop jurat statements for Form 1040 series returns.
4. Jurat language and related requirements used only for documents submitted through the Electronically Transmitted Documents (ETD) system are included in Part III of this document.

Perjury Statement Selections

Selection P1

Perjury Statement - use this selection when electronically filing Form 1040, 1040A, 1040EZ, or 1040-SS (PR) with Self-Select PIN

Perjury Statement

Under penalties of perjury, I declare that I have examined this return, (or request for refund) including any accompanying statements and schedules and, to the best of my knowledge and belief, it is true, correct, and complete.

Selection P2 (Reserved)

Selection P3 (ETD only) See Part III of this document

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.08 Jurat Language Text Selections continued

Consent to Disclosure Selections

A Consent to Disclosure is to be included on the screen for all electronically filed returns and documents.

Selection C1

Consent to Disclosure - use this selection for electronically filed Form 1040 Series returns

Consent to Disclosure

I consent to allow my Intermediate Service Provider, transmitter, or Electronic Return Originator (ERO) to send my return (or request for refund) to IRS and to receive the following information from IRS: a) an acknowledgement of receipt or reason for rejection of transmission; b) an indication of any refund offset; c) the reason for any delay in processing or refund; and, d) the date of any refund.

Selection C2 (ETD only) See Part III of this document

Selection C3

Consent to Disclosure - use this selection for electronically filed Form 1040 series returns that require taxpayers to file a Form 8453-OL signature document.

I consent to allow my intermediate service provider or transmitter to send my return (or request for refund) to the IRS and to receive the following information from the IRS: a) an acknowledgement of receipt or reason for rejection of transmission; b) an indication of any refund offset; c) the reason for any delay in processing the return or refund; d) notification that Form 8453-OL signature documents have not been received for the past two years, if required; and e) the date of any refund.

ERO Declaration

Selection E1

ERO Declaration and Signature - use this selection and ERO PIN entry when return (or request for refund) is transmitted by an Electronic Return Originator (ERO). For use with Self-Select and Practitioner PIN methods.

ERO Declaration

I declare that the information contained in this electronic tax return (or request for refund) is the information furnished to me by the taxpayer. If the taxpayer furnished me a completed tax return, I declare that the information contained in this electronic tax return is identical to that contained in the return provided by the taxpayer. If the furnished return was signed by a paid preparer, I declare I have entered the paid preparer's identifying information in the appropriate portion of this electronic return. If I am the paid preparer, under the penalties of perjury I declare that I have examined this electronic return, and to the best of my knowledge and belief, it is true, correct, and complete. This declaration is based on all information of which I have any knowledge.

ERO Signature

I am signing this Tax Return (or request for refund) by entering my PIN below.

ERO's PIN

(enter EFIN plus 5 Self-Selected numerics)

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.08 Jurat Language Text Selections continued

Electronic Funds Withdrawal Consent Selections

Include an Electronic Funds Withdrawal Consent statement only when taxpayer has selected the Electronic Funds Withdrawal option

Selection D1

Electronic Funds Withdrawal Consent for Forms 1040, 1040A, 1040EZ, or 1040-SS (PR) | Statement MUST BE included with all Electronic Funds Withdrawal (EFW) returns

Electronic Funds Withdrawal Consent

If applicable, I authorize the U.S. Treasury and its designated Financial Agent to initiate an ACH electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of my Federal taxes owed on this return and/or a payment of estimated tax, and the financial institution to debit the entry to this account. I further understand that this authorization may apply to future Federal tax payments that I direct to be debited through the Electronic Federal Tax Payment System (EFTPS). In order for me to initiate future payments, I request that the IRS send me a personal identification number (PIN) to access EFTPS. This authorization is to remain in full force and effect until I notify the U.S. Treasury Financial Agent to terminate the authorization. To revoke a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537 no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institutions involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment.

Note: As was revised for Tax Year 2005, Form 8879 (and 8878) now includes the Electronic Funds Withdrawal (EFW) consent language in Part II of each form. Many Software products are designed to include Form 8879 and 8878 (e.g. as required for Practitioner PIN method returns), if Form 8879 or 8878 is not used for an EFW return or document you must still provide EFW consent language to the taxpayer as above.

Selection D2 (ETD only) See Part III of this document

Selection D3 (ETD only) See Part III of this document

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.08 Jurat Language Text Selections continued

Taxpayer Signature Selections

Selection T1

Use this signature selection when filing a Form 1040, 1040A, 1040EZ, or 1040-SS (PR) and the Self-Select PIN method will be used to sign the return

I am signing this Tax Return/Form and Electronic Funds Withdrawal Consent, if applicable, by entering my PIN below.

Taxpayer's PIN: _____ Date: _ _ _ _ _
Taxpayer's Date of Birth: _____
Taxpayer's Prior Year Adjusted Gross Income: _ _ _ _ _ *
Taxpayer's Prior Year PIN: _ _ _ _ _ *
Spouse's PIN: _____
Spouse's Date of Birth: _____
Spouse's Prior Year Adjusted Gross Income: _ _ _ _ _ *
Spouse's Prior Year PIN: _ _ _ _ _ *

***NOTE:** Taxpayers may use either the AGI or PIN for authentication. If both are included in the record only one has to match IRS records.

Selection T2

Use this signature selection when filing a Form 1040, 1040A, 1040EZ, or 1040-SS (PR) Online and using Form 8453-OL to sign the return

I am transmitting this Tax Return and signing this Electronic Funds Withdrawal Consent, if applicable, by entering my Date of Birth below.

Taxpayer's Date of Birth (DOB): _ _ _ _ _ Date: _ _ _ _ _
Spouse's Date of Birth: _ _ _ _ _

I am signing this Tax Return (or request for refund) by entering my PIN below.

ERO's PIN

(enter EFIN plus 5 Self-Selected numerics)

Perjury Statement

Under penalties of perjury, I declare that I have examined this return, (or request for refund) including any accompanying statements and schedules and, to the best of my knowledge and belief, it is true, correct, and complete.

Consent to Disclosure

I consent to allow my Intermediate Service Provider, transmitter, or Electronic Return Originator (ERO) to send my return/form to IRS and to receive the following information from IRS: a) an acknowledgement of receipt or reason for rejection of transmission; b) an indication of any refund offset; c) the reason for any delay in processing or refund; and, d) the date of any refund.

Additional Statements may be required. See Special Optional Text Selections for Jurat/Disclosure Codes A - D in this section.

Electronic Funds Withdrawal Consent - The EFW language is to be included on Form 8879 that is required to be signed by the taxpayer.

Form 1310 Signature and Verification - Decedent returns with Form 1310 only.

I am signing this Tax Return and Electronic Funds Withdrawal Consent, if applicable, by entering my PIN below.

Taxpayer's PIN: _ _ _ _ _
Spouse's PIN: _ _ _ _ _

Date: _ _ _ _ _

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.09 e-file Jurat/Disclosure Text - Code A-D continued

Special Condition Text Selections Use with Jurat/Disclosure Codes A - D Tax Year 2007

The Special Condition Text Selections below are to be used with Jurat/Disclosure Code A - D as appropriate. These statements do not have to be provided to all taxpayers, but they **MUST** be provided when the Special Condition applies. The jurat language A - D displays on the previous pages refer to the text below but do not include the entire text in the display.

Selection D1

*Electronic Funds Withdrawal Consent for Forms 1040, 1040A, 1040EZ, and **1040-SS (PR)** | (Include this statement only with Electronic Funds Withdrawal returns if Form 8879 was not completed).*

Electronic Funds Withdrawal Consent

If applicable, I authorize the U.S. Treasury and its designated Financial Agent to initiate an ACH electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of my Federal taxes owed on this return and/or a payment of estimated tax, and the financial institution to debit the entry to this account. I further understand that this authorization may apply to future Federal tax payments that I direct to be debited through the Electronic Federal Tax Payment System (EFTPS). In order for me to initiate future payments, I request that the IRS send me a personal identification number (PIN) to access EFTPS. This authorization is to remain in full force and effect until I notify the U.S. Treasury Financial Agent to terminate the authorization. To revoke a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537 no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institutions involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment.

See additional information regarding the electronic funds withdrawal (EFW) consent under the selection D1 explanation in Section 13.08.

Selection T8 - Decedent Returns only with Form 1310 attached

Use this selection only for Form 1040, 1040A, or 1040EZ Decedent returns that are filed with a Form 1310, Statement of Person Claiming Refund Due a Deceased Taxpayer. If both taxpayers are shown as decedents on the return, two Forms 1310 are required, and T8 must be completed for each decedent.

Note: Form 1310 cannot be filed electronically with Form 1040EZ-T.

Form 1310 Signature and Verification

Completion of this section indicates that I am requesting a refund of taxes overpaid by or on behalf of the decedent. Under penalties of perjury, I declare that I have examined this Form 1310 claim, and to the best of my knowledge and belief, it is true, correct, and complete.

Signature of person claiming refund (35 character limit)

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

10. Validation of Electronic Signatures for e-file

The following Error Reject Codes are used for electronic signatures:

NOTE: Error reject code definitions can be found in Publication 1346, Attachment 1.

01. General Error Reject Code for Electronic Signature
ERC 0689 and 1150
02. Online PIN Error Reject Codes
ERC 0673, 0681, 0682 and 0696
03. Practitioner PIN Error Reject Codes
ERC 0695, 0697, 0698 and 0699
04. Self-Select PIN Error Reject Codes
ERC 0670, 0671 and 0694
05. The following error reject codes are valid for Online, Practitioner and Self-Select PIN methods:
ERC 0668, 0669, 0672, 0674, 0675, 0676, 0677, 0678, 0679, 0680, 0683, 0684, 1150 and 1155

Intentional Blank Page

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.11 Self-Select PIN Method Questions and Answers

1. What is the Self-Select PIN Method?

The Self-Select PIN (Personal Identification Number) method allows taxpayers to electronically sign their e-filed return by using a five-digit PIN as their signature. The five-digit PIN can be any five numbers except all zeros. The taxpayer will need to know their original prior year Adjusted Gross Income or PIN from their prior year (Tax Year **2006**) tax return and their Date of Birth or verification purpose. It eliminates the requirement for Form 8453, U.S. Individual Income Tax Declaration for an IRS e-file Return in most cases. When an electronic signature is chosen, no signature documents are required to be filed with the IRS.

2. Who is eligible to use the Self-Select PIN method to sign their return?

The following taxpayers are eligible to use the Self-Select PIN method:

- Taxpayers who are eligible to file Forms 1040, 1040A, 1040EZ, or **1040-SS (PR)** for Tax Year **2007**. |
- Taxpayers who did not file for Tax Year **2006**, but have filed previously. - |
- Taxpayers who are age 16 or older on or before December 31, **2007**, who have never filed a tax return. |
- Primary taxpayers under age 16 who have filed previously.
- Secondary taxpayers under age 16 who have filed in the immediate prior year.
- Military personnel residing overseas with APO/FPO addresses.
- U.S. Citizens and resident aliens residing in the American Possessions of the Virgin Islands, Puerto Rico, America Samoa, Guam and Northern Marianas, or with foreign country addresses.
- Taxpayers filing a Form 4868 (extension of time to file), or Form 2350 (extension for certain U.S. citizens living aboard).
- Those who are filing on behalf of deceased taxpayers.

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.11 Self-Select PIN Method Questions and Answers continued

3. Are there any taxpayers not eligible to use the Self-Select PIN method?

The following taxpayers are not eligible to use the Self-Select PIN method:

- Primary taxpayers under age 16 that have never filed.
- Secondary taxpayers (spouse) under age 16 that did not file in the immediate prior year.
- Taxpayers required to file the following forms, which must be attached to Form 8453, U.S. Individual Income Tax Declaration for an IRS e-file Returns or Form 8453-OL, U.S. Individual Income Tax Declaration for an IRS e-file Online Return:
 - Form 1098-C, *Contributions of Motor Vehicles, Boats, and Airplanes, (or acceptable documentation/required donor documentation),*
 - Form 3115, *Application for Change in Accounting Method ,*
 - Form 3468, *Computation of Investment Credit, if historic Structure Certificate is required,*
 - Form 4136, *Credit for Federal Tax Paid on Fuels, if certificate and/or reseller statement is required,*
 - Form 5713, *International Boycott Report,*
 - Form 8283, *Non-Cash Charitable Contributions, Section A, if statement(s) required, or Section B, Donated Property,*
 - Form 8332, *Release of Claim to Exemption for Children of Divorced or Separated Parents,*
 - Form 8858, *Information Return of U.S. Persons with Respect to Foreign Disregarded Entities,*
 - Form 8864, *Biodiesel and Renewable Diesel Fuels Credit, if Certificate and/or reseller statement is required,*
 - Form 8885, *Health Care Tax Credit, and*
 - Schedule D-1, *Continuation Sheet for Schedule D (Form 1040) (or acceptable substitute), if taxpayer elects not to include their transactions on the electronic STCGL or LTCGL records.*

4. How can the taxpayer get their original AGI or prior year PIN if they did not bring in last year's tax return or they are a new client?

The taxpayer may call the IRS toll free number at 1-800-829-1040. If they can provide certain information to the Customer Service Representative (such as their name, SSN and current address), they may receive the original AGI amount or prior year PIN over the phone or they may request a free transcript. Allow 7 to 10 days to receive the transcript. (Taxpayer should be sure to ask for the Original AGI.)

5. If the taxpayer has never filed a tax return or did not need to file a tax year **2006 return, what amount do they enter for the original AGI or prior year PIN?**

Enter zero ("0") for the original AGI. Do not leave this field blank. The return will reject if the field is left blank for a zero amount. However, the prior year PIN field should be left blank.

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.11 Self-Select PIN Method Questions and Answers continued

6. If the taxpayer changed filing status from their 2005 tax return, what Adjusted Gross Income (AGI) do I use?

If the change is to Married Filing Jointly, then each taxpayer will use their individual original total Adjusted Gross Income amount or PIN from their respective 2006 tax returns.

If the change is from Married Filing Jointly, then each taxpayers will use the same original total Adjusted Gross Income amount or PIN from the 2006 joint return.

7. What AGI amount should be used for a taxpayer that filed jointly with a different spouse in the prior year?

Use the AGI amount or PIN from the joint return filed with the ex-spouse.

8. What AGI amount should be used when one taxpayer of the joint return earned all the wages?

Both taxpayers on the joint return will use the total AGI amount from the originally filed return. The AGI amount should not be divided between the primary and the spouse.

9. If my client filed an amended tax return last year, what AGI amount or PIN should they use?

Your client must use the Original AGI amount or PIN from the originally filed return. The return will reject if the amended AGI amount is used.

10. If my client filed their prior year tax return after April 15, what AGI amount should they use?

If you clients' TY 2006 tax return was not received and processed by IRS by December 9, 2007, they must enter "0" (zero) as their AGI amount. In the event their return is rejected due to a mismatch of AGI, they can resubmit their return using their actual values.

11. If my clients' prior year AGI is negative what should they use?

If your client's prior year AGI is negative, they need to enter the AGI as a negative amount.

12. If the taxpayer does not want to use the PIN, can they still file their return electronically?

Yes, have the taxpayer sign Form 8453, U.S. Individual Income Tax Declaration for an IRS e-file Return. The ERO must mail Form 8453 to the IRS within three business days after receiving acknowledgement that the return was accepted by IRS.

13. If the taxpayer uses a PIN and owes taxes, can they pay the balance due electronically?

Yes. Taxpayers who use a PIN may pay their balance due by electronic funds withdrawal or credit card.

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.11 Self-Select PIN Method Questions and Answers continued

14. Are all taxpayers who file electronically and sign with a PIN required to pay any balance due electronically?

No. Taxpayers who prefer to pay by check or money order should file Form 1040-V, Payment Voucher. Form 8879, IRS e-file Signature Authorization, should not be used to transmit any payments.

15. Is the Self-Select PIN a Universal PIN?

No. It is used as the taxpayer's electronic signature on their Individual Income Tax Return only. Taxpayers may also use it as a piece of authentication when filing their next year tax return with the Self-Select PIN method.

16. Can the taxpayer use the same PIN next year?

Yes, or they may choose any 5 numbers except all zeroes.

17. What happens if two taxpayers select and use the same PIN to sign their return?

It is acceptable for two taxpayers to choose the same five digit PIN. The taxpayer's personal information (Social Security Number, Date of Birth, and original Adjusted Gross Income or PIN from the **2006** tax return) provided to the IRS is used to verify the taxpayer's identity.

18. What is the Prior Year PIN?

The Prior Year PIN is the PIN the taxpayer used to sign their previous year tax return.

19. How would my client get a copy of their Prior Year PIN?

EROs will need to provide taxpayers with documentation that has the PIN on it. Tax preparation software should be capable of providing the taxpayer with a copy of the PIN used in their current tax return so that it will be available for them to use as their shared secret the next year. As a suggestion, the PIN can be pre-printed on the signature line (SEQ 1321/1324) of the tax return to avoid additional paper generation.

20. What PIN does the taxpayer use when the prior year return was originally rejected and the corrected return was retransmitted with a different PIN?

The PIN that was entered on the e-file accepted tax return is the PIN the taxpayer must use to authenticate themselves.

21. Do both taxpayers filing a joint return need a PIN?

Yes, each taxpayer must sign using a PIN. The taxpayers will choose any five digits, except all zeros, as the electronic signatures.

22. What should I do if my client is unable to return to my office to input his/her PIN?

Your client may authorize you to input his/her PIN by completing Form 8879, IRS e-file Signature Authorization. Provide Form 8879 to the taxpayer along with a copy of the completed tax return, either personally or by mail. Instruct your client to review the tax return for accuracy and complete the Form 8879 by providing the requested information (a self-selected five-digit PIN, pen and ink signature, and date). If your client is unable to return the signed Form 8879 to your office, he/she may return it by mail or FAX.

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.11 Self-Select PIN Method Questions and Answers continued

23. What is Form 8879, IRS e-file Signature Authorization?

Form 8879, IRS e-file Signature Authorization allows the tax professional to input the taxpayer's PIN. It is provided as a convenience for taxpayers who are unavailable to personally enter their PIN.

24. Where can I obtain a copy of Form 8879?

Some tax preparation software includes Form 8879, IRS e-file Signature Authorization format. A copy can also be obtained from the IRS website, www.irs.gov. A Spanish version, Form 8879-SP, is also available on the website.

25. Must I use Form 8879 for every e-file return I file using the Self-Select PIN Method?

No. Form 8879 is only required when one or both taxpayers are unavailable to personally enter their PIN, or if the PIN was generated or assigned by the ERO.

26. Can the taxpayer give me their PIN verbally for me to enter in their electronic record?

Yes. The taxpayer may give you their PIN verbally; however, you must receive a completed Form 8879, IRS e-file Signature Authorization, from the taxpayer before you transmit the return or release it for transmission to the IRS.

27. Is it acceptable for an ERO to enter the taxpayer's PIN in the electronic return format before Form 8879 is generated.

Yes, the taxpayer PIN can be entered into the electronic return format prior to generation of the Form 8879. However, the ERO must receive a completed Form 8879 signed by the taxpayer before you transmit the return or release it for transmission to the IRS.

28. Is it acceptable for an ERO and/or software program to generate or assign the five digit PIN the taxpayer will use to sign his e-file return?

Yes, an ERO may determine the taxpayer's PIN if certain conditions are met. In all instances, the taxpayer shall retain the right to select his or her own PIN. If the taxpayer agrees to allow the ERO to determine the taxpayer PIN, the taxpayer will consent to the ERO's choice by completing and signing a Form 8879 which contains the taxpayer PIN used as the return signature. The taxpayer PIN can be systemically generated or manually assigned by the ERO.

29. Is it acceptable for the ERO to assign the same PIN for multiple clients?

Yes, it is acceptable to assign the same PIN for multiple clients.

30. Can a married taxpayer filing a joint return pick the PIN and enter it for his/her spouse?

No. The taxpayer that is not present to personally enter their PIN must complete Form 8879 to authorize their tax professional to input the PIN for them.

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.11 Self-Select PIN Method Questions and Answers continued

31. Do both taxpayers filing a joint return have to authorize the tax professional to input their PINs?

No, only the taxpayer that is not present to sign the return should authorize the preparer to enter their PIN. If neither spouse is present to sign a joint return, each can authorize the preparer to enter his/her respective PIN. A spouse who is present should enter his/her own PIN, even if the preparer has authorization to enter the other spouse's PIN.

32. What is my responsibility as a return preparer using Form 8879 when the taxpayer completed their own return?

As a return preparer, your responsibility is to provide the taxpayer with Form 8879 along with their return for review. You are required to generate or enter the header information, the five tax return line items in Part I, and the ERO firm name in Part II. You may also systemically generate or manually assign the taxpayer PIN in Part II.

33. When does the taxpayer complete Form 8879?

If you prepared the return, the taxpayer must complete Form 8879 after they have reviewed the prepared return. If the taxpayer provided a completed return for transmission, the Form 8879 and PIN selection can be completed without reviewing the electronic return. You must receive the completed Form 8879 from the taxpayer before you transmit the return or release it for transmission to the IRS. Tax return line items in Part I must be entered on Form 8879 before the taxpayer signs.

34. Can a taxpayer complete Form 8879 and fax it to the ERO?

Yes. Form 8879 can be signed and returned to the ERO via fax transmission. However, the ERO must retain Form 8879 in their file for three years from the Return Due Date or IRS Received Date, whichever is later. Form 8879 files can be retained electronically in accordance with Rev. Proc. 97-22.

35. Do I provide a copy of the completed Form 8879 to the taxpayer for their records?

Provide a copy of the completed Form 8879 to those taxpayers requesting one. You may provide a copy to other taxpayers, but you are not required to do so.

However, EROs will need to provide taxpayers with a copy of Form 8879 if the current year PIN is assigned by the ERO or generated by the software. The taxpayer may need the PIN to use as their shared secret the next year.

36. Can a preparer enter the taxpayer's PIN on an Application for Extension of Time to File?

Yes. Form 8878, IRS e-file Signature Authorization for **Form 4868 and Form 2350** is available for taxpayers to authorize the ERO input of their PIN on Forms 4868 and 2350. Form 8878 is included in some software packages. A copy can be obtained from the IRS website, www.irs.gov. A Spanish version, Form 8878-SP, is also available on the website.

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.11 Self-Select PIN Method Questions and Answers continued

37. Do I have to mail Form 8879 or Form 8878 to the IRS?

No. Retain the completed Form 8879 and Form 8878 in your file for three years from the Return Due Date or IRS Received Date, whichever is later. In addition, Form 8879 should not be used as a transmittal to fax documents or submit payments to IRS.

38. Is it acceptable for an Electronic Return Originator (ERO) to electronically image and store Form 8879, IRS e-file Signature Authorization, and Form 8878, IRS e-file Signature Authorization for Form 4868 or Form 2350, and meet the document retention requirement?

Yes, an ERO may electronically image and store Forms 8879 and 8878 if the ERO's storage system satisfies the requirements of Rev. Proc. 97-22, Retention of Books and Records. In brief, Rev. Proc. 97-22 requires that the electronic storage system must ensure an accurate and complete transfer of the hard copy or computerized records to an electronic storage media. In addition, all records reproduced by the electronic storage system must exhibit a high degree of legibility and readability (including the taxpayer's signature) when displayed on a video display terminal and when reproduced in hard copy.

39. How do I know the IRS received the Self-Select PIN?

When you receive your Acknowledgement Record, all accepted returns will have the Self-Select PIN Presence Indicator. The following value will be returned:

"9" = No PIN Present. (Form 8453 or 8453-OL Required)
"1" = Practitioner PIN
"2" = Self-Select PIN by Practitioner Used
"3" = Self-Select PIN by Online Used
"4" = State Only, No PIN. (Form 8453 or 8453-OL is Not Required)
"Blank" = Return Rejected with PIN

40. What is an ERO PIN?

The ERO PIN is the ERO electronic signature. For consistency, each ERO is encouraged to use the same 11 numbers for their PIN on all returns for this filing season. The first 6 positions of your ERO PIN must be your EFIN and it must match the DCN. You may select any 5 digits, except all zeros, for the next five positions. It does not take place of the taxpayer's PIN. A taxpayer PIN is also required.

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.11 Self-Select PIN Method Questions and Answers continued

41. Will the ERO PIN be acknowledged as well?

If the ERO PIN is not present, the return will reject displaying an error reject code.

42. Where can I receive a copy of the Error Reject Codes for the Self-Select PIN method?

The Error Reject Codes can be found in the [Publication 1345A](#), Filing Season Supplement for Authorized IRS e-file Providers and in Section 10 of this Publication.

43. Why is a Date of Birth required with Self-Select PIN method?

The Date of Birth is required as part of the authentication process for the taxpayer. It will be matched against Social Security Records. The return will not be rejected this year if the Date of Birth does not match. However, the Acknowledgement Record will contain the field Date of Birth Validity Code. It will advise you if the dates of birth submitted were valid or mismatched. The following values will be returned.

- "0" = Date of Birth Validation Not Required
- "1" = All Dates of Birth Valid
- "2" = Primary Date of Birth Mismatch
- "3" = Spouse Date of Birth Mismatch
- "4" = Both Dates of Birth Mismatch

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.12 Practitioner PIN Method Questions and Answers

1. What is the Practitioner PIN method?

The Practitioner PIN is an additional signature method for taxpayers who use an Electronic Return Originator (ERO) to sign their return by entering a five digit PIN. The PIN can be any five digits except ALL zeros. It eliminates the requirement for Form 8453, U.S. Individual Income Tax Declaration for an IRS e-file Return, in most cases. When an electronic signature is chosen, no signature documents are required to be filed with the IRS.

2. Do I need any specific forms to use the Practitioner PIN method?

Taxpayers must complete Form 8879, IRS e-file Signature Authorization, for returns using the Practitioner PIN method. Taxpayers can either enter their own PIN or authorize the ERO to enter their PIN for them when completing

Form 8879.

3. Who is eligible to use the Practitioner PIN method?

Taxpayers who are eligible to file Forms 1040, 1040A, 1040EZ or **1040-SS (PR)** are eligible to use the Practitioner PIN method. There is no age restriction on who can use the Practitioner PIN.

4. Who is ineligible to use the Practitioner PIN method?

Taxpayers required to file the following forms, which must be attached to Form 8453, U.S. Individual Income Tax Declaration for an IRS e-file Returns:

- Form 1098-C, *Contributions of Motor Vehicles, Boats, and Airplanes (or acceptable documentation/required donor documentation),*
- Form 3115, *Application for Change in Accounting Method,*
- Form 3468, *Computation of Investment Credit, if historic Structure Certificate is required,*
- Form 4136, *Credit for Federal Tax Paid on Fuels, if certificate and/or reseller statement is required,*
- Form 5713, *International Boycott Report,*
- Form 8283, *Noncash Charitable Contributions, Section A, if statement(s) required, or Section B, Donated Property,*
- Form 8332, *Release of Claim to Exemption for Children of Divorced or Separate Parents,*
- Form 8858, *Information Return of U.S. Persons with Respect to Foreign Disregarded Entities,*
- Form 8864, *Biodiesel and Renewable Diesel Fuels Credit, if Certificate and/or reseller statement is required*
- Form 8885, *Health Coverage Tax Credit, and*
- Schedule D-1, *Continuation Sheet for Schedule D (Form 1040) (or acceptable substitute), if taxpayer elects not to include their transactions on the electronic STCGL or LTCGL records.*

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.12 Practitioner PIN Method Questions and Answers continued

5. How does the Practitioner PIN method benefit the ERO?

The Practitioner PIN method offers an additional taxpayer signature option for EROs to use in preparing and transmitting Forms 1040, 1040A, 1040EZ and **1040-SS (PR)** to IRS. More specifically, it eliminates the requirement to file signature documents with the IRS.

- The Date of Birth and the prior year Adjusted Gross Income amount or Prior Year PIN are not needed for Practitioner PIN returns.

6. Is there an authorization form required for filing Form 4868 using the Practitioner PIN method?

Yes. Complete Form 8878, IRS e-file Signature Authorization for Form 4868 and Form 2350, for Form 4868 filed using the Practitioner PIN method. Remember that a signature is only required on Form 4868 when there is an Electronic Funds Withdrawal.

7. What is my responsibility as an ERO using the Practitioner PIN method?

EROs are required to sign Form 8879, Part III, with their ERO EFIN/PIN for all returns using the Practitioner PIN method. The ERO EFIN/PIN consists of eleven digits (the first six positions is the EFIN and the last five is any five numbers except ALL zeros). EROs should confirm the identity of taxpayers per Publication 1345 when completing Form 8879, prior to transmitting returns to IRS.

8. Do I mail Form 8879 or Form 8878, IRS e-file Signature Authorization, to the IRS?

No. Do not mail Form 8879 or Form 8878 to the IRS. EROs using the Practitioner PIN method must retain Forms 8879 and 8878 for three years from the return due date or IRS received date, whichever is later. Electronic storage is also acceptable. In addition, Form 8879 or 8878 should not be used as a transmittal to fax documents or submit payments to the IRS.

9. Will I receive an Acknowledgement that the Practitioner PIN method was used?

Yes. A PIN Presence Indicator of "1" will be present in the Acknowledgement File Key Record of a return when the Practitioner PIN method was used. Please be sure to check the Acknowledgement File for the PIN Presence Indicator on all returns transmitted using a PIN signature.

10. Will the ERO PIN be acknowledged as well?

If the ERO PIN is not present, the return will reject displaying an error reject code.

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

.12 Practitioner PIN Method Questions and Answers continued

11. Where can I find the Error Reject Codes for the Practitioner PIN method?

The Error Reject Codes can be found in the Publication 1345A, Filing Season Supplement for Authorized IRS e-file Providers and in Section 13.10 of this Publication.

12. Are all taxpayers who file electronically and sign with a PIN required to pay any balance due electronically.

No. Taxpayers who prefer to pay by check or money order should file Form 1040-V, Payment Voucher. Form 8879, IRS e-file Signature Authorization, should not be used to transmit any payments.

Intentional Blank Page
